

YULE MAIL SETS NEW RECORD AT LOCAL POSTOFFICE

Parcel And Letter Volume
At Peak Thursday,
December 20.

The volume of mail handled at the local post office this year surpassed all former records, according to Assistant Postmaster Roy Kufalk, who kept strict tab on the incoming and outgoing parcels and letters during the week preceding Christmas. "The peak in volume was reached Thursday when 6,750 letters were mailed and 65 pouches of mail were handled, 32 sacks being dispatched from the office and 33 coming in," Mr. Kufalk said.

Friday's mail was a trifle under Thursday's record when the local office received the largest incoming mail, 60 sacks. On this day 5,200 letters and 15 sacks of parcels were sent out.

The big mail began December 17, when 1600 letters were mailed and 39 bags of parcel post mail arrived and 18 sacks were sent out. December 18, the volume jumped to 45 sacks of parcels, 21 in and 24 outgoing, and 1,500 letters. December 19, Wednesday, saw 4,000 letters mailed and 63 parcel post pouches at the local office, 36 sacks in and 27 out. Saturday's mail was also heavy, 61 sacks and 4,000 letters being the total for the day. The day before Christmas there were only four outgoing sacks, but 2,750 letters were mailed and 49 pouches of parcel post came in, indicating that all had not needed the admonition to mail early.

This great volume of mail was handled promptly and efficiently at the local postoffice without extra help but members of the force admitted working several hours over time.

High School Teachers Leave For Vacation

Lee Peterson is spending his holiday vacation with relatives in New Lisbon, Wis.; G. G. Reed, Logansport, Ind.; Alice Smith, Grayslake, Illinois; Leone Miller, Minneapolis; Hedvig Rice, Benson, Minn.; Gladys Talling, Pennsylvania; Mrs. Ruby Ritchey, Olney, Ill. Prin. L. O. Wright, Mr. Kuffel and Mr. Hackett are remaining in Antioch.

Two Famous Orchestras at Valencia New Year's Eve

Manager Gus Gorman of the Valencia ballroom, Waukegan, has announced the engagement of two very popular orchestras to play at the ballroom on New Year's eve. They are H. A. Helmle's Royal orchestra, well known to north shore dancers through their long engagement at the Valencia last year, and Jerry Snyder's Troubadours. Both orchestras are well known to radio audiences. The double orchestra will be a rare treat at the Valencia New Year's eve.

Sedan Stolen From Church Is Recovered

Recovery of his Whippet sedan a few hours after it had been taken from the parking grounds at the Holy Name church at Winnetka was the experience of Charles Mecklenberg, Antioch, last Monday night. The family were attending mid-night mass at the church and it was during the service that the car was stolen. When located later, a mile down the road it was found no damage had been done further than a broken lock on the door.

Alumni Banquet Tonight

Members of the Antioch High School Alumni association will meet in annual banquet tonight at the high school. The secretary reports today that 155 reservations have been sent in, a record number to attend the annual meeting of the association.

The dinner is prepared under the supervision of the Home Economics department and will be served by the boys of the sophomore and junior classes. Jodge Walter Taylor, Waukegan, W. S. Adams, former principal and now professor at the University of Illinois, and Victor Brown, one of the youngest members of the association, are to be the principal speakers. Those who expect to attend are looking forward to a most interesting meeting tonight.

WILL ADVISE AGAINST LOAFING AT CAPITOL

L. L. EMMERSON

Governor-Elect Louis L. Emerson favors a short and economic session of the Illinois general assembly, one which would come to an end probably in ninety days. While Mr. Emerson has not gone on record in favor of a ninety-day session, in an address at Chicago a few days ago he said that he hoped for a short session and one that would be a saving to the taxpayers of Illinois.

Mr. Emerson's desk is piled full of applications for positions in the new regime. They have been accumulating but probably will not be given consideration for some time.

"I am not even considering anybody for appointment," Mr. Emerson said. "Remember that I am still secretary of state, and between looking after the duties of that office and trying to prepare my inaugural message I have all I can possibly do for several weeks to come."

Mr. Emerson is not expected to make any appointments until the inauguration, and then the list may be made up only of cabinet positions.

IMPROVE ROADS TO CUT MISHAPS

Thousand Motorists Lose
Lives In Chicago Area
In Less Than Year.

In less than one year in Cook county, Illinois, Chicago's home county, one thousand people have lost their lives in automobile accidents.

Aside from a number of recommendations asking strict enforcement of old and proposed traffic laws, Dr. Herman N. Bundesen, Cook county coroner, urges the replacement of 13 and 20-foot roads in the metropolitan area with 40-foot roads, and the construction of numerous separated grades.

Commenting upon the need for improvements in the physical make-up of the road, Dr. Bundesen has stated:

"I cannot stress too earnestly the need for wide uninterrupted highways. For example on the Bronx River Parkway in Westchester county, New York, 35,000 cars passed during eleven hours on Memorial Day of 1926 without accident of any kind."

"Eighteen and 20-foot roadways make for congestion. We need a system of 40-foot roadways and an ample provision for the separation of grades at highway intersections. Last year there were 205 deaths at grade crossings in Illinois. There are more than 2,000 unprotected crossings in the state. We ought to crusade earnestly for the elimination of them all."

Road planners realize that today's traffic is not as heavy as it will be tomorrow. According to a statement recently made public by the U. S. Bureau of Public Roads, Cuyahoga county, in which Cleveland is located, may expect an increase in traffic of 73 per cent within the next 10 years. Even in the surrounding counties, the traffic will be greater by 13 to 35 per cent. The problem of the city is making itself the problem of the entire metropolitan area.

The need for wide pavements and separated grades, otherwise known as underpasses and overpasses, is urgent. It will be more so tomorrow.

J. DIDAMA REPORTED BETTER
John Didama, who was taken to the Lake County General hospital last Saturday, is reported to be somewhat better today. Mr. Didama was stricken with pneumonia several days ago. He is 81 years old.

ATTENDS FUNERAL OF BROTHER IN CHICAGO
Mrs. William S. Rinear and George Lewis today are attending the funeral of their brother Herbert Lewis, who died in Chicago at one o'clock Christmas day.

HIGH SCHOOL STUDENTS ENJOY YULE PROGRAM

Traditional Play Is Well
Presented and Music
Numbers Please.

"When the Chimes Rang" was the subject of a well-presented play at the high school auditorium Friday afternoon, the play being a part of the yule program staged by students under the direction of Miss Miller. The theme of the play dealt with the giving of gifts, portraying the old legend "the chimes will ring when most pleasing gifts are made." Rich and poor, humble and mighty presented their gifts but the chimes did not ring until the poor had made his offering of a few pennies, then it was discovered that it was the spirit in which the gift was made that caused the chimes to ring signifying approval of the giver and the gift. It was a clever presentation and carried a great moral lesson.

A chorus of 30 voices sang the Hallelujah chorus and the glee clubs sang many Christmas carols.

Santa Claus appeared at the close of the program and took charge of the gift exchange. Then it was all over for 1928. School will start Monday, January 7.

EDWARD BROOK, AGED FARMER, FINANCIER, BURIED AT BURLINGTON

Established Bank of Antioch in 1894; Farmer For Fifty Years.

Edward Brook, aged farmer and banker, and founder of Antioch's first financial institution, died Thursday at his home in Burlington, Wisconsin, following a brief illness due to old age. Interment was in the Burlington cemetery Sunday.

The aged financier was nearing the century mark at the time of his death, having passed his 93rd milestone recently, and he was one of the best known men in agricultural and financial circles in Racine county. He was one of the pioneer farmers of that county and filled the soil for half a century, latter becoming connected with the Melhardt bank at Burlington, and some years later, 1894, establishing the Bank of Antioch, the first bank ever established in this village. The institution here later took the name of Brook State Bank of Antioch. His son, Ernest Brook is now president of the local bank.

Leaves Widow, Four Children
The deceased is survived by his aged widow, 85, and four children: Ernest and Elmer, Antioch, and two daughters, Mrs. Edith Newell, Burlington, and Mrs. P. R. Spencer, Eustis, Florida.

College Students Home For Yuletide Vacation

If ever any season of the year brings thoughts of home it is the Yuletide, and this year, as usual, college students with few exceptions have sought Christmas cheer at the home hearthfires. Among those home for the holiday vacation are: Emmett Welch, Illinois; Misses Ethel and Alice Hahn, Wisconsin; U. of Madison; Georgia Van Patten, American Academy of Art, Kimball Hall, Chicago; Willard Chinn and wife, and son, Illinois; Howard Spafford, Michigan; Homer Tiffany, Dartmouth; Misses Glenn and Cornelia Roberts, Illinois; Philip Simpson, Illinois; Ramona Winslip, Illinois; Helen Crish, Chicago School of Pharmacy; Ardis Grinn, Milwaukee; Downer; Stephen Pacht, American Academy of Fine Arts; Miss Katherine Keahl, Illinois Wesleyan, Bloomington.

HAPPY NEW YEAR

This is the last issue of THE ANTIOCH NEWS to be published in 1928, so this opportunity is taken to wish the readers and friends of THE NEWS a HAPPY, PROSPEROUS NEW YEAR—with 365 days of health and happiness. THE NEWS wishes to serve its readers in 1929 in even a better way than it has done in 1928. Any suggestions will be welcome. Don't forget that this is YOUR paper. Do your part—we'll try to do ours.

Tournament Games Are Announced For Conference

The drawings for the conference tournament have just been announced.

The first round of games will be played at Lake Zurich Thursday, January 31. On Friday night the North Section plays at Gurnee while the South Section plays at Palatine. The winners then meet at Wauconda Saturday afternoon and night for the finals.

The following schedule of games has been outlined:

Thursday night, Jan. 31, at Lake Zurich.
No. 1—Wauconda vs. Lake Zurich.
No. 2—Arlington vs. Bensenville.
Friday night February 1, at Palatine.
No. 3—Palatine vs. Franklin Park.
No. 6—Winner 2 vs. Barrington at Gurnee.
No. 4—Gurnee vs. Libertyville.
No. 5—Winner 1 vs. Antioch.
Saturday p. m., at Wauconda.
No. 7—Winner 5 vs. Winner 3.
No. 8—Winner 4 vs. Winner 6.
Saturday night at Wauconda.
Loser 7 vs. Loser 8.
Winner 7 vs. Winner 8.

This should be a series of games where keen competition prevails, since no team has shown any outstanding advantage over the other teams.

Antioch won the tournament last year and will have to be given an outside chance this year. Libertyville and Antioch should fight for the cup this year on pre-season showing. It is entirely possible that neither team will be in the finals, for Franklin Park may eliminate Antioch, and Heights or Barrington may put Libertyville out of running.

Tooley Opera Co. Opens High School Lyceum Course

The first number of the Lyceum course sponsored by the high school will be on Monday, January 7, when the Tooley Opera company presents their comic opera "The Beggar King." This company is considered to be the best on the circuit of the University of Wisconsin or on any other professional circuit. They have a cast of six people, trained for this particular kind of work. They carry four large trunks of beautiful scenery and gorgeous costumes.

Mr. Tooley and his wife have played at Ravinia during these high classed summer operas. Mr. Tooley is a producer of merit. Each year he writes the plays and trains several companies in their performance.

Not only do they produce an opera of high merit, but Mr. Tooley is such a comedian that the entire program is interspersed with such clean wholesome humor that the audience has plenty of occasion to relax.

It has been several years since a series of entertainments has been presented in Antioch. No organization has cared to take the responsibility. The high school has consented to sponsor the course this year, and they have selected a group of high class performances.

DOG ATTACKS HOGS AT FARM HOME

The killing of sheep by dogs at this time of year is a common occurrence in Lake county, but for stray dogs to attack 200-pound hogs is quite unusual to say the least, yet that is what happened Friday night at the farm home of Swan Christensen, a mile west of Pikeville. Eight hogs, weighing from 125 to 200 pounds were bitten by large dog, two of the porkers being so badly injured they had to be killed.

The county board of supervisors allows indemnity for sheep killed by dogs, but it is not known whether or not the indemnity would also cover losses sustained by farmers when hogs are the victims of dogs. Supervisor Barney Naber will take the matter before the board of supervisors.

Attend Poultry Meet At Model Farm Thursday

Prof. Heinrich of the State Department of Agriculture, was the speaker at a meeting of poultrymen and farmers held last Thursday night at the Public Service Co. model farm near Mundelein. Those attending also had the privilege of witnessing a demonstration of the many conveniences to be found at the model farm. Antioch representatives at the meeting were Prof. C. L. Kuhl, F. D. Hollenbeck, Bert Edwards and Harry Tillotson.

Mrs. Emma Bartlett continues to be very critically ill at the home of her daughter, Mrs. W. F. Ziegler.

SEARCH CONTINUES FOR GUNMAN WHO SHOT FOURTH LAKE COUPLE

Grade Teachers Leave
For Holiday Vacations

Antioch grade school teachers departed the latter part of the week to spend the holidays at their respective homes: Miss Mary Hynek, Hillsboro, Wis.; Miss Elizabeth Toulton, Janesville, Wis.; Miss Julia Strickler, Madison, Wis.; Miss Dorothy Patterson, Racine, Wis.; Miss Ros Royal, Champaign, Ill.; Miss Isabelle Harwood, Normal, Ill.; Prin. and Mrs. W. C. Petty and children expect to visit relatives at Olney, Illinois, during the holidays. The grade school will start again on Wednesday, January 2.

SANTA CLAUS CALLS AT GRADE SCHOOLS

Scholars And Guests Enjoy
Yule Programs In The
Various Rooms.

Christmas comes but once a year, but that once is a real event in the lives of the tiny tots of the primary rooms at the grade schools. Friday was the great day, when programs were presented in the various rooms by the pupils, the most elaborate, perhaps, being the Yule presentations in rooms one and two where many visitors gathered to see the smaller children, many of whom were appearing in the role of actor for the first time. Of course there were Christmas trees bedecked in all their glory, and a real Santa Claus to distribute candy and nuts and there was the gift exchange in which the children take so much interest every year. The enjoyable programs and the prospects of two weeks vacation ahead indicated a merry Christmas for the grade school children.

Alumni Plays H. S. On Saturday Night

The annual Alumni basketball game will take place next Saturday night when the old timers try their skill with the youngsters of this year's team. This game will give the fans a chance to see some of their old time idols in action. Many of these men are now active in college and independent organizations, and they intend to show the younger generation just how the game should be played.

There are so many alumni who want to play that it will be necessary to divide them up and let them play against themselves after selecting a team to play the high school.

Do you remember such names as these? Spafford, Wertz, Kaufman, Chinn, Ames, Verrier, Nelson, Hook, Simpson, Wilson, Mitchell, Bernolfo and Spicer?

The proceeds go into the Alumni association treasury.

MAX PRZYBORSKI QUITS AS NORTH CHICAGO'S ATTY.

After serving North Chicago for 12 years as city attorney, Attorney Max L. Przyborski yesterday tendered his resignation to Mayor Walter L. Atkinson, to take effect January 1.

In his letter to the Mayor, Attorney Przyborski explains that the press of business has taken much of the time he owes his family and that he wishes to be relieved of his city duties. He states that the four years he has served as city attorney during the administration of Mayor Atkinson have been the most pleasant of the 12 years he has held that office, and that no friction or misunderstanding, either with the mayor or members of the council has occurred in any way to influence his resignation.

Lake Zurich Man Is Killed At Crossing

Charles Goodlock, 49 years old, of Lake Zurich, was instantly killed when he drove his automobile into the path of an E. J. & E. freight train on a crossing near Lake Zurich, on Monday afternoon. The body of the man was badly mangled beneath the wheels of the train.

The death of the man was a tragic conclusion to a trip made by him to make a holiday visit with friends. He was on his way home when the tragedy occurred.

A. F. Hallman and Wife in Hospital Following Shotgun Attack

ESTATE CARETAKER IS SOUGHT

Search continued today for Sebastian Gotter of Fourth Lake, who shot August F. Hallmann, wealthy Chicago real estate dealer, and his wife, Hilda, last Thursday. Spurred on by the offer of \$200 reward by State's Attorney A. V. Smith, for the capture of the fugitive, and the additional reward promised by Hallmann, Lake county officers have been relentless in their effort to locate the gunman.

Following the shooting Thursday afternoon, which is said to have taken place at the Hallmann home at Fourth Lake following a quarrel with Gotter, the caretaker, the Hallmanns were taken to the Victory Memorial hospital, Waukegan, and Gotter disappeared. The gunman is believed to be hiding in Chicago.

Hallmann and his wife drove from Chicago to their summer home Thursday morning when they learned that their caretaker was quarrelling with two electricians who had been sent out to make some repairs.

Used Shot Gun

Mrs. Hallmann got into their machine and her husband was climbing into the car when Gotter came out of his house armed with an automatic shotgun. When but a few yards from the machine, Gotter, the authorites were told, fired through the front and side windows on the right side of the car. Dozens of shots struck Hallmann and his wife and the latter fell out of the machine onto the ground.

Hallmanns Will Recover

Mrs. Hallmann was wounded in the hands, chest, right elbow, and right side. Hallmann received slugs on the right side of his face, left hand and shoulder. The dumb and right hand of Mrs. Hallmann was so badly wounded that it was said amputation might be necessary.

Later reports are to the effect that both Hallmann and his wife will recover. Many conflicting stories told by the Hallmanns, Mrs. Gotter, wife of the fugitive caretaker, and others, indicate that there is more to the shooting than has been brought to light, according to officers who have quizzed the Hallmanns at the hospital.

HEARTS ARE BIGGER AND BETTER SAYS THE HEALTH CHIEF

Springfield, Dec. 27.—A Santa Claus quietly building stronger and better hearts in the bosoms of the youth in Illinois was pictured here today by Dr. Isaac D. Rawlings, state health director, who pointed out in a yuletide interview that the percentage of deaths from heart disease among persons less than thirty has dropped 40 per cent since 1918, while the number of fatalities from that cause among all ages went up 52 per cent. Mortality from heart disease in general has increased very markedly, the rate per 100,000 having risen from 150 in 1918 to 192 in 1927, but the increase has all occurred in the upper age strata.

"In 1918 over ten per cent of all mortality from heart disease occurred among persons less than forty," Dr. Rawlings said. "Last year only six and a fraction per cent of all deaths from heart disease were among those less than thirty. Out of 10,402 deaths charged against heart disease in 1918, there were 1,131 among those less than thirty. Last year there were 16,891 deaths from heart disease and 1,951 were among persons under thirty. During the ten years the general population increased by nearly a million."

"These statistics are most illuminating. Preventive medicine is the Santa Claus who is bringing better hearts to our boys and girls by keeping down infectious diseases. Heart trouble in persons less than forty is usually the after effects of diseased tonsils, rheumatic fever, infected teeth, scarlet fever, diphtheria or some other preventable disorder."

"Too many folks are still succumbing to heart disease at ages far too young. To die young from heart disease is really an accident. Keeping contagion out of the schools, stimulating the correction of physical defects in children and enforcing quarantine regulations are just as much accident preventive services as traffic regulations on the streets and highways."

"Having a heart is coming to have a real meaning in Illinois."

Household
HintsFond of Prunes?
They are Quite
The Vogue Now

Prunes' Used to be considered rather vulgar to eat them. But that was years ago, for today prunes are considered "quite the vogue" as well as being healthful. Canned prunes are becoming especially popular.

Western Oregon, with one of the smallest prune crops in its history, estimated at 10 to 15 per cent of its normal is putting up one of its largest canned prune crops. Not only is virtually the entire western crop going into cans, with hardly a dryer operating, but large tonnages of eastern Oregon prunes have been shipped to western Oregon canneries.

Canned prunes may be served as they come from the cans, or the canned fruit or stewed dry ones may be chilled in the ice box and served with whipped cream. There are many new combinations in which prunes are used. Here is a recipe for Oregon Pudding.

Remove the pits from canned or stewed prunes, press through a sieve and return to the juice. Heat to the boiling point, and dissolve in it two tablespoons of gelatin which has been soaked five minutes in one-half cup of cold water. Add two tablespoons lemon juice and set aside to cool and stiffen. When beginning to set, add the stiffly beaten whites of two eggs and heat mixture with egg beater until frothy. Pour into wet molds and chill. Unmold and serve with cream or whipped cream. This recipe will serve eight persons.

Women's Federation To
Hold Open House
At New Headquarters

The Illinois Federation of Women's clubs will keep open house on Wednesday afternoon, January 2, 1929, from 2 p. m. until 8 p. m., at the federation's new headquarters, 30 W. Washington street, Chicago.

This will afford an opportunity to all interested to view the new rooms and furnishings, many of the latter being gifts from districts or clubs, and to meet the Board of Directors, who will be in the receiving line with the past state presidents and the new president, Mrs. J. Marc Fowler, of Chicago. The music will be in charge of Mrs. Frederick Williams and Mrs. H. A. McJannet, and many of the junior members of the federation will assist in various ways. A cordial invitation is extended to all club women and their friends.

The Only Reason.

It has been asked why more Americans do not own hippopotamuses. It probably is because none of the installment stores have thought about selling hippopotamuses at a dollar down and a dollar a week thereafter.

—Athenian Globe

Attaining Happiness.

Happiness is not to be solicited, but comes with an appearance of humility to be juggled with off-hand. It seems to be some kind of balance, as in riding a bicycle, attempted painfully a thousand times, and achieved at last without effort. Elizabeth Bowen.

The Pastor Says:

No credit ever cancels a debt in conduct. Each stands null repeated for.—John Andrew Holmes

Did You Ever Try
These Recipes?
Do, Please.

The season of griddle cakes and waffles is at hand and no one will regret having tried these recipes tested by the writer.

Buckwheat Cakes With Sour Milk
Sift together:
1½ cups buckwheat flour
½ cup white flour
½ teaspoon soda
1 teaspoon salt
Add:
1 to 2 cups sour milk (enough to make a thin batter.)
Beat well, then add:
1 tablespoon melted shortening
Bake on hot griddle which has been greased.

Rich Waffles

Sift together twice:
1½ cups flour
½ teaspoon salt
1 teaspoon sugar
½ teaspoon soda
Then add slowly:
1 cup sour cream or milk
½ cup melted butter
3 egg yolks, well beaten, then fold in 3 egg whites which have been beaten until dry.

Sour Milk Griddle Cakes

Mix and sift:
2½ cups flour
½ teaspoon salt
1½ teaspoon soda
Add:
2 cups sour milk
1 egg well beaten.

RED CROSS FIGHTS
DEATH AND DISEASE

Four Nation-wide Services Promote Health Preservation and Accident Prevention.

A nation-wide program for preservation of health and prevention of accidental death is one of the great services of the American Red Cross. Four bureaus, manned by experts, direct this work. They are the Public Health Nursing Service; the First Aid and Life Saving Service; the Home Hygiene and Care of the Sick Service; and the Nutrition Service.

These services aim at preservation of health through skilled nursing care; prevention of loss of life in accidents; prevention of illness, through cleanliness in the home and knowledge of methods of care of the sick; and raising the standard of physical efficiency through proper eating.

This nation-wide campaign against disease and accidental death is conducted through a majority of the 3,532 chapters of the Red Cross. It is a community campaign, fitted to the health problems of each section.

The Red Cross, through its chapters, is the largest employer of trained Public Health nurses in rural work in the United States. In its campaign for preservation of health and prevention of disease it has aided in establishing 2,600 or more community nursing services.

At the national headquarters an enrollment of nurses is maintained, which forms a great nursing reserve. Under its charter from Congress this Red Cross Nursing Service is the official reserve for the United States Army and Navy Nurse Corps. In addition, these nurses are available in time of disaster or epidemic. This reserve list of trained nurses has in 1928 reached its peak in number enrolled—there being now 47,600 nurses qualified under Red Cross regulations who may be mobilized in time of emergency.

The comprehensive, nation-wide program of instruction in First Aid and Life Saving maintained by the Red Cross is in answer to the appalling total of accidental deaths each year in the United States.

In its First Aid instruction among firemen and police forces, in factories, railroad centers, great industries, and public utilities, the Red Cross annually reaches more than 160,000 men and women, whom it teaches to be alert, ready in case of accident, to apply first aid treatment.

The campaign against accidental deaths through drowning has been carried throughout the country, and there now are 173,506 men and women, boys and girls, qualified as Red Cross life savers.

More than 500,000 certificates have been issued to girls and women, boys and men who have completed the Red Cross Home Hygiene and Care of the Sick course, which teaches sanitation in the home, safe care of the infant and child and of the invalid in the home.

The country sent flowers and other gifts to Mr. Rabbit today and last night. But still Mr. Rabbit doesn't think he had done anything unusual. "Why, it wasn't anything at all," he tells his friends.

But his friends know better.

SOLITARY MARINER
BATTLES 4 SHARKS
IN MID-ATLANTIC

Makes One of Most Amazing Ocean Trips History Has Ever Recorded.

St. Thomas, Virgin Islands.—Franz Romer, German sportsman, was entertained in St. Thomas recently after having made one of the most amazing trips across the Atlantic which history has recorded.

Romer, unknown to the people of St. Thomas, arrived from Las Palmas, in the Canary Islands. He had been out 53 days in his little, one-half-ton yacht, named the Deutsche Sport, of which he is the captain, cook, crew, and sole passenger.

Leaving Las Palmas, Romer had planned to sail his tiny craft direct to New York. But he encountered a succession of storms, which lasted five days at a time, with only a few hours of calm between. For five days he did not move, eat, drink or sleep. The seas were boiling around him and the wind howled.

The cushions, the cover of his bread box, and even his hat were carried away.

Suffers From Heat.

For the next 35 days Romer sat in his water-soaked cockpit. At the end of that time he was so sore from the salt water that he could sit up no longer, so for the next 15 days he stood up, gaining his sleep in catnaps propped against the rail.

For ten days he was becalmed. "The heat nearly drove me crazy," he said, "and I feared sunstroke, but at last heavy rains gave relief."

"While becalmed, four sharks attacked my boat. One attempted to ram it, but the heat was of such light

"Four Sharks Attacked My Boat."

Fights Shark With Flag.

"As a last resort I took the flag staff on which I happened to have an American flag and struck the shark with the flag unfurled. The shark was frightened by the bright colors and swam hastily away."

Continued unfavorable weather—first storms and gales and then fog and calm—forced Romer to put in at St. Thomas.

He said he would remain about a month, resting, and then would proceed to New York.

During the trip he subsisted upon canned fruits and one litre of water a day, having nothing else along in the way of provisions.

Bandits Find Bessie
Their Crime Nemesis

New Orleans.—Warning to bandits: If you have carried on your profession successfully and thus far evaded arrest, guard yourself against falling in love with Bessie Moran, twenty-two-year-old "queen of bandits," now in a New Orleans jail, as a fugitive from Mississippi where she is wanted in connection with the theft of an automobile.

Bessie is admittedly the nemesis of gangland. Three of Bessie's sweethearts are now doing various sentences in penitentiaries and she is looking for other "victims."

"Just playthings, poor dumb things. They are made to dynamite. One's as good as another, and they are all alike," she said. "It's the married men that fall easiest."

Bessie had just been taken to see her latest admirer, Charles Whitney, confessed holdup man, who probably will be sent to the penitentiary within a short time. Bessie's husband, Frank Jackson, convicted of embezzlement, had left for the state penitentiary only a few hours prior to her call on Whitney. She married Jackson in Cleveland, Ohio, she said. The couple were arrested in Montreal, Canada, and returned here.

Ernest Brighton, said to have been one of Bessie's early admirers, is already doing a three to five year term in the Louisiana penitentiary for robberies committed in 1926.

"It's dangerous to be a playmate," said Bessie who, with the exception of the Mississippi charge, has always managed to absolve herself of any connection with the crimes of her lovers.

WORK OF VOLUNTEERS
RED CROSS BACKBONE

Men and Women Who Give Services Aid Greatly — Surgical Dressings, Knitting, Sewing Still Carried On.

Thousands of women, who were first enrolled as Red Cross workers during the period of the World War, have never ceased in their labors for that organization, but still carry on knitting garments for disabled soldiers, making dresses and layettes for children and infants, and giving hours of their time in the various volunteer activities of Red Cross work. Volunteer work by men also plays a large part in the organization of Red Cross.

This volunteer work is the backbone of Red Cross. Fully eighty-five per cent of the service this humanitarian organization is able to render the public, through public health, American Junior Red Cross, service to disabled veterans of the World War, and the service men of the regular establishment, and its many other activities, must fall upon the shoulder of the volunteer worker. Not only is this true of the national headquarters where such distinguished volunteers are enrolled as Judge John Barton Payne, chairman, and Miss Mabel Boardman, secretary of the Red Cross, and Col. E. P. Dickinson, vice chairman in charge of foreign operations, but also in every community where Chapter chairmen and other men and women devote hours of their time to fostering and planning the valuable and humane work of Red Cross, so that it may be ever ready to serve in time of distress, catastrophe or great national emergency.

In the year just ended, 253,000 garments were provided by Red Cross Chapters, including 1,399 layettes with nineteen articles each, for use in disaster areas.

Women who rolled surgical dressings ten years ago, with the help of new volunteers, still carry on this work for hospitals in their communities, and for the Chapter's stock, where a supply must be maintained to answer emergency calls. In the year just ended, the women made 2,276,000 dressings.

No type of volunteer work is more interesting or meets greater appreciation from its beneficiaries than the distribution each December of Christmas bags—one of which goes to every service man in the Army and Navy stationed on a distant post. Each year the request comes for more bags, until for Christmas, 1928, Red Cross volunteers have been asked to provide 42,000. The bags, containing small necessities dear to a service man's heart, go to the Philippines, China, Guam, Nicaragua and all the distant ports where Uncle Sam's men are stationed.

Another service these volunteers perform, which has generally gripped the imagination of all who have come in touch with it, is the transcription into Braille for the blind of hundreds of books. Need of certain types of books for the blind first came to the attention of Red Cross through the blinded veterans of the World War. From work begun for the war blind with a few devoted workers, this transcription of books now is being carried on by 1,029 Braille transcribers, who during this year have hand-copied 150,705 pages, and 345 titles have been completed.

But Not Unwelcome.

A New York man contemplating suicide changed his mind when he found 25 cents in the street. "Would it be fair to refer to that as help from an unexpected quarter?" Southern Lumberman.

For Health and a Happy Home Life Health makes for happiness in the home, not sickness. So when Mrs. A. G. Wells, Rocky Mount, N. C., suspected that her physical distress and tired out feeling resulted from disturbed kidney and bladder action, she tried Foley's diuretic, then wrote: "I am so happy over my regained health. Please publish this statement that people everywhere may know the wonderful benefit I have derived from the use of Foley's diuretic." On sale at King's Drug Store.

Valuable Lacquer.

Cinnabar lacquer, a warm-colored composition used extensively in the Orient for the painting and preserving of valuable boxes, screens and other wooden articles, was discovered in China during the Ming dynasty, 1368 to 1644. Cinnabar is the ore of mercury and is used in the powdered form. Lacquer is made by boiling large quantities of the insects.

Fine for the Lawns.

The peach is becoming popular for lawn and dooryard planting far beyond the area in which this tree is grown commercially. Beautiful in foliage and graceful in form, it not only ornaments home surroundings but also produces crops of what is reputed to be the choicest of all the nuts.

LAKE COUNTY KEEPING UNDER APPROPRIATIONS WITH \$25,000 EXCESS

Board Looks Forward To Effecting Savings On Its Budget.

Swinging into its second quarter with something like \$25,000 excess from its annual appropriation the county board of supervisors looked forward to effecting a savings on its budget for 1928-29.

On the present ratio the county is keeping \$6,252.45 under its appropriation each quarter.

For all purposes it was deemed necessary to expend \$496,300 for the year. The first three months called for \$117,572.55. This leaves \$378,059.65 for the remaining nine.

Only one department showed an overdraft. That was on foreign witness fees where \$200 had been set aside. Thus far \$567 has been spent or an overdraft of \$337. Anticipating witnesses to Waukegan for the expensive treasury trial is believed responsible in a large way for this.

The county hospital has kept well within its budget thus far but the biggest bills will be presented by this institution at the next meeting as most of the buying is done after January 1.

The budget for 1928-29 was practically the same as the preceding year although there was an allowance of \$25,000 to remodel the county poor farm at Libertyville. It is believed by members of the county farm committee that not more than \$22,000 of this sum will be spent.

Dispelling Melancholy.

I once gave a lady two-and-twenty recipes against melancholy; one was a bright fire; another to remember all the pleasant things said to and of her; another, to keep a box of sugar-plums on the chimney-piece, and a kettle simmering on the hob. How true it is that little pleasures often banish melancholy better than higher and more exalted objects.—Sydney Smith.

The Braggart.

If you are a braggart, many people will want to humble you. The more you brag, the greater the danger you are in.—Aitchison Globe.

Horse Measurement.

From ancient times the measurement of horses has been reckoned in "hands"—a "hand" being four inches

HALF MILLION PEOPLE AIDED BY RED CROSS IN HURRICANE RELIEF

Porto Rico and Florida Victims Helped by Prompt Action; \$5,000,000 Given by Public.

One of the greatest disasters, in point of loss of life and devastation of homes, in which the American Red Cross has ever carried relief was the West Indies hurricane of September last, which swept across Porto Rico, parts of the Virgin Islands, the coast of Florida and north to end in torrential rains, flooding streams in a half dozen states. The known dead in all of the areas affected was 2,259, although it was admitted that the complete total of dead in Florida would never be known. The number of injured was estimated at 3,170. Approximately 20,000 buildings were destroyed and damaged.

At the height of the emergency the Red Cross was caring for 506,410 people—that is, feeding and clothing them and arranging for whatever shelter was obtainable. As long as three weeks after the hurricane struck Porto Rico and Florida, the Red Cross was aiding 20,236 people who were sick, of these 236 in Florida and the remainder in Porto Rico, where influenza and malaria were being treated to prevent epidemics of more drastic diseases. Large numbers of Red Cross nurses were active at both points.

In Florida more than 11,000 persons applied to Red Cross for assistance, and a great number of people in Florida and also in Porto Rico still were being cared for in the matter of food, clothing and shelter as long as two months after the hurricane, while they awaited maturing crops which would enable them to again become self sustaining.

For this relief task, the American public gave the American Red Cross a fund of \$5,000,000—the sum set forth in a proclamation issued by President Coolidge a few days after news of the hurricane was received.

The relief given by the Red Cross in this great emergency, spread over such a wide territory of sea and land, was everywhere commended and special emphasis was placed upon the promptitude with which the organization responded. The hurricane struck Porto Rico September 13, and the first brief cable word of it came September 14, to both Red Cross and the news agencies. Before nightfall, the national director of disaster relief for the Red Cross and a staff of

four trained men had left Washington for Charleston, South Carolina, to board a navy destroyer which upon instruction of the President of the United States had been placed at command of the Red Cross in the Secretary of the Navy. And although the next day was Sunday, a Red Cross man arrived in New York to purchase a thousand tons of food for the Porto Ricans, already reported to be starving, and the Navy again placed a ship for the cargo at Red Cross command. Late on Saturday evening there came another cable—a Red Cross nurse at St. Croix, in the Virgin Islands, addressed a plea to the mother organization in Washington and gave first warning of the plight of the people of the American possession, where an family in a population of 11,000 had escaped injury.

In the meantime the Red Cross had notified its Florida Chapters that it stood ready for any service. In event the hurricane, headed toward them, did any damage. Not content with this, the Red Cross on Sunday night entrusted a disaster relief director and six workers for Florida.

Money, food, clothing were dispatched immediately to both points, and before the end of the week the Red Cross was feeding a half million people.

This prompt response was made possible by the disaster relief organization the Red Cross has brought together and trained through a series of such national calamities.

Keeping Cut Roses.

The life of cut roses can be prolonged, often to an extraordinary extent. If every night they are taken from their bowl or vase, a tiny bit snipped off the stalk, and then roughly scratched with the finger nail or one side of the scissors at intervals up the length and then plunged right into a very deep pail of cold water. Even if the flowers themselves some times get under the water it does not matter.

Carry on Old Business.

In Wales and Durham, England, "Quilt Wives" still practice the traditional craft of quilting, the art of which has been handed down from mother to daughter. The wool for quilting is bought locally and is first washed and carded; it is then placed in the frame between the two outer coverings of the quilt, and the whole is ready to be stitched.

Grass Builds Revetments.

Acres of land which is covered by the tide twice daily are gradually being won from the sea and turned into valuable soil for farming by means of a special kind of grass, says Popular Mechanics Magazine. It is a rush-like variety and collects mud about its fine roots and slender stalks. Inch by inch it builds up the shore level.

BOTTOMLEY BEST FIRST BASEMAN

Ranked as First in National League Because of Hitting.

At least two of our present day first base performers in the majors stand out in a class by themselves. It is no secret, even to the fan who has only occasional enthusiasms of baseball fever, that one of this pair is James Bottomley of the St. Louis Cardinals; the other Lou Gehrig of the Yankees, writes Irving Vaughan, in the Chicago Tribune. They are pre-eminent because they are masters of the art of laying the wood against the leather, it being conceded, also proved, that the man with the punch can take the play away from the fellow whose chief stock in trade is holding.

While the task of separating the above duo from the other front door attendants of the two majors involves no drain upon the mental faculties of the so-called expert (who frequently writes only what he hears roll from the tongue of a man long experienced in the diamond profession), it is quite another job to distinguish between Mr. Bottomley and Mr. Gehrig.

There is no little difference in the skill of the two men that determining one from the other as the outstanding first sacker of the season might well be decided by drawing a slip of paper from a plug hat. Or you might even determine which has the better disposition and make your choice accordingly.

In the opinion of the writer Bottomley is entitled to a rating slightly higher than the young man who is doing his bit to make the Yanks too

Jim Bottomley.

formidable for the rest of the American League. This choice is made, not

on figures, which can be made to prove almost anything in baseball, but on items that are not apparent to, or even considered, by the enthusiast who says the freight and sits in the grand stand. The chief of these is that Bottomley is the attack of the Cardinals. Gehrig is part of the Yank attack that is formidable mainly because of the power of Ruth.

It is an established fact in baseball that there is a sort of psychological advantage in hitting immediately behind a batter of Ruth's caliber.

Bottomley came to the Cards from Syracuse in August, 1922, for three players and a cash consideration. During his career in the majors he has maintained a batting average of .331.

Bottomley played in the world's series against the Yankees in 1925, hitting at a .345 clip for the seven games.

Beginner Learns Quick If He Has Confidence

George Van Elm, the amateur golf champion, said at a dinner in Los Angeles:

"The beginner learns golf more quickly if he has confidence in himself, but self-confidence is what most beginners lack."

"A beginner was getting ready to swipe at a ball one day when his caddy said:

"Hold on, boss. Man in front. You must always yell 'Fore!' if there's anybody in front of you when you're going to hit the ball."

"Oh, rubbish!" said the beginner. "How the dickens do I know when I'm going to hit the ball?"

Elephants in Ireland.

Hairy elephants once roamed in Ireland, according to scientists there, who have found bones of the mammoth. The animals were covered with red hair and their tusks were longer and more curved than those of the modern elephant, the scientists declare. The description tallies with the crude prehistoric sketches found on bones and on the walls of caves in France.

Fountain Christmas Tree.

Lighted by flood lamps, a tree-shaped fountain was a feature of last year's Christmas display at Fresno, Calif. The jets were arranged to fall in such a way that they resembled the drooping branches of a fir tree, while the lights produced an effect of solidity when directed upon the water.—Popular Mechanics Magazine.

Trees as History Books.

The Tlingit Indians of the Northwest, authentically the totem pole tribe, carved their histories on poles which required entire tree trunks.—Woman's Home Companion.

CHRISTIAN SCIENCE CHURCHES

"Is the Universe Including Man, Evolved by Atoms Force?" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, December 23.

The Golden Text was "Thou, Lord, in the beginning hast laid the foundation of the earth, and the heavens are the works of thine hands" (Hebrews 1:10).

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "Ah Lord God! behold, thou hast made the heaven and the earth by thy great power and stretched out thy arm, and there is nothing too hard for thee" (Jeremiah 32:17).

The Lesson-Sermon also included the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "Mind's control over the universe, including man, is no longer an open question, but is demonstrable Science" (p. 171).

MRS. NELSON IS HONOR GUEST AT PARTY

Mrs. Lester Nelson was guest of honor at a party given last Wednesday evening by Mrs. Edwin Bentner at her home on Victoria street. Mrs. Nelson was the recipient of many pretty gifts. The guests included: Mrs. R. M. Haynes, Mrs. William Teichert, Mrs. Sine Laursen, Mrs. Alma Fox, Mrs. Walter Hills, Mrs. George Bacon, Mrs. John Thompson, Kenosha; Mrs. Raymond Borregau; Mrs. W. A. Dodge and Miss Eynore Dodge, Ringwood; and Mrs. N. L. Nelson.

Miss Luel Boden of the Antioch News is spending her Christmas holidays in Athens, Ohio, with her parents.

Mr. and Mrs. Roy Graves and children spent their Christmas holidays visiting relatives in Dixon, Illinois, returning home Wednesday.

Mr. and Mrs. Robert C. Abt spent the Christmas holidays in Chicago.

Mr. and Mrs. Andrew Dalgaard and family spent Christmas with Mr. and Mrs. Sol LaPlant.

Mr. and Mrs. Clarence Shultz entertained at Christmas dinner Mr. and Mrs. E. O. Hawkins and family, Mr. and Mrs. C. E. Shultz of Antioch and Mrs. Lillian Shultz of Highland Park, Illinois.

Mrs. Farrar and son, and Mrs. T. G. Rhodes of Oak Park, Illinois, called on Antioch relatives Wednesday.

Mr. and Mrs. O. W. Kettelhut entertained at Christmas dinner Mr. and Mrs. Thomas Johnson of Pontiac, Illinois. Mr. and Mrs. Ray Progenzer, Jr., Mr. and Mrs. George Paulin, and Mr. and Mrs. Frank Williams of Antioch.

Mrs. Maude Sablin is spending the Christmas holidays with friends in Chicago.

Miss Myrtle Haynes and friend of Chicago spent the holidays with relatives here.

Mr. and Mrs. Fred Loof spent Christmas with relatives in Chicago.

Mr. and Mrs. Albert Harnstable entertained Mr. and Mrs. W. R. Williams at Christmas dinner.

Mr. and Mrs. Win Prohl and children of Milwaukee, Wisconsin, spent over Christmas with the J. B. Drom and family.

Mr. and Mrs. J. B. Drom and family of Antioch, Mr. and Mrs. William Prohl of Milwaukee, Wisconsin, were entertained Christmas Day in the W. E. Drom home.

Mr. and Mrs. H. A. Radtke, Mr. and Mrs. Harry Radtke and son, and Morris Radtke spent Christmas Day in the home of Mr. and Mrs. Cavanaugh, Kenosha, Wisconsin.

Mr. and Mrs. Louis Burke are the parents of a baby boy, Philip Michael, born at the Burlington hospital Friday, December 21.

Mrs. M. C. Whitford and daughter, Jeannette left last Tuesday for Lakeland, Florida, to spend the holidays with Mrs. Whitford's mother. Mr. Whitford will join them in February.

C. L. Kutt, director of vocational agriculture at the local high school and Homer Edwards, winner of the cup given by the Farm Bureau for judging in the 4-H class at the local poultry show, spent last Saturday at Chicago taking in the sights at the Cattle and Poultry show and at Field Museum.

Mr. and Mrs. Oscar Dahl, Janesville, Wisconsin, were Christmas day guests at the home of Mr. and Mrs. Walter H. Borman. Mrs. Dahl is Mrs. Borman's sister.

Miss Florence Moore, Galva, accompanied Mr. and Mrs. John Moore on their return here Wednesday.

MILLIONS TIED UP IN ROYAL JEWELS

Costly Gems Used to Bedeck Ruling Monarchs.

Washington—Old Turkish sultans who loved to show upon their graves perhaps would turn over in their graves if they knew that the new Turkish officials were considering the sale of their precious hoards to establish a state bank.

"The Turkish crown jewels, for many years hidden in the green vaults of Constantinople, are among the world's largest collections," says a bulletin from the Washington, D. C. headquarters of the National Geographic society. "The Sultans' throne is of massive beaten gold, studded with diamonds, rubies and emeralds set in mosaic. It has been appraised at more than \$15,000,000."

"Few travelers have ever broken through the section of the treasure room to see the jewels and only lately have photographers been permitted to take pictures of the collection. There is another throne of ebony and sandalwood, inlaid with mother-of-pearl, rubies, emeralds and sapphires; a toilet set thickly studded with turquoise and diamonds; and armor, pistols, saddles, sandals, slippers, turbans, daggers, swords and canes, all bedecked, not to mention the long strands of pearls as large as cherries, rings, bracelets, anklets, and all sorts of other gorgeously designed jewelry for various uses."

"One wonders if the old sultans were thrilled to drink out of the tankard

BOYS OF SUNDAY SCHOOL CLASS ENTERTAINED AT TEACHER'S HOME

Mrs. S. Hoyer Nelson was hostess to the boys of her Sunday School class at her home Thursday evening. After the dinner was served the boys had a wonderful time playing games and making an exchange of gifts. Members of the class are Robert King, Dan Williams, Leonard Kral, Robert Dickson, Robert Borman, Charles Ferris, Billy Wetzel, and Harold Nelson.

Miss Margaret Drom, assistant principal at the Randolph high school, is a holiday guest at the home of her parents, Mr. and Mrs. Wallace Drom, this week.

Mr. and Mrs. Russell Kuhlman were Christmas day guests with the latter's sister, Mrs. Arthur Pitts and husband, in Kenosha.

Mr. and Mrs. George Bartlett and children were Christmas day guests at the home of Mrs. Bartlett's brother, William Johns and family, in Chicago.

Miss Vida Palmer, recent graduate of the Cook Business college, Chicago, is a guest of her parents, Mr. and Mrs. John Palmer this week. Miss Palmer is employed as a secretary by a real estate firm in the city.

Mr. and Mrs. George Rhodes ate Christmas dinner at the home of Mr. Rhodes' parents, Mr. and Mrs. T. G. Rhodes, in Chicago.

Mr. and Mrs. Virgil Felter and Sanford Eddy spent Christmas day with Mrs. Felter's parents, Mr. and Mrs. F. W. Rotnour, in Elgin.

Edward Lynch, who is employed in Chicago, was a Christmas guest here at the home of his parents, Mr. and Mrs. Andrew Lynch.

Miss Ruth Nixon left last Thursday for Bloomington, Illinois, to join her brother, Lester, a student at Illinois Wesleyan, and two friends, Ray and Fern Saylor, the quartet leaving Bloomington Friday afternoon at one o'clock and arriving in West Palm Beach, Florida, at ten o'clock Sunday night at the home of Mr. and Mrs. Edward Bentley where they will spend their holiday vacation. A telegram received here Monday from the Bentleys announced the safe arrival of the party at their home at the time stated.

Miss Esther Stearns departed Monday for Streator, Illinois, where she will be the guest of relatives during the holidays.

H. P. Lowry spent Monday in the city.

Fay Hamilton, Newark, N. J., has been the guest of his sister, Mrs. C. W. Hamilton, at the home of the latter's niece, Mrs. Fred Cribb.

Knox Reeves and daughter, Jane, St. Paul, arrived Sunday for a holiday visit with the former's father, S. H. Reeves.

gloaming with 2000 diamonds, or to stick their hands into a salad bowl containing a half bushel of unset stones or a half peck of buttons studded with diamonds, one of the world's largest emeralds, as large as a man's hand, is included in the collection."

Tears Dazzling Crown.

"Since the Tsar was overthrown the Russian crown jewels now in Moscow, have been in the spotlight with rumors of their sale. Some authorities claim the Russian hoard to be the world's largest. The legend of the Tsar must have dazzled with 32,500 carats of diamonds and rows of pearls at royal functions, when he wore his best headpiece. There are other regal crowns of magnificent filigree work, artistically set with colored stones above a base of expensive fur."

"The famous Shah diamond which formerly hung in front of the peacock throne when it was in possession of the emperor of India, is in the collection and scattered here and there among the gorgeous array are diamonds as big as walnuts, rubies and emeralds as large as pigeon eggs, inlaid golden plates, jeweled wall hangings, robes, swords, scepters, pendants, canes, staffs, religious emblems, tapestries, and what not. The famous Orloff diamond reposes in the hands of Catherine the Great's successor."

"The brightest spot within the grim gray walls of the Tower of London, if not in London itself, is the jewel room where the crown jewels of Great Britain are on exhibition. To reach the large glass case which includes the gems, one has to run the gauntlet of guards from the lovely but ill-fated 'beefeaters' (Yeomen of the guard) to some of the picked guards of the empire. And should a visitor attempt to take one of the gems he likes most he would find that an unseen steel safe would immediately encase the treasures, the door behind him would become fast, and the outer gates of the tower walls would clang shut to avert the escape. Appraisers admit that \$30,000,000 is a low estimate of the value of the royal jewels."

"One of the most striking pieces is Queen Mary's crown. Lying on a white satin pillow, it scintillates with many jewels including the famous Kohinoor (Mountain of light) diamond. Some of the smaller diamonds were cut from the Cullinan, the largest diamond ever found. In the rough it weighed 3104 carats."

"Fortunately, the king wears the crown of England but a few minutes during his coronation ceremony. It is a magnificent creation weighing five pounds—somewhat heavy for comfortable headpiece. Its golden form is nearly hidden by diamonds, rubies and sapphires. The king's crown, of

ATTEND GOLDEN WEDDING AT KENOSHA

Mr. and Mrs. Milton Crandall, Mr. and Mrs. Lester Crandall and Russell Hattel and Miss Esther Barthel were guests of their grandparents, Mr. and Mrs. Charles Barthel, at their golden wedding anniversary Christmas day at Kenosha.

Merrill Sablin and wife of Springfield, were holiday guests with the former's parents, Mr. and Mrs. D. B. Sablin.

Mr. and Mrs. Oliver O. Cubbon, Waukegan, had Christmas dinner with the former's mother, Mrs. Eliza Cubbon, and brother, Herman Cubbon.

Miss Dees Danham, Pittsfield, Illinois, is spending her Christmas vacation in Antioch with her sisters, Mrs. Charles Lux and Mrs. Robert Wilton. Her mother, Mrs. William Danham, also of Pittsfield, has been visiting here for some weeks.

Miss Julia Norton, West De Pere, Wisconsin, is the guest of her sister, Mrs. Alice Regan.

Robert Wilson of Chicago spent Christmas here at the home of Mr. and Mrs. John C. Nixon.

Robert E. Mann and wife and Mr. and Mrs. Joe Haulk ate Christmas dinner at the home of Mr. and Mrs. Stanley Kosurick, Chicago.

"Aunt Sarah" Faulkner was a Christmas day guest of Mr. and Mrs. Lyle Smith at Libertyville.

Prin. L. O. Bright was in Chicago Monday.

lighter weight, contains the black Prince ruby and beneath it 700 diamonds cut from the Cullinan stone. Carpet of Pearls.

"The princes of India have been collecting jewels for thousands of years and among them are some of the most elaborate displays of gems. It was from India that the famous peacock throne was taken to Tehran. Persia Shah Jahan, one of the great Indian moguls, sat on this solid gold four poster seat, disappearing justice. The monarch's back rested against rubies, emeralds and sapphires which under the peacock's tail, while overhead was a pearl-fringed canopy. His chest lidden by ropes of pearls, and his fingers literally wrapped in gold and precious stones."

"The carpet of pearls, in the Nuzerbag palace at Baroda is one of the world famous jeweled creations. It is 8 by 6 feet square. Besides the pearls which form the larger part of the carpet, there are three large diamonds, 32 small diamonds, 1200 rubies and 500 emeralds which form a flower design in the center."

"The Gokulwar of Baroda is said to have the largest collection of pearls and the Maharajah of Indore runs a close second. A royal wedding or state function attended by the Indian princes in their jewels represents many millions of dollars."

CHRISTMAS IN THE CHURCHES
St. Peter's Church

The Christmas High Mass, the most sacred as well as most beautiful of the masses in the church year, was sung in St. Peter's Roman Catholic church by the Reverend Father James Dowd, Rev. Father J. E. Lynch. Seldom is this mass sung outside of the larger population centers where trained choirs are available. Two later masses were sung at which Father Dowd gave the sermon. All three were well attended.

St. Ignatius' Church

St. Nicholas arrived promptly at eight o'clock in the parish hall of the Episcopal church Christmas Eve where the Primary Department were waiting to receive him. The program of carols and recitations afforded much pleasure to the old as well as the young. Gracia Lasco lead in the singing of the Christmas carols. After the festivities all marched into the sanctuary to see the beautiful tableau which represented the origin of the Christmas. The old established custom of celebrating with a midnight mass was followed on the Reverend Campbell Dixon officiating.

Methodist Episcopal

The Methodist church celebrated with two distinct programs. The first was in the form of a Christmas Cantata and story, given Sunday evening. Robert King read the story and the Epworth League sang the interluding carols. The Primary Department, under the direction of Miss Mary Stanley, presented a Chorus Christmas in song and recitations. Miss Ruth Nelson gave two recitations composed by her father, Mr. N. O. Nelson, especially for the occasion. Miss Bernice Jensen gave Miss Dowd's famous poem "Christmas."

On Christmas eve the second half of the program was given. This was a real Santa Claus play for the little

as well as the personal interview with old Santa in his workshop. Together with Mother Goose, Santa built a book of rhymes of the familiar characters known to all of us. At the stroke of twelve he finished his work and started on his travels around the earth. Each child in the school visited with him and received a gift.

Ocean's Treasures

The ocean supplies important amounts of human food of raw materials such as sharks skins, oils from sea animals furs and materials obtainable from seaweed. If the human race were compelled to do so it is probable that practically all our meat supplies could be obtained from the ocean, as well as a considerable part of our vegetable requirements.

Quite Unimportant.

After a college graduate goes forth to conquer the world he has a hard time getting the world to pay any attention to him.—Des Moines Register.

WHAT OF 1929?

MONDAY IS THE LAST DAY of this year.

AS SUCH, IT IS A good day to check up.

HOW FAR HAVE YOU ADVANCED during the present year?

HOW MUCH LARGER is your bank account than it was on January 1st, 1928?

WHAT HAVE YOU to show for your labor? ..

WHAT HAVE YOU bought with your year of time?

CERTAINLY THESE THINGS are worthy of consideration.

YOU HAVE DONE ONE of three things; you have gone forward, you have fallen backward, or you have stood still.

ONLY THE FIRST is commendable.

BUT—A NEW YEAR stands at the threshold!

IT BRINGS YOU FRESH opportunities to advance.

IT BRINGS YOU THE GREATEST of all wealth—a year of time.

WHAT ARE YOU GOING to do with it?

YOU ALONE CAN write the answer.

WE OFFER ONLY ONE suggestion — that you make it a year of systematic saving.

IF YOU DO SO, it should be the most valuable year you have ever spent.

THERE ARE MANY WAYS in which you can save money.

BUT THE BEST AND EASIEST WAY is by means of a Christmas Savings Club in this bank.

THAT WAY IS BEST because it is the most certain.

IT IS THE EASIEST, because it is the way that requires the least sacrifice.

THERE ARE FIVE CHRISTMAS SAVINGS CLUBS open to you. One of the five will exactly fit your needs and your purse.

WHY NOT CELEBRATE the beginning of the New Year by joining the one that best meets your requirements?

IF YOU DO SO, 1929 cannot help being a successful year for YOU.

BUT DON'T DELAY — start the New Year right by joining NOW.

GIGANTIC MERCHANDISE MART TO BE TWICE SIZE OF WORLD'S LARGEST BUSINESS BUILDING

New Project for Chicago's Great Central Market to Cost \$30,000,000—Involves the Greatest Single Development of Air Rights in the West.

Foremost Manufacturers, Wholesalers and Importers Will Be Housed Under One Roof in New Wholesale District; Inbound and Outbound Freight Station on Ground Floor of Building; Club in Tower for Nation's Merchants.

Chicago, (Special).—Chicago is to have a gigantic Merchandise Mart housed in its own building, which will be twice the size of the largest business building in the world. This mammoth structure, two city blocks in length, 18 to 23 stories high, is planned for the service and convenience of merchandise buyers of the United States and to achieve for Chicago a still greater prestige as a Great Central Market. It was declared today. It will cost \$30,000,000. Construction will begin immediately.

The project will be the largest single development of air rights. The property of the new building except for egress begins 23 feet above "datum."

The big business of the country is now done mainly in concentrated market places, as evidenced by the Garment Center and Cotton Goods Center in New York City, automobile rows in all leading cities, financial buildings, and the Furniture Mart in Chicago, where more than 700 furniture manufacturers show their products side by side, in the most modern manner and under ideal conditions. Business men have learned that the nearer they are to the centers of these market places, the greater is their opportunity for volume and profit.

The establishment of the Merchandise Mart is a dramatic development in the program to make Chicago the Great Central Market, a movement which the Chicago Association of Commerce started a number of years ago and a goal toward which it has been devoting its energies continuously ever since, under the leadership of its Foreign and Domestic Commerce committee.

Located on River Front.

This great Mart, which will house sales quarters and merchandise displays of several hundred of the country's foremost manufacturers, wholesalers and importers, will be located in the rapidly developing new river district, and will occupy a distinctly conspicuous position just across the river from Wacker Drive at Wells street, where the southern facade of the structure will be visible for blocks. The site was formerly that of the Chicago and North Western Railway Company's passenger station. The building will extend 724 feet on Kinzie street, 577 feet on the river front and 324 feet on Wells street with a diagonal frontage facing Orleans and Franklin streets. It will be set back from the river about 50 feet to accommodate a broad upper level drive extending from Wells to Franklin. The main entrance of the building will face the river and the drive.

The Merchandise Mart will have a total floor space of about 4,000,000 square feet as compared with slightly less than 2,000,000 square feet, which is the floor area of the Furniture Mart, the next largest building. Each of the eighteen main floors will have an area of more than 200,000 square feet.

Within the walls of this huge edifice the retail merchants of the United States, Canada and foreign countries will be able to see, under one roof, hundreds of lines of the world's best merchandise. The main feature exhibits will include textiles, ready-to-wear, toys, linens, gloves, corsets, millinery, silverware, glass, rugs, knit goods, hosiery, shoes, men's wear, fancy goods, sport goods, art and antiques, jewelry, trunks, toilet articles, home furnishings, office equipment and scores of other merchandise displays.

Ten Largest Business Buildings in the World

Comparison of the cubage of the largest buildings in the world shows the Merchandise Mart, to be erected in Chicago, will be more than twice the size of the largest business building ever constructed. Here are the figures in cubic feet:

1. The Merchandise Mart, 53,000,000.
2. Chicago Furniture Mart, 25,370,000.
3. Equitable Building, New York City, 24,000,000.
4. General Motors, Detroit, 20,411,000.
5. Union Trust, Cleveland, 20,000,000.
6. Railway Exchange, St. Louis, 18,898,000.
7. Illinois Merchants' Bank, Chicago, 17,850,000.
8. Continental & Commercial Bank, Chicago, 13,200,000.
9. Woolworth Building, New York City, 13,200,000.
10. Straus Building, Chicago, 10,000,000.

Among the largest tenants will be the wholesale and manufacturing sales departments of Marshall Field & Company.

Time Saver for Merchants.

Every possible facility will be provided for the comfort and convenience of the retail merchant, who under one roof will be able to see hundreds of lines, thus saving time and money by doing in a few hours what ordinarily would take him days to accomplish.

On all floors of the Mart will be great corridors, with all the appearance of boulevards, more than 1650 feet in length, on either side of which will be the shops displaying their varied lines—veritable "business streets." These great corridors will be impressively treated architecturally and with the large space available it will be possible to house the selling activities and warehousing of many allied concerns on one floor, thus attaining the advantages of concentrated groupings.

The facilities for handling merchandise within the building will embody the best and most modern achievements of engineering science, including fast elevators, freight conveyors of both the gravity and endless chain type and quick horizontal distribution on every floor.

Probably no building in the world will have such facilities for receiving and shipping merchandise as the new Merchandise Mart. The entire ground level below the street floor will be a modern freight station. Private tracks for incoming carload freight will extend under the center of the building. The Chicago and North Western Railway will operate an inbound freight station for less than carload lots, as well as an outbound station, which will connect with all other roads through its new Proviso yards. The merchandise as it comes into this big freight station will be loaded into high speed conveyors and transported immediately to the exact floor and aisle of the merchant for whom it is intended.

Connection will be made with the Illinois Tunnel Company's system of freight transportation, which has more than sixty miles of tracks beneath the streets and buildings of the city reaching all other railroad terminals. A river dock for vessels will connect with the south freight elevators of the building.

Club Planned for Tower.

One of the interesting features planned for the Mart will be a Merchants' Club in the tower of the building, with lounging rooms, reading and smoking rooms, where the retailer may relax and meet his friends. The Mart will provide the retailer with everything but a place to sleep. He can go direct from the train to the Mart with his baggage. Here his hotel reservations will be taken care of, his baggage transported to his hotel and placed in his room. Restaurants, lunch rooms and grills in the Mart will further economize his time. He will have the facilities of a barber shop, and a branch postoffice, telegraph office and public stenographers will afford him the opportunity to handle his correspondence without leaving the building. One of the largest telephone exchanges in the world will be installed in the Mart.

Many other unique features are being considered for the Mart, including an Assembly Hall, where trade meetings, business conferences and fashion shows may be held from time to time. As the plans are worked out, many other features may be decided upon. Within recent years Chicago's central business district has been developing northward across the Chicago river. East of State street, along north Michigan avenue, Cass, Rush and other streets, this development has reached impressive proportions evidenced by more than twenty large buildings. To the west of State street a comparable development is under way. The site of the new Merchandise Mart is in the direct path of this new northward movement.

In the new river district where the Merchandise Mart is to be located many great buildings have been erected, and others soon will be begun. The Builders' Building, the Engineers' Building, the Chicago Evening Post Building, have been completed opposite the new Mart on Wacker Drive. The new Chicago Daily News Building and the great new opera house of the Chicago Civic Opera Company are being constructed on the river, three blocks south.

Can Also Fall Fast.

Airplanes can now cross the country almost as quickly as a funny story. Toledo Blade

The Merchandise Mart of Chicago, Twice the Size of the World's Largest Business Building, to Cost \$30,000,000.

FORMER BRISTOL MAN DIES AT LOS ANGELES

Messages received by relatives announced the death of Edward Stannard, whose demise occurred Saturday at his home in Los Angeles, California. Mr. Stannard was formerly a resident of Bristol and is quite well known in this locality. As a boy he attended the public schools at Bristol.

He is survived by the wife, two small children, also his mother and sister.

BOOSTS 4-H CLUB WORK IN STATE

"The 4-H clubs will gain more well-deserved recognition when county fair officials plan the premium offerings for 1929. If delegates to the fairmen's convention at Jacksonville, January 8 to 10, will heed what C. C. Mast will tell them when he talks on that subject." This is the opinion of the secretary of the Illinois Association of Agricultural Fairs, Stillman J. Stannard, expressed in connection with the announcement of the fair convention program. "Mast," he says, "has helped to make the Quincy fair successful. He shares in the belief that the coming agriculturalists, now in club work and in agricultural classes, need encouragement. If our efforts for the farming industry did not include junior activities, our service for the benefit of coming generations would not be successful. We hope the county fair officials will carry home some constructive plans for the development of junior club departments that will bring about improvement in that important feature of the fairs. Farm advisors and club leaders, in my opinion, will all be willing to cooperate."

Greenwich Clocks.

Probably the most accurate clocks in the world are two at Greenwich observatory. Each is checked every 30 seconds by a pendulum, made of an alloy of steel and nickel called Invar, swinging in a vacuum. A change of temperature of one degree Fahrenheit causes these pendulums to vary, but not more than a three-thousandth of a second in 24 hours.

Busy Times Ahead.

Jones (out for the first time in his new car)—Don't talk for a few moments, my dear. Here is a telegraph code coming.—London Weekly Telegraph

How's Your Noodle?

When is a noodle not a noodle? One answer is that when it does not contain 5 1/2% egg. It is not a noodle at all. Food distributors, called before officials of the Illinois department of agriculture found that out today. No penalty has been imposed, and the noodle supplies will be subjected to a recheck to determine the presence or the absence of the required egg-content.

Another food purveyor called on for hearing it said to have been putting out milk that had evidently passed through one of the state's 156,395 cream separators, emerging through the skim milk spout. The pure food forces strive to see that milk contains its necessary quota of butterfat.

Airplane's Action.

It is possible for an airplane to remain in a stationary position in the air in relation to the ground, but it is not possible for a plane to remain stationary in relation to the air—that is, if an airplane is flying at a rate of 100 miles an hour against a head wind of 100 miles an hour, the speed of the plane would be zero.

Indians Up to Date.

Although the Seminole Indians of the Florida everglades will wear their colorful garments they use sewing machines instead of the old-time hand sewing in making them.

Posies at State Fair Grounds To Be Models

The posies planted in the Illinois State Fairgrounds last season, by floral firms competing or honors in flower bed cultivation, are to serve as models for several county fairs throughout the state. Stress will be laid upon importance of the floral shows at county fairs during the convention of fair officials at Jacksonville, January 8-10. C. R. Keller of Mt. Vernon, has that topic. Fairs held near the larger cities where floral firms abound plan to adopt this innovation, and will lay out grounds or competitive displays. Stillman J. Stannard, secretary of the fairmen's organization, states. This, he adds, will help to beautify the exposition grounds, and give the public a beauty spot in each community that can be enjoyed throughout the summer season.

Friend Nature.

If nature is so willing to help when real troubles face us, we can surely count on her when minor cares and disappointments come.—American Magazine

Real Name of Flag.

Strictly speaking, the designation "The American Flag" is not correct as there does not legally exist such an emblem. Congress has always referred to the national flag as "The Flag of the United States."

WORK AND SPEND
That is the advice Henry Ford gives to every youth—every boy in Antioch, in Illinois, in the country, and in the world. "Work and Save," reads the old maxim of the Methodists and Presbyterians, and to this maxim Henry Ford promptly replies: "Blah!"

"You often hear advice given to young boys that to succeed they must work and save their money," Mr. Ford said recently. "This is purely wrong. No successful boy ever saved money. They spent it as fast as they could for things to improve themselves."

As a case in point, he mentioned Thomas Edison as never having "any money until he got so much he could never live in work."

"Install in the minds of the young men that they will never get anywhere without work," he said. "I never knew a young man that was worth five cents that wouldn't work and even occasionally get into trouble in his efforts to learn."

And isn't Mr. Ford right? Isn't there more than a grain of truth in what he says?

WOMAN IS HEROINE
The little town of Raymond, California, existent since the early gold mining days, has had many experiences, but never one such as it passed through last summer. At about 10 o'clock one morning, Miss Pauline Prosser, telephone operator, answered an excited subscriber's signal and was informed that a brush and forest fire had broken out a few miles away and that help was urgently needed. Realizing the dry and parched condition of the foliage, and the imminent danger, not only to the surrounding country but to the town of Raymond which lay directly in the pathway of the flames, she began telephoning the news of the fire to the leading men of the community, urging them to rush to the aid of the town. While families were frantically moving their movable household effects into automobiles and trucks, the telephone operator stuck to her post, although by then she was scarcely able to see her switchboard, owing to the dense smoke.

She remained at the post while the flames crept nearer and nearer until they were within a few hundred feet of the telephone office, when the wind suddenly died down and the danger was soon passed. Through her bravery, however, in sticking to her post and helping direct the fire-fighters in their efforts as the flames broke out in various sections, the town of Raymond was saved.

TOO MANY RATES
Chicago, home of its great wealth and scurrilous people all complain of innumerable assessments, taxes, and tax levies, and some of them try to prevent the state tax commission. Some of its most prominent officials came to the Twenty-first General Assembly and obtained legislation to raise the property assessment from 50 per cent to 100 per cent of the true value; and now they seem to be scared stiff for fear the assessed value will be set as high as 150 per cent of the true value.

These same officials deplore the shortage of duration in the tax rate for the building fund. They declare that this tax rate should be used for something else, and that bonds should be issued to build schools, so as to increase taxes, evidently believing that both the bonds and the interest can be paid off without taxation. Verily, the reasoning processes of the Chicago politicians are dubious and uncertain.

But one thing is certain: when the legislature meets next month, numerous bills will be introduced to "relieve" the revenue situation in Chicago, and their need of such legislation, while in fact there are many school districts in much worse financial straits than the

district of Chicago. Some of them have much shorter school terms, cheaper teachers, worse crowded rooms, and poorer equipment. Some of them have less than one-eighth the amount of taxable property per pupil, are deeper in debt, and levy much higher taxes, but they don't make so much noise about it.

The danger is that the legislature will attempt to solve the school revenue problem by "patchwork" legislation—that is, to solve the problem in one district in one way and in another district in another way or not at all. What is needed is a uniform system of local assessments and rates and a uniform state tax to produce a large state school fund for equalization purposes.

In fact Illinois has already gone too far in differentiating the tax limitations of school districts. There are four classes of districts in regard to school tax rates, and one class may levy a rate twice as high as another class. But low rates permit and cause low assessments, and high rates permit and cause low assessments. Lack of uniformity in one of these factors causes lack of uniformity in the other. Therefore, the problem of providing equality of educational opportunity for the children and uniformity of taxation for the tax-payers throughout the state.

GOVERNMENT AS JOB PRINTER
Uncle Sam does the biggest business in the world as a job printer, by selling stamped envelopes and printing the return addresses on them, in small or large quantities.

The country newspaper and job printing offices have always protested against this as unfair competition on the part of Uncle Sam, and as taking away a large source of revenue from the smaller printing establishments in the country towns and smaller cities. The National Editorial Association has sent out from the National office at St. Paul, Minnesota, a bulletin which reviews this subject and concludes by saying:

"The N. E. A. will continue the fight against unfair government competition by appealing to Congress for relief."

PROTECTING THE INVESTOR
In summing up the Nation's business in 1928, which sets a new record for volume, the American Bankers Association Journal says an auspicious beginning is set for the new year by conditions at the close of 1928.

"As regards speculation on the stock exchange," conservative bankers and brokers have raised margin requirements and repeated warnings against excessive trading. Along with improvements in industrial production methods the nation has been benefited by just as great improvements in its financial structure. The Federal reserve system strengthens our banking system, while modern stock and bond exchanges have built up sound practices in security buying and selling.

During the past several years the public, knowing little about securities or their actual values, has rushed headlong into an orgy of speculative buying where speculation and greed have been the only motives. Recognizing this country and protect it from its own lack of experience in the field of finance, stock exchanges, their broker men, and gamblers have exerted every effort to curb speculation and afford to take chances.

In the old days speculative traders' securities were commonly purchased by putting up a small percentage of the purchase price known as a "margin." If the price total loss, during the past few years reputable brokers of New York, San Francisco, Los Angeles, Chicago, Boston and other stock exchanges have been and imposing other safeguards, to protect their customers and speculators who cannot afford to lose. This has when the market takes a drop like it did recently. As to sell but can await a revival in prices. Thus a panic is undoubtedly averted.

Securities are like any other commodity and subject to the law of supply and demand. If dumped, cause margins are insufficient to cover drop in prices, the resulting loss is as disastrous as occurs when a crop is dumped through inability of producers to hold members and bankers to stabilize the financial practices of the nation, deserves unqualified commendation.

LAKE VILLA
Mr. and Mrs. William Weber, Jr., returned home last week Tuesday a two months trip to California. They report a pleasant journey.

Raymond Huxley, 4 hours from the Todd school at Woodstock for the holidays.

Miss Pansy Russell started Friday evening for her home in Northern Wisconsin, where she will spend the holidays with her parents. She teachers the Cedar Lake school and it will be closed until January 7.

William Schwank is home for the holiday vacation from his studies at the U. of Illinois. He is at the C. H. Hamlin home.

Rev. Mr. Alsbaugh is enjoying his holiday vacation with his family at the parsonage.

Miss Myrtle Dughe is doing as well as possible at the Lake county hospital, but will be there for a number of weeks yet.

Miss Ruby Faich was a Waukegan visitor Saturday.

Mr. and Mrs. Frank Nader entertained their family, the Joe Nader family, Mr. and Mrs. Henry Nader, Mr. and Mrs. Fred Hamlin, Mr. and Mrs. John Nader at a Christmas dinner.

Mrs. Paul Avery entertained a few ladies at a luncheon Friday to celebrate her birthday.

Mrs. Leo Barnstable entertained the Bridge club at her home Thursday and Mrs. Paul Avery was awarded first prize and Mrs. Fred Hamlin the consolation.

Mrs. Mabelle Pibble was hostess for the Buick club at her home west of town last week Thursday.

Mrs. Valle Weber was called to Oak Park last Friday by her sister's serious illness. She was very ill with appendicitis and an immediate operation was necessary.

Roy Nader, who is stationed near St. Louis, in the U. S. Aviation corps, was home for Christmas, the first holiday home since his enlistment three months ago.

Howard Sherwood submitted to an operation for the removal of his tonsils and adenoids Saturday.

Mr. and Mrs. Harold Cribb, Waukegon, spent Christmas day with the J. K. Cribb family.

Mrs. Swanson attended a birthday party in Waukegon last Tuesday evening.

Miss Freund of the Avery company spent Christmas with her family at McHenry.

Steve Hurdish is ready for his winter vacation and spent Monday and Tuesday in Chicago. Later he will go to Florida and perhaps Cuba for a few months.

Mr. and Mrs. Frank Wood entertained relatives at a family dinner Christmas day.

Mr. and Mrs. Paul Avery spent Sunday with Mr. and Mrs. W. B. Smith in Waukegon.

Miss Laura Holtsbach, Chicago, was out over Sunday with her brother's family here.

BOY GETS FIRST CHANCE TO PLAY
Taken From Father Who Kept Him Prisoner.

Memphis, Tenn.—Woodrow Wilson, eleven, experienced more thrills in one afternoon than most people do in a year.

For the first time in his life he went swimming, saw a circus, visited a park and the zoo, and saw his first other animals. All in one glorious afternoon.

Woodrow is a healthy, robust youngster for his age, and has the mentality of the average boy of sixteen. He is keen in every way and always has been.

Yet since he was a baby he has watched other children play from the window of his home where he was held captive by his father, J. H. Wilson, seventy-four years old.

His mother died when he was a baby and his aged father had kept him closed up in their home, except for school hours, and he was escorted to and from school directly. He was never allowed to go out and play with other boys and girls.

Recently he broke a rule of his father's by going out into the yard to play. Neighbors complained to police that Wilson beat the child with his fists.

Woodrow was brought into juvenile court and taken from the custody of his father. Now almost every civic organization in Memphis is vying for the opportunity to "show him the town."

snapping at the bushes on his tiny perch, then remembered a fellow over at the fire station who could make friends with dogs by talking nice to them.

Firemen Come With Ropes.
The firemen came with ropes and hooks, but of North Bergen following behind. Fred Stockfish took one look over the cliff and began tying a rope around his waist. He recognized his friend, Two of his buddies lowered away and the fireman hung feet first, looking downward 300 feet. He saw as he neared the ledge, a crazed dog snapping viciously at everything in sight.

Hum, his teeth bared, jumped at the fireman as his shoes touched the ledge, but the snarl died in the dog's throat when Stockfish spoke. Then the fireman told the alreble in pairs and words that everything was all right and Hum came up as calmly as a puppy.

"Fred's got a way with dogs," grinned the fat cop, as Hum darted away and the crowd started shaking hands with Stockfish.

Interior Decorating.
The modern rule in interior decorating seems to be: Never start anything you cannot refinish.—St. Louis Post Dispatch

Seal Attacks Stroller Along Scottish Coast
Edinburgh.—A seal attacked a stroller who came across it resting on the beach at Banff. The animal emitted a growl and snarled at the man's leg. It then leaped forward and seized with its mouth a shovel the man was carrying. A number of people gathered, and together they stunned the animal and threw it back into the water. It was four feet long and weighed about 200 pounds.

Father Dies as Girls Run Two Miles for Aid
York, Pa.—Two girls, one eleven, and the other but eight, ran two miles to their home to tell their mother that their father was pinned under his truck. The girls were thrown clear of the truck when it overturned after their father, Oliver C. Curran, Brogueville postmaster, lost control of it. The truck fell on Curran. Curran was dead when neighbors arrived.

Edinburgh.—A seal attacked a stroller who came across it resting on the beach at Banff. The animal emitted a growl and snarled at the man's leg. It then leaped forward and seized with its mouth a shovel the man was carrying. A number of people gathered, and together they stunned the animal and threw it back into the water. It was four feet long and weighed about 200 pounds.

Father Dies as Girls Run Two Miles for Aid
York, Pa.—Two girls, one eleven, and the other but eight, ran two miles to their home to tell their mother that their father was pinned under his truck. The girls were thrown clear of the truck when it overturned after their father, Oliver C. Curran, Brogueville postmaster, lost control of it. The truck fell on Curran. Curran was dead when neighbors arrived.

Cork Leg Saves Vet in Ocean Death Leap

Philadelphia.—How a cork leg kept Bruce McQuillen, forty-three, a World War veteran, afloat after an alleged suicide leap in midocean from the transport liner Samaria was learned by friends of McQuillen and his father, Dr. Daniel Neill McQuillen, Philadelphia dentist.

McQuillen, who was on his way to Europe with his father and some friends, was rescued when a boat was lowered from the liner. Later he slashed his wrists, and because of his condition the party abandoned the proposed European tour and remained aboard the Samaria for the return voyage.

According to Doctor McQuillen, his son has been despondent because of his wounds.

TEACHERS' ANNUAL MEETING PLANNED FOR THIS MONTH

Reports of Sessions Will Be Watched With Great Interest.

The Illinois State Teachers' association will hold its seventy-fifth annual meeting in Springfield, Thursday to Saturday, December 27-29. Since this is a state meeting and will discuss educational improvements of statewide application, its proceedings will be of interest not only to all teachers but also to the general public.

The president this year is Mrs. Fannie Spauls Merwin, a rural school teacher in Mason county, who has served also as county superintendent of that county, as instructor at the State Normal university, and as lecturer at many county institutes. She is the third woman to be president of the State Teachers' association.

The visiting speakers engaged are Nellie Taylor Ross, ex-governor of Wyoming; the Rev. Samuel W. Graf, Religious and Industrial Director of the West Side, New York, Y. M. C. A.; and Tom Skyehill, Australian soldier, poet, world traveler and adventurer.

The meeting is open to all members of the association, but the business will be transacted by delegates representing the 34,000 members in the several local divisions. These delegates constitute the "Representative Assembly," which will hear and act upon the reports and recommendations of the officers and committees. The officers to report are: President Fannie S. Merwin, Secretary Robert C. Moore, Research Director, Lester R. Grimm, and Treasurer Charles McIntosh. Among the committees to report are those on appropriations, legislation, resolutions, teacher training, state school fund, pension and retirement funds. Besides the lectures and regular business features, there will be luncheons, dinners, and conferences by special groups, and several delightful social features.

Since the reports of the officers and committees will deal with several important and unsolved problems of education and school finance, and since the fifty-sixth General Assembly convenes a few days later, the decisions made and the action taken at this meeting will be watched with interest by teachers, by the members of the legislature, and by the general public.

Frogs Keep Starving Gold Searcher Alive

The Pns. Man.—After being lost for 48 days in the North country and living on frogs and dead fish, Andy Taylor, prospector, came back to civilization—in rags and so weak from starvation that he could hardly walk. He came back in an airplane and with him his friend, Fred Coleman, Ontario prospector, who refused to believe he was dead, stayed on the ground and kept up the search long after everybody else had quit, and finally found him.

The plane was piloted by Captain Kenyon, Western Airways pilot, who flew to Burntwood to get them.

When Coleman found him, Taylor was at the point of giving up the fight. His shoes were worn out, and he had wrapped pieces of his inner clothing about his bleeding feet. For days, he said, he had been able to walk only about 50 or 100 feet before falling down exhausted. A seven weeks' beard covered his pale, gaunt face.

He was tottering aimlessly along through the brush when Coleman, who had followed every claw and stick to the trail, found him.

Taylor was too weak to talk much out—he could grin.

Fears New Gas Stove, Commits Suicide by It

New Orleans.—An obsession fear that the jets of a new gas stove installed in his home would some day be left open and the family killed, drove Mike Stemp, fifty-six, to take his own life, by the very means he feared.

For two weeks the idea had haunted him, and he repeatedly warned his wife to take strict care to turn off the stove. He even had his bed removed to the farthest corner of the house to be away from it.

One night he awoke in a fright and declared the stove was leaking. The jets were found safely closed.

The next night his wife and two daughters, Florence, eleven, and Esther, fifteen, left him alone in the house. They returned to find him slumped over the open jets of the stove, dead, in the gas-filled house.

Lives Through Ordeal

Owosso, Mich.—Gen. Miller, eighty years old, inmate of the county farm in recovering from the effects of hanging head downward for 12 hours. His foot caught in a high wire fence while climbing over it and he was unable to release himself. He was in a semi-conscious condition when found by a farmer.

Wilmot Pirates are Noted for Sportsmanship

McDougall, H. Richter, Herrick, N. Richter, Richards, Gegan, Frank, Schnurr, G. Richter.

Strictly amateur and playing for the fun of the game, the Wilmot Pirates have gained an enviable reputation for ability and sportsmanship in the basketball world. And can they play? Man, and how! No financial remuneration ever adds to the glory of clean-cut victory nor

assuages the sting of defeat.

The Wilmot Pirate basketball team may be correctly designated as "all-star." Their record last year of 37 games won and five lost would prove that claim. The Pirates won the Tri-county championship at the Racine tournament, and all but won the

state amateur championship, being defeated by the Olson Food team in a close game in the state tourney. Thus far this season the Pirates have won 8 of their contests and lost two, scoring 51 points in their opponents' 16.

The Pirates' next game will be with

the McHenry team, at McHenry, next Sunday afternoon at two p. m. This will be a double-header and will be played at the McHenry high school gym. No need of spending a dull Sunday afternoon—just watch for announcement of games to be played by the Wilmot Pirates, then see them in action.

WILMOT NEWS

WILMOT PIRATES DEFEATED

The Wilmot Pirates lost to McHenry Sunday 29 to 20. The game was a see-saw affair during the first half, the teams exchanging the lead at various intervals. McHenry started with a spurt in the second half and were never headed during the rest of the contest. With four minutes to go the Pirates trailed by only two points, 21 to 19, but could not close up the gap during the remainder of the game. Shubert Frank was the high point man of the game, with six baskets and two free throws for a total of 14 points. For McHenry Fay was the outstanding scorer with five baskets and two free throws. Conway's play at guard also featured for McHenry.

The Pirate second team defeated the McHenry seconds 23 to 21, in a game that was exciting at all times. The score was close during the entire contest and both the teams played excellent basketball. The Pirate Seconds showed a scoring consistency with Lyle McDougall and George Richter hitting the hoop with regularity from all parts of the floor.

Next Sunday the Pirate first and second teams travel to McHenry to meet those teams on their own floors.

Mr. and Mrs. T. C. Loftus entertained at a family dinner Christmas day.

Mr. and Mrs. Ludwig and Mary Daly, Silverlake, had Christmas dinner with Mrs. James Carey.

Miss Claire Rauen spent over the end of the week and Christmas at her home at Spring Grove, Ill.

Mr. and Mrs. Richard Barton, Richmond, were Sunday visitors at the Louis Hegeman home.

Martin Anderson and Mr. Werve of Kenosha were callers at the William Volbrecht home Saturday.

There will be English services with communion at the Lutheran church next Sunday at 10:30. Monday night, New Year's eve, there will be English services at 7:30, and New Year's day there will be German services at 10:30 o'clock.

Rev. and Mrs. Jodela, Rhoda and Norman were Christmas dinner guests of Mr. and Mrs. Henry Pape, Channah Lake.

The many friends of Mrs. William Volbrecht will be glad to know that she is recovering nicely from her recent illness.

Mr. and Mrs. O. C. Mathews, Antioch, and Mr. and Mrs. Edwin Bolden and daughter, Lorraine, Chicago visited with Mrs. Sarah Bolden and Mary, Sunday.

Mr. and Mrs. Charles Kanis and family were Sunday dinner guests of Mr. and Mrs. Alvin Holdorf.

Esther Kanis is home from Union Grove for the Christmas holidays.

Mr. and Mrs. Wilbur Lewis were Sunday guests of Mr. and Mrs. Frank Burroughs.

VACATION REVERIES

(James Jensen Burnskow, who has a cottage in Cross Lake subdivision, but who makes his winter home in Chicago, sends the following poem as he thinks back over the summer's pleasure of liquor so hard—though not so hard—and of poker players even smarter than those in the "city.")

It is raining on the cottage at Antioch,

And evening is growing nigh.

I am sitting by a kerosene lamp with a book

—Now and then swatting a fly.

Through the kitchen door comes an odor of soup,

And a pitter-patter of feet

Which promises soon I shall join the group

On an invitation to eat.

Me thinks—from the chatter of passers-by

The rain must have ceased a little,

A cricket in a corner that managed to keep dry

Is merrily playing his fiddle.

A summer cottage is a lot of fun.

For only a few hundred dollars at stake

One can work and swear in a burning sun

A couple of miles from the lake.

Where else is the moon so round and big.

The bedspreads and liquor so hard,

The bread so dry, the Bolognese so thick,

Or the pokerplayers so smart?

There was never a place you had rather leave

Nor one you had rather see

At week-end times when drowning your grief

With a bit of frolicking glee.

Though traveling the highways is quite a test,

Just think what a time one has

Putting the nomadic urge to rest

By burning the midnight gas!

James Jensen Burnskow.

were Sunday dinner guests of Mr. and Mrs. Arthur Holdorf.

Mrs. Winn is spending the Christmas holidays with her mother in Des Moines, Iowa.

The Methodist Christmas program was held Sunday evening. Santa Claus was present to the delight of the children and he distributed many lovely gifts.

Mr. and Mrs. Ray Kinreed, Helvidere, spent Sunday with Mr. and Mrs. Alfred Reynolds.

Mrs. Harry McDougall and Lyle motored to Milwaukee Monday.

Mr. and Mrs. Alfred Reynolds spent Christmas day with Mr. and Mrs. W. Peterson in Kenosha.

Mrs. Ross Schenning and family were Sunday callers at the John Nett home.

Mr. and Mrs. A. C. Stoxen and Mr. and Mrs. Raymond Stoxen were dinner guests Sunday of Mr. and Mrs. Austin Stoxen.

Charles Simon spent Sunday at the Gny Loftus home.

Mr. and Mrs. James Buckley and daughters are spending the Christmas holidays in Kaukaee.

Mrs. Anderson and children, Kenosha are visiting at the Scholda home.

Mr. and Mrs. Lynn Sherman entertained the Sherman family and Mr.

and Mrs. Earl Taylor Genoa, for dinner Sunday.

Mr. and Mrs. Arthur Kimball spent Christmas day at the home of Mr. Kimball's parents in Genoa City.

Mr. and Mrs. Richard Ostoby, Spring Grove, called Wednesday at the William Volbrecht home.

Inoculation of Suckling Pigs

More Care Is Required Than When Same Treatment Is Given Older Hogs.

(Prepared by the United States Department of Agriculture.)

Advisability and economy of immunization of suckling pigs against hog cholera and the discrimination required in inoculation of young pigs form part of the new material included in the revised edition of Farmers' Bulletin No. 844-F, Hog Cholera, which the United States Department of Agriculture has just published. "Although it has been repeatedly shown that very young pigs can be given lasting immunity by the simultaneous inoculation with anthrax cholera serum and hog cholera virus," say the authors, M. Dorset and U. G. Honck of the bureau of animal industry, "it is probably also true that more careful discrimination is required than when the same treatment is applied to older hogs. This is because of the fact that young pigs are susceptible to many diseases and are more easily affected by adverse conditions than older hogs. In administering the simultaneous inoculation to young pigs it is, therefore, especially important to be sure that they are in good health at the time of inoculation. If pigs are afflicted with parasitic infection, or, in fact, from any cause, if they show signs of illness or other abnormal conditions, the simultaneous inoculation should be postponed until they are restored to complete health. In urgent cases in which pigs must be immunized immediately, it is better to use serum alone if the pigs are not in good condition at the time. They can be given the simultaneous inoculation at a later date.

Pigs Protected Sooner. "The immunization of suckling pigs has much to recommend it in the way of decreased cost and increased protection. By immunizing early, less serum is required and the pigs are protected sooner. Since the successful immunization of suckling pigs does not necessitate the reduction of feed, it is possible that the practice would enable farmers to market their pigs somewhat earlier than if the immunization were carried out after weaning."

Also new in the revised edition is the paragraph on the period of incubation, reporting tests conducted by the bureau of animal industry. Virus was injected into 171 sows and the time noted until the appearance of visible symptoms, the shortest time being 3 days and the longest 7 days with 65 per cent of the experimental animals showing symptoms on the fourth, fifth or sixth day.

Other tests have added evidence that no breed of hogs is immune to cholera, although there is a considerable difference in the degree of susceptibility in individuals. The bulletin gives careful descriptions of the symptoms of cholera, together with mention that some other diseases may have somewhat similar symptoms. Coupled with this is the warning that owners should remember that cholera spreads rapidly through a herd and no time should be lost in calling a veterinarian to diagnose the disease and administer proper treatment. If the disease is cholera heavy losses can be averted only by prompt immunization of the herd. "In case of doubt it is well to kill a sick hog and check up with the effects on the internal organs which are described in detail.

Source of Infection. A stream running through a hog lot is recognized as a valuable source of water supply, but also as a dangerous source of infection. "Therefore," the authors say, "swine confined to lots or pastures with streams running through them should be immunized."

Farmers' Bulletin 844-F, in the revised edition, gives recent statistics of the losses from hog cholera, which have averaged not less than \$30,000,000 a year for forty years, explains the cause, describes the symptoms and differentiates between symptoms of other diseases, describes some of the ways in which cholera is spread, recommends sanitary preventives, and prevents by immunization. It explains briefly the manufacture of the serum and the virus, and their administration to individual pigs and to

herds, and the aftercare of immunized animals. Several new paragraphs discuss what is known of "breaks" in immunity. Experimental figures are cited to indicate that fear of an infectious effect by the serum on the fertility of sows is groundless, and that the danger of causing abortion in pregnant sows is inconceivable, except when farrowing time is near. Suggestions for restocking a farm after an outbreak of cholera are given in detail, and farmers are warned against so-called "drug remedies" to cure or prevent cholera. None of these has proved useful or effective. Farmers' Bulletin No. 844-F may be obtained free on application to the Department of Agriculture, Washington, D. C.

Electors To Meet At Springfield January 2

Presidential electors from Illinois will meet at the state house at 10 o'clock Wednesday morning, January 2, to cast their vote for Herbert Hoover, Republican nominee for president. The date is fixed by federal statute, but the twenty-nine electors will have no difficult task to perform.

After the vote has been cast and the details completed, copies will be forwarded to Washington under the provisions of a new federal statute, which relieves states of the duty of sending the vote by special messenger.

The proclamation has been prepared and has been signed by Governor Small and Secretary of State Emerson, two members of the canvassing board. The signatures of Treasurer Garrett D. Kinney and State Auditor Oscar Nelson have been affixed and all will be in readiness for the meeting of the electors. Names of the twenty-nine from Illinois who will cast the official vote for President-Elect Hoover did not appear on the ballot.

State's Finest Dairy Cattle To Be Seen At Fair

Guernsey, Jersey and Holstein cattle owners in Morgan and surrounding counties will be grooming their best specimens for entrance in the dairy cattle show at Jacksonville, January 28-31, in connection with the state dairymen's convention. Prof. R. E. Muckelroy, of Carbondale, dean of the college of agriculture, Southern Illinois Normal University, will place awards. Prof. R. E. Caldwell, formerly in charge of dairy husbandry at Purdue, will give a cow-judging demonstration for the benefit of agricultural student judging teams from high schools, competing for prizes in the art of judging dairy cattle. This feature of the annual convention, in charge of J. E. Hill, state supervisor of agricultural education, and his assistant, Frank G. Makepeace, is considered by the dairy promotion leaders as one of the most constructive departments of this yearly meeting. A silver cup goes to the team that scores highest. In addition, cash prizes and ribbons are provided for the students placing as individuals. Schools sending teams that place as good as fifth set premiums. Jacksonville Chamber of Commerce offers liberal premiums for the exhibition cattle. They expect to draw the best within a radius of several counties. Prizes are open to the customary age classes, with the usual herd premiums and championships of both sexes in each of the three dairy breeds.

Can This Be True?

Walter R. Kinney, head of the division of foods and dairies in the Illinois department of agriculture, sees indications of prosperity in the scarcity of checks that bounce. "Some weeks ago," Kinney relates, "our office turned 6,000 separate checks into the state treasury. They had been collected in license fees from dealers who buy eggs. Out of the entire 6,000, one was held up because the man that signed it died before we made deposit. Two checks came back stamped 'Insufficient Funds.' The other 5,997 checks were perfectly good. Tie that."

CHARITY FIGHT CARD AT PALACE IS ENTERTAINING

Giving way to the charity boxing show, the Lake county amateur championship series now in progress at the Antioch Palace was postponed for one week and the boys of the boxing fraternity, the referee and Dick Macek donated their services and the proceeds of the show last Friday night to aid needy families at Christmas time. The proceeds were turned over to the Waukegan Daily News to aid the basket fund sponsored by that newspaper.

Some old veterans of the game stepped into the ring and staged hard battles to help out with the benefit show. The card was pronounced entertaining by those who braved the zero blasts, and quite a large number attended in spite of the cold weather and the many counter attractions.

Mixed Bouts Entertain. In one of the strangest bouts ever seen at the Palace Joe Little won the "countable championship" of Lake county and Francis Beckman won the constable wrestling title. Little, one time contender for the world's fly weight title, donned the gloves for the first time in many years, Beckman appearing against him in the first fight of his career. The affair turned out to be a comic battle, half boxing and half wrestling and the referee resigned himself to refereeing just that kind of bout. The fans got great amusement out of the three round struggle.

McMullen Wins. Mac McMullen, Waukegan, won over Fritz Behrens, Lake Forest, in the windup event. Mac was defeated by Behrens at Highland Park a few weeks ago, but Friday night Mac overcame the score when he won by a small margin.

Lon Stanley, who was said to be out of training, lost the decision to George Taylor, colored.

Felix Draba, Waukegan lifeguard, won the light-heavy scrap over Jerry Held in three rounds.

Howard O'Hara beat Tex Freeland, a novice at the game. Freeland displayed great courage in his first ring encounter.

Kraft Gets Award. The best bout of the show was the three round slug fest between Howard Kraft and Billy Campbell. There was real action throughout the three rounds. Kraft was presented with an award of five dollars offered for the batter who gave the best exhibition during the benefit show.

After lighting even for two rounds Herb Simmons defeated Hugh Campbell by his aggressive tactics and effective fighting in the final session.

Wallenwein Referees. Heine Wallenwein had a three-way job Friday night, for in the absence of "Jabber" Young, Heine acted as matchmaker, announcer and referee. Quite a busy evening for the Lieutenant.

On Friday night, January 11, the regular elimination bouts to decide Lake county amateur champions will be resumed at the Palace. Seven or eight good bouts are on the card.

Uncle Eben.

"De science folks say dar is bigger runs out in space dan de one we does business wit," said Uncle Eben. "After dat hot summer all I asks is dat dey keeps deir distance."—Washington Star.

Naturally Has Suspensions.

A man naturally has his suspensions about a woman who isn't afraid of a mouse.—New York American

Antioch Wins Two Games--Palatine and Waukegan Succumb

In a rather slow game of basketball, Antioch continued her string of victories by taking the Waukegan second heavies into camp to the tune of 22 to 8, Saturday night.

Antioch intercepted a great number of Waukegan passes and took them down the floor in a rapid passing game but were unable to connect consistently with the basket. Harman was the outstanding man for Waukegan. He has been playing as a regular for Waukegan in the last few games. He was able to elude the Antioch guards for two baskets, one a long one and the other a sucker shot with Steininger and Murrie piled up in the center of the floor. These guards however worked nicely all the rest of the game.

Dick Polbrick was unable to get into the game until the last quarter and arrived in time to make three baskets.

Jack Morley's Freshmen won an easy victory over the Antioch ponies.

Beats Palatine in Rough Game. The game at Palatine Friday night was rather a rough affair, and no love was lost on either side. Antioch had two removed from the game for fouls and Palatine had one sent out for the same reason. Antioch won 26 to 11.

Neither team seemed to have a style of play sufficiently perfected to lure the opponents, consequently there was much personal contact. Antioch is learning an offensive somewhat different from preceding years and it will take some time to attain the proper smoothness in its execution. The rough spots will be worn off gradually as the boys become familiar with the system.

Palatine has a beautiful new gym and will hold the preliminaries for the conference tournament. They have the new "Box-on-end" floor which is so popular. It is supposed that it is almost impossible to slip on this floor but it seemed to be quite oily and much slipping and sliding took place. The trip was made in a North Shore parlor bus.

The second team won easily from the Palatine lights.

Small Administration Receives Last Road Bids

Bids for the construction of paving sections in Illinois together with grading and bridge work, were received a few days ago by the state division of highways. The letting was the last under the present administration and when the contracts are awarded will mark the end of the available money from the bonds which have been sold out of the \$100,000,000 bond issue. Only twenty-three millions of the bonds remain unsold.

Bids for grading sections were received for work in Platt, Stark, Macomb, Greene, Montgomery, White, Gallatin, and Bureau counties.

Bridge sections on which bids were received are in Lake, Carroll, Stark, Bureau, Marshall, Henderson, and Cook counties.

Postman Has to Swim.

Probably the only place where the postman swim with the letters is the small island of Ninatu of the Tonga group of the south Pacific. The island is completely surrounded by dangerous ocean currents, and it is impossible for a boat of any size to make a near approach.

An Outrage.

Having to stay at home outrages a man, but not like coming home and finding his wife isn't there.—Los Angeles Times

WALTER STICKLES DIES AT SON'S HOME

Wife Of Former Resident Passed Away Six Weeks Ago.

Walter Stickles, well known former resident of Antioch, died this morning at six o'clock at the home of his son, Elmer, in Grayslake, after a week of illness. His wife died six weeks ago.

Mr. Stickles lived with his family in Antioch for many years, leaving here several years ago to make his home in Bangor, Michigan. He is survived by three sons, Elmer, Grayslake, and Eugene and Alfred, Bangor, Michigan.

Funeral services will be held at the son's home in Grayslake Saturday afternoon at two o'clock and interment will be in Hillside cemetery, Antioch.

Illinois Fruit And Vegetable Inspection Is On The Increase

Fruit and vegetable inspection at the points of origin in Illinois where by shippers obtain official certificates of the grade and quality of the products for the market is increasing. Records in the Springfield office of the division of standardization and markets, Illinois department of agriculture, through which this work is carried on, show that there were 563 certificates issued for as many cars of perishable commodities.

Going back to the origin of this service, in 1923, it is found that only 111 cars of peaches and apples were inspected during the initial season. Now, the range of products has expanded to include pears, strawberries, cabbage, potatoes, tomatoes, raspberries and spinach.

Illinois Construction Shows Great Increase

The total volume of construction started in Illinois from January 1 through December 7 of this year, amounting to \$805,480,100, shows an increase of almost \$30,000,000, or 4 per cent over the amount of new construction started during the year 1927, according to the F. W. Dodge corporation. Included in the above figure were \$512,018,800 worth of new construction contracted for in the city of Chicago. Chicago's total up to December 7 of this year shows a gain of more than \$10,000,000 over the total for the entire year 1927.

The Difference Between the Cost of Good and Cheap Printing

It is so slight that he who sees shopping from printer to printer to secure his printing at a few cents less than what it is really worth hardly ever makes day laborer wages at this unpleasant task.

If you want good work at prices that are right, get your job printing

At This Office

RAINS DELAY CORN HARVEST

Three-fourths of the corn crop in Illinois had been gathered in November, although the work was delayed by wet weather and muddy fields, as shown by the weather summary of the state for the month, prepared by Clarence J. Hood, meteorologist of the United States weather bureau, Springfield. Winter wheat made great progress and its condition was good to excellent, the report says.

Part of the summary was as follows:

"The month was cloudy and rainy, with light snowfall, the precipitation being heavy in the northern and western portions of the state. Comparing it with other November, we find the absolute temperature range was the least of records. The number of cloudy days was exceeded in 1927 only and the number of rainy days not at all. Some farm lands were inundated. No storm damage was reported during the month."

Name Now Seldom Used.

Helvetia is the old Roman name for what corresponds to the modern Switzerland, and the name is still used in poetic references to that country.

Just Wooley.

Romance is not dead. It is just a trifle dizzy from watching the other emotions move so fast.—Bangor Commercial

NO. 20

The G. R. Kinney Co., Inc.

5620 Sixth Ave.—Kenosha—Phone 2-2241

When purchasing shoes, and if you desire the best, be sure to get them at Kinney's Shoe Store in Kenosha. The fact that the G. R. Kinney Co., Inc., sells shoes of the most modern style at such reasonable prices has been the talk of the entire countryside and has brought them a patronage from far and near.

The G. R. Kinney Co., Inc., own and operate factories to supply their stores. This insures full factory operation and that all shoes will be made at a reasonable figure. The middleman is eliminated with all his expensive selling ways. The manager of the store does not have to go to some distant buying center occasionally and make purchases, but all the goods are shipped from the factory where the styles and material are selected by men of greater experience who see that quality and price are high and that everything comes up to standard. They are excellent judges of stock as they are in contact with world trade in the leather markets.

They carry a very extensive stock of shoes for men, women and children, having all sizes in the various patterns and styles that are the order of the day. From this vast array they are able to fit anyone. The reason some people are not fitted properly in shoes is because they select

from a limited line and do not get the right size. The sales people are familiar with styles and sizes and are able to render the most complete service.

The store is appointed most conveniently. Ample seating room is provided for the customers and the stock is all arranged in such a manner so that if you see anything in their windows it can be shown you immediately. They have studied the shopping problem and make your visit to their store a very pleasant memory.

The great success of the G. R. Kinney Co., Inc., is due to the fact that they have sensed the trend of the times in the retailing of merchandise and are selling their goods strictly on their merits and the fact that they offer such wonderful values.

The G. R. Kinney Co., Inc., does not aim to make all their profit on one pair of shoes, but count on small profit and a large volume of business. Special attention is given to seeing that your foot is properly fitted. You can enjoy foot ease and at the same time be correctly shod if you trade here.

In this review we are glad to compliment the manager, Mr. Clough upon the large trade enjoyed at this Kinney store and invite all the people to visit here on their shopping tours. Adv.

HOLBROOK—JEWELER—OPTOMETRIST

Do not let your eyes keep you from being successful, have them examined today by Holbrook, at 627 Fifty-fifth Street in Kenosha. You are assured expert service, as their business does not keep growing on poor eye service. Also you will find they feature up-to-the-minute selections in jewelry. Phone 9133.

In Kenosha at Holbrook's you are brought face to face with the fact that the art of the jeweler is one that does not look backward into the dark ages for its masterpieces.

Here you will find precious as well as semi-precious jewels in many window mountings and original styles. Their diamonds are selected from the finest offerings of the world for their brilliancy and their perfect cuttings assure a degree of quality, beauty and importance, rarely obtainable. They make gifts of notable distinction and enduring satisfaction. There are many lovely semi-precious stones in suitable mountings, lovely strands of the popular priced beads in both choker and longer lengths, the new colorful jewelry in brooches, pendants, bracelets, and necklaces, and just scores of decidedly new and unique patterns that add both color and smartness to the new frock.

At this store you not only find all that is newest in lovely jewelry but a convenient dignified extended payment plan, so helpful in our day

of budgets. Just make your selection and then arrange for payments best suited to your income. It is your opportunity to purchase the finest of jewelry and pay out of income instead of savings.

You will find here silverware, watches, clocks, toilet sets, fountain pens and pencils, beaded bags, and various specialties. Everything that is newest in jewelry may be found at Holbrook's in Kenosha.

They maintain a repair department where you may take your watches and clocks for repair as well as have your broken jewelry mended or your precious jewels remounted. Many times a new mounting creates a magic transformation to the old possession and gives a new delight and pleasure to the possession.

At this popular establishment you will also find a capable and efficient optometrist. His department is completely equipped with the finest instruments for the accurate examining of eyes and the correct fitting of glasses. Here you are assured of dependable service at a moderate cost. The proprietors are straightforward business men of unusually keen business judgment whose careers have been characterized by their modern and up-to-date policies.

In making this Farmers' and Business Men's Review we wish to compliment Holbrook's upon the very flattering position they occupy not only in this community but this entire section. It is with pleasure that we recommend them to the people. Adv.

Priddis Studio

Photographs of Distinction

Have your photo taken at 5822 Sixth Ave. in Kenosha, and you will be pleased. Photos taken here are life-like and are admired by all. Phone 5751.

It may be truly said that no review would be complete without extended mention of these eminent photographers in this entire section than others. Too little time is devoted to this branch of industry.

They are experts in their profession and turn out work that is the admiration of all. Their equipment is the latest and most approved of the present day and their innate ability for this profession enables them to produce most artistic and distinctive work.

Through photographs you let life's big moments live longer. You preserve forever the cherished memories of the golden days that vanish all too soon. For the future joy this visit will bring you, see the Priddis Studio in Kenosha.

Let the photographs made by these eminent photographers mark indelibly the milestones of life. Their photographs will whisk you back through the years. They will always keep fresh the memory of life's triumphs and joys. Whenever the big moments of your lifetime occur

you should seek the professional services of these prominent photographers.

Photography today is truly a science of art. It requires study, training and experience. No one has met with more success in this profession in this entire section than others. The Priddis Studio in Kenosha.

Their expert work has recalled fond memories to the minds of many of this community. They are painstaking in their work and courteous and efficient in their service. They make a specialty of children's work. Their photographs of children are renowned for their artistic pose and the remarkableness of their life-like likeness. They also do remarkable work on groups.

The Priddis Studio have well merited their reputation of leading photographers. You will be charmed with their extraordinary work.

In making this Farmers' and Business Men's Review we take great pleasure in complimenting them upon their artistic professional services through the years. They will always keep fresh the memory of life's triumphs and joys. Whenever the big moments of your lifetime occur

SWEET CLOVER AS FORAGE CROP

Sweet clover has long been recognized as a forage crop but only recently has its value been appreciated and a place allotted it in our agricultural program. The principal causes for the lack of appreciation of this crop are: (1) the tendency of the stems to become very coarse and woody when the plants come into blossom, (2) its aggressiveness on many waste places and (3) the bitter taste which makes it unpalatable until stock become accustomed to it. If a hay crop is desired, the coarse, woody stems may be almost entirely eliminated by cutting at the proper time. The aggressiveness of the plant makes it very valuable as a soil improver, especially upon lands that have been cultivated over a long period and are low in organic matter and available plant nutrients. Sweet clover does not become a pest in cultivated fields or in pastures. Stock will become accustomed to the peculiar taste of sweet clover in a very few days and will eat the hay or pasture as readily as clover or bluegrass.

Sweet clover is rapidly gaining in favor in this state as a pasture crop for all classes of live stock. It is especially well suited as a pasture crop for cattle and sheep, due to the fact that it very seldom causes bloat. Horses do well on sweet clover and hogs may be pastured on it advantageously when there is a sufficient amount of live stock, such as sheep and cattle grazing to keep it down. However, alfalfa is proving more popular as a pasture crop for hogs.

Sweet clover has several advantages as a pasture crop. One of the outstanding of these is the fact that growth starts rather early in the spring and continues throughout the hot, dry summer months when June grass and other pastures are likely to be rather short.

Grazing should begin when the plants are from six to eight inches high, and sufficient live stock should be maintained on the pasture to keep the growth down to knee high at the most. If the plants get much taller than this they become woody, the bitterness increases rapidly and the quality of the pasture decreases. When it is noticed that the growth is gaining too rapidly on the live stock, clipping the sweet clover to about eight inches high is advisable.

The carrying capacity of sweet clover pasture is exceptionally heavy. It varies of course with the season and with the soil, but as a rule it may be expected to accommodate one head per acre throughout the growing season. Under very favorable conditions three or four head of live stock may be pastured on one acre.

One of the most frequent mistakes made in pasturing sweet clover is having insufficient live stock on the pasture to keep the growth subdued. The pasture will last much later in the second year if the growth is pastured fairly heavy. This heavy pasturing prevents the plants from forming seed. When seed is allowed to form, plants drop their leaves and die. The cumarin or bitter substance of young, succulent shoots is much lower than that of older, more mature plants. When the season is exceedingly dry and long the cumarin content sometimes gets so high that the plants cease to be palatable.

At one time it was thought by many farmers that sweet clover would not be eaten by most kinds of live stock. The success secured the past few seasons by many farmers of the state has shown conclusively that sweet clover is well liked by all kinds of live stock when they once become accustomed to it. The best time to start live stock on sweet clover pasture is in the early spring when the cumarin content of the young plants is rather low.

Cattle and sheep very seldom bloat when on sweet clover pasture. If cattle or sheep are very hungry and the sweet clover plants are wet, there is some danger. Sweet clover is much safer in this respect than alfalfa or June clover.

Cattle, when allowed sweet clover pasture only, frequently crave some dry roughage. This is much more noticeable during a wet year, due to

the extremely succulent nature of sweet clover pasture. Usually this craving may be satisfied by allowing the cattle to have the run of a straw stack.

The fact that sweet clover pasture is succulent, however, is a decided advantage in the case of dairy cattle. A high flow of milk can be secured only when succulent feed is available. When June grass pasture becomes dry, it is necessary to feed ensilage to supply succulence. This is seldom necessary, however, with sweet clover pasturage.

The bulk of sweet clover pasture is produced the second season. However, if conditions are at all favorable considerable pasture may be secured during the late summer and fall of the first season. Owing to the peculiar bud formation of the sweet clover plant the first season, there is little danger of over-pasturing. Some top growth, however, should be left for protection during the winter. Sweet clover may be used as pasture more advantageously in a rotation than as a permanent pasture.

The feeding value of sweet clover pasture is very high due to the fact that the plants contain a high percentage of protein as well as minerals. Nitrogen, potassium, and calcium are abundant in sweet clover. The phosphorus content is low.

Distance of Planting Sweet Corn

Since in our experiments it has been impossible to greatly increase the yield of sweet corn by the use of fertilizers, an experiment was undertaken at the experimental truck farm near Merietta, O., to determine what increase can be effected by increasing the number of stalks per acre by planting rows and plants closer together. The variety was Adam's Early. In 1924 the largest yield was harvested from plants grown in 30-inch rows with 2 plants every 15 inches. This distance produced 44 per cent. more than the usual distance which is 3 plants 34 inches apart in rows 36 inches apart. In 1925, 30-inch rows with 2 plants 15 inches apart again gave the largest yield, an increase over the usual distance of 19.5 per cent.

Using a milk stool on a cow's back, it has been found by actual experiment, improves the cow exactly as much as the milk stool.

Chas. E. Turnock Distributors of Bosch Radios

Buy a Bosch Radio and entertain more typewriters are needed to carry the whole family, and get it at 5927 Sixth Ave. A in Kenosha. Here you will find all standard makes of typewriters, such as Remington, L. C. Victor Adding Machines and supplies. The typewriter occupies one of the most important places in the commercial world today. No business firm can afford to be without a typewriter, all business letters are typewritten. The larger the business the

When a calf is born find some identifying mark and describe it in writing. Some things like: "Irene's calf, irregular round spot on left shoulder." It is easy to forget them if you are as busy as a farmer usually is.

WELLWORTH VARIETY STORE

They Help You Save!

Don't forget to visit the Wellworth Variety Store while in Kenosha on your shopping tour. At 6212 Twenty-second Ave. you will find countless articles that you have needed time and again—and all at cost that will surprise you.

One of the most essential establishments in the community is this variety store where so many necessary articles are displayed for your needs. At this popular store you will find such a varied collection of household necessities and you have but to turn from one counter to another to select the things you need whereas before the advent of such stores it was necessary to make trips to a number of stores before securing the same articles.

Another important feature of this popular variety store is its economy. They buy in such enormous quantities and have such a rapid turnover of their merchandise that they can sell these necessities at a considerable savings to their patrons. For quick, efficient and economical shopping, visit the Wellworth Variety

Store in Kenosha. Here you will find many articles that are not carried in any other store. Their aim is to supply the people with those small necessary articles for the home at a considerable saving. That they do this is seen by the popularity of their store. They buy from some of the largest jobbing houses in the country. No sooner are new articles placed upon the market than they are to be found at this store. Novelties of all kinds may be found on their counters, those that are popular ornaments as well as useful articles in novelty form.

The variety store has met with universal approval all over the country. From the time the idea was conceived, the variety store has perhaps been the most popular store in America and its popularity increases each year. When people fail to find what they want elsewhere they almost invariably find it at the variety store.

Many people of this section are amazed at the many useful articles they find at this variety store. They joy in this community. Adv.

can hardly believe that it is possible to find such wonderful values at so small a cost. Don't fail to start your next shopping tour at the Wellworth Variety Store in Kenosha.

Here you will find the employees helpful and courteous. They are there to sell goods after you have decided upon your purchase. They are never obtrusive.

It would be impossible to enumerate the various articles carried here. It is a variety in every sense of the word, a variety of necessary articles for personal use, for household usage and various other needs. Their prices are always reasonable and within the reach of all.

The people of the community are very fortunate in having such a store in their midst. It means a saving of money as well as time in making your selections.

We take pleasure in pointing out to you this popular store and in this Farmers' and Business Men's Review we wish to compliment them upon their efficiency and position they enjoy in this community. Adv.

Nash Motors Co.

Kenosha, Wisconsin

Think of the benefits derived from having the Nash Motors Company in our territory. They have an increasing demand for their Nash automobile, as well as furnishing employment for the residents in and around Kenosha.

We all know that America is noted for its manufacturing and because of this we are apt to take for granted the local concerns.

How many people in this community are really acquainted with the Nash Motors Company, what it has done, is doing, and the many elements that enter into its success?

To manufacture one must have, secure or develop an idea that covers a definite need. Factory site and

suitable buildings must be secured along with the necessary standard equipment and a complete organization. This organization must represent manufacturing knowledge which covers the development of special machinery and this in turn requires the design, patterns, casting, etc., merchandising ability which covers advertising, selling, credits, financial and executive ability.

The Nash Motors Company has been extremely fortunate, first in securing the Nash automobile to build, for there is an increasing demand for this automobile. Their ability to properly manufacture and demonstrate this has been demonstrated by the many orders and

steady growth of the plant. The Nash Motors Company as all you readers well know are manufacturers of the famous Nash cars, sold over the entire world. In manufacturing the new Nash "400" series, they have placed it in a class by itself, especially the power plant of this car, which is among the finest in the world. If you have not seen their new line of cars, or have had the many desirable features explained to you, it will be to your interest to visit your nearest Nash dealer and get thoroughly into this subject before purchasing a car.

The financial and executive phases get their best recommendation from their credit standing with the trade

and the sources of their raw materials.

It is concerns of this nature that have made cities out of towns and the United States into the greatest manufacturing country on earth. Each of these concerns represent a definite idea of one man. It has been carefully developed and acts as a monument to the far-sight, energy and ability of the man who has brought it to its present successful state.

We are indeed pleased to give the Nash Motors Company in Kenosha extended mention in this Farmers' and Business Men's Review and congratulate the people upon having this successful industry in their community. Adv.

FARMER'S CO-OPERATIVE SUPPLY CO.

Grain and Feed Dealers

The Farmer's Co-Operative Supply Company is located on the Geneva Road in Truesdell, and they will pay top quotations on grain at all times. Get their prices before you sell. Phone 9816.

This reliable firm is one of the most universally known grain and feed dealers in this community. It is under the able management of very efficient and experienced grain men.

This firm has established a reputation for honest and up-right business methods commensurate with such straight-forward policies. The farmers have learned that they pay highest market prices for their products. In fact, they form a most profitable market to the community itself. Their dealings are satisfactory in every way. It is a pleasure indeed

to deal where you receive such prompt and courteous service.

As soon as the grain is ready for market, let this establishment quote you prices. You are assured of correct weights, highest market prices and satisfactory service. A trial will convince you. Get in touch with the Farmer's Co-Operative Supply Company in Truesdell.

They are able to furnish you with all kinds of pure seeds. In buying seeds here you are assured of maximum results in production as well as an improvement in the quality of your products.

Their dairy feeds and supplies have proved to be a boon to many large stock feeders. Their poultry feed is beyond comparison for baby chicks just out of the incubator and for laying hens. When in

need of such feed call on the Farmer's Co-Operative Supply Company in Truesdell.

They understand feeding and will gladly assist you in solving your problems. Don't hesitate to consult them for dependable information.

This establishment is among the most progressive institutions of this section. They are familiar with all phases of this business and are ever striving to serve the public to mutual advantage.

We take great pleasure in this Farmers' and Business Men's Review in commending them upon their fair and honest business methods and direct your attention to this concern as one of the important features of the community's commercial efficiency. Adv.

ALFALFA CULTURE

(By C. G. Williams)

Alfalfa is being grown with more or less success in every county in this state; with greater success upon the rich and well drained limestone soils of the western half, than upon the shale clay and sandy loams of eastern Ohio, although under these much less favorable natural conditions success has been attained by many.

What Alfalfa Needs.

A well drained soil. There are a number of conditions which are fatal to alfalfa. Among these, lack of drainage stands well to the front. Soils not having natural sub-surface drainage, i. e., a porous subsoil, should be tiled. While good surface drainage is helpful, trouble may be expected with a heavy, retentive subsoil, unless tile drainage is resorted to. Alfalfa will not thrive where the water level is permanently within three feet or less of the surface. It will stand flood water for a considerable time during the dormant season, unless the water freezes solid, but during the growing season two or more days' flooding is usually disastrous.

A sweet soil. No farm crop seems as sensitive to soil acidity as alfalfa. There is no use to seed alfalfa in Ohio where red clover fails to do well and sorrel is working in its place. Uplands usually become acid before bottom lands. As a general rule the first thing to do with all lands other than limestone, which have been in cultivation very many years, is to apply lime in some form. Not infrequently limestone soils which have been in cultivation for many years have had the lime pretty well leached out of the surface soil and will give better results if limed.

When to seed. Mid summer seeding, without a nurse crop, upon land which has been thoroughly prepared, probably furnishes the most favorable conditions for securing a stand of alfalfa. This thorough preparation may consist of four to eight weeks of fallow cultivation, or of a preparatory crop, as early potatoes or peas, which is out of the way in good season.

Source and character of seed. Alfalfa varies widely in hardiness. With few exceptions we have found the southern grown seed to be tender and unable to withstand our Ohio climate. Northern and northwestern grown seed have quite uniformly given good satisfaction. No one should purchase alfalfa seed without knowing its source and first examining a sample for adulteration and seed impurities. The greatly increasing demand for alfalfa may have encouraged adulteration; at any rate it is occasionally met with. The seed most commonly used to adulterate alfalfa is yellow trefoil (*Medicago lupulina*). Other adulterants sometimes used are sweet clover and bur clover. The weed pests to be especially guarded against are dodder and narrow-leaf plantain. Purchasers of seed who are not familiar with these and other possible impurities should submit a sample to the Botanist of the Experiment Station before purchasing. Such examination is made free of charge for residents of this state.

Manner of seeding. It makes but little difference how alfalfa seed is sown so that it is done evenly and is well covered. The Station has secured very satisfactory results distributing alfalfa seed through the grass seeding attachment of an ordinary grain drill, dropping the seed in front of the hoes, the latter covering it. This has given decidedly better results than drilling the seed, i. e., distributing it through the drill hoes the same as wheat. It may be seeded quite satisfactorily with many of the common grass seeders in use, and by broadcasting by hand. Where there is a possibility of uneven seeding it is well to divide the seed and cross seed. Except when covered with the drill hoes the seed should be harrowed in.

Rate of seeding. This Station put out a thick and thin seeding test of alfalfa June 27, 1926, at the rates of 5, 10, 15, 20 and 25 pounds of seed per acre. The seed was distributed through the grass-seeding attachment of an ordinary wheat drill after repeated and careful testing. It was dropped in front of and covered by the drill hoes.

Very many farmers have failed in their attempt to grow alfalfa. There is no disputing the fact that thousands of dollars have been lost upon unsuccessful alfalfa fields. Many of these losses might have been avoided. The reasons for some of these failures have been already been enumerated in this article. In brief they are: wet soil; acid soil; impoverished soil; weeds; lack of inoculation; poorly fitted seed bed; over nursing soil; ill-timing seeding; poor and weedy seed and excessive clipping.

Cohn's Shoe Store

Shoes of Character

For those who find it more convenient to shop in Waukegan—a "Cohn's Shoe Store" will be found at 119 North Genesee Street, the same quality shoes and courteous service will be found at this store as at 5806 Sixth Ave. in Kenosha.

Speaking from a personal standpoint there is nothing that makes one so low in spirits, cross or ill-tempered as an uncomfortable, ill-fitting shoe. On the other hand there is nothing from which we derive more pleasure or satisfaction than comfortable, well fitting shoes. It is absolutely essential to our peace of mind that our feet are comfortable.

While our feet are buoyantly supported by snug fitting, flexible shoes, they also must have style, quality and durability. Nowhere in this community will you find this combination better suited to your needs than at Cohn's Shoe Store in Kenosha or Waukegan.

Here you will find shoes that from the tips of their modestly rounded toes to their snug fitting heels are beautiful. Shoes in which there is no restriction of any kind to tire your feet. In their flexible shoes you enjoy the cool comfort of feet that are free and well fitted, shoes shaped like the natural foot.

Their shoes are durable. No part of our wearing apparel is subjected to more wear and strain than a pair of shoes. This store has realized the

necessity of having stylish shoes that wear and through this achievement has built up a growing business in this community.

For comfort, smartness and style you'll find Bostonian Shoes lead. This shoe has individuality that you will be proud to wear and when it comes to durability Bostonians have a record that is hard to beat. Let your next shoes be Bostonians.

This store does not carry shoddy looking or shoddy made shoes. You may be assured that none of these characteristics will be found in shoes purchased at Cohn's Shoe Store in Kenosha or Waukegan.

There is a completeness of stock here seldom found outside of metropolitan districts. They have complete size ranges, lengths to size 10 and widths from AAAA to D.

A personal service to every customer or prospective customer is one of the unique features of this establishment. You may be assured of an understanding and courteous treatment by salespeople of this organization, whether you come in to buy or just to look around.

In this Farmers' and Business Men's Review we wish to call your attention to the able management of this enterprising concern and suggest that when you are in the market for this merchandise you give them a call. Adv.

REGNER—YOUR JEWELER

When you are thinking of jewelry be sure to think first of Regner—Your Jeweler, at 5834 Sixth Ave. in Kenosha. Here they offer you the "Gruen"—you get more for your dollar than ever before—a real quality watch through and through.

Prominent among the worthy establishments in this locality is this conspicuous jewelry store. They have a reputation extending over this entire section for quality jewelry.

You will find here great pleasure in gift selection. They have glorious displays of the new and popular jewelry. The jeweler's art is ever a changing scene of progress toward more beautiful and more exquisite refinements. The trend of the newest fashions is nowhere more resplendently shown than in the entrancing displays now inviting your inspection at Regner's—Your Jeweler.

Here you will find the loveliest diamonds in all sizes and the most exquisite of mountings, all the newest styles in Gruen watches for both men and women, pins, beads of the latest styles, and silverware of the finest quality.

At all times you will find here sincere personal interest and helpful service which has made this business house one of the outstanding establishments of Kenosha.

A repair department is featured where you may have your precious times remounted, lost stones replaced, or any other repairs incident to broken parts. They maintain only proficient craftsmen for this delicate task.

You will appreciate the quiet refined service you receive at this establishment. They have long realized the value of efficient and cordial service and have ever rendered such service to their patrons. Their ever-increasing patronage speaks for their success and in this Farmers' and Business Men's Review we desire to commend them for true value-giving merchandise and the high service they render. We take great pleasure in referring them to the public. Adv.

BALANCED CROP ROTATION PAVES WAY TO PROFITS

Taking crops off farm land year after year reduces yields. When this has gone too far it is hard for farmers to get paying returns for their investments and labor. Naturally, the best interest of the farmer will be served when he can be given methods of soil management that will produce good crop yields without added expense and labor. Crop diversification and crop sequence merit careful attention in this connection.

In 1875 three definite cropping systems were started on three tracts of land known as the Marrow plots. These systems: continuous corn, corn and oats grown alternately, and corn, oats, and red clover in rotation. Since 1904 one-half of these three plots has been treated with manure, limestone, and phosphate, and where possible, as in the corn and oats combinations, sweet clover has been used as a green manure.

These results prove that the cropping plan, or rotation and the soil treatment influence crop yields to a marked degree. This is especially noticeable where there are legumes in the rotation. From these results it would seem that an important factor in profitable soil management would be a well-balanced crop rotation in which legumes had a prominent place.

This is further emphasized by the results from about sixty different crop rotations being grown on the outlying experiment fields. Rotations in which sweet clover and other deep-rooted legumes have been grown have been especially effective.

The question is often asked, "Which is the best breed to raise?" All are good breeds and are capable of giving good money returns if the owner will take the proper interest in them.

Does Advertising Pay?

J. K. Groom, of Aurora, Ill., said advertising the evening service of his church had increased attendance collections and more than paid for itself but that both had dropped back to original proportions when the advertising was discontinued.

GARB'S LUGGAGE STORE

Distinctive luggage is an important factor to the successful individual, and be sure to get it at 619 Fifty-eighth Street (in the middle of the block), in Kenosha. They feature Hartmann Trunks, Ladies' Imported Purse, all kinds of hand luggage and leather novelties.

Garb's Luggage Store in Kenosha carries in stock a full line of real genuine leather traveling bags, suitcases, Gladstone bags and brief cases. They also feature wardrobe trunks, steamer trunks and most every conceivable case for the traveler.

In smaller articles they have key cases, pocket books and folders, purse cases, extra grip handles and many other articles too numerous to mention. Reliability is an asset and this house lives up to the motto that when anything is sold as genuine leather, it is genuine leather. People of this and surrounding territory have come to know this leather goods store as the one place where they can secure quality goods at reasonable prices.

They are prepared to place an identification mark on any piece of luggage or other leather goods. This service is usually free with the article bought or they will make a very reasonable charge on any luggage brought to them.

The men in charge at this establishment study the need of the traveling public and carry in stock all that can be used or needed. As it is necessary to buy in advance you can readily see that their new types and styles must be bought months in advance of daily needs.

Be it a hat box, suit case, or even a key case, you will be given the same courteous treatment as if you bought a steamer trunk or the latest Gladstone bag. Individual service is rendered.

We wish to compliment the management of Garb's Luggage Store in Kenosha upon the high quality of products they have sought to offer the public and invite all our readers to see them when in need of traveling equipment. Adv.

Gardening keeps down the cost of living on the farm. It's no longer just a job.

THOS. A. SULLIVAN

Kenosha's Best Fur Store

Stop at 6218 Twenty-second Ave. in Kenosha, and see their fur coats—what's in a name? A great deal sometimes—especially is this true when it comes to the matter of considering the purchase of a new fur coat. They also have a complete line of dry goods and aluminum ware, enamel ware, linens, etc.

What woman does not, at least secretly, covet beautiful furs? By instinct furs are the pride of every woman's heart. Through careful buying, furs have ceased to be the luxury they once were. A good fur garment will last for years and the wearer can feel that she is always well dressed. If you are looking for good furs, distinctive furs, furs that assure the wearer of utmost satisfaction, see Thos. A. Sullivan in Kenosha.

Fashionable women seek their furs here. They know the owner of this store has made every effort to secure the authentic fashions, garments that will be smart for more than one season in their present style, and that at a very small cost can always be remodeled. Here they will find the garments beautifully tailored in the

smartest new creations.

You just naturally like some stores better than others, you are attracted to them more, as you are attracted to some people—you like those who show an interest, and who are of service.

Thos. A. Sullivan's are interested in you as is shown by the service they render. They carry a complete line of baby clothes, both for the tiny, new baby, and the adorable active youngsters.

Here you may select a complete infants layette, something very modest or again a more elaborate one of all hand made and embroidered garments. Again if you are merely looking for a gift for the new baby or small child you are sure to find just what you want.

They are prepared to give you advice as to the proper garments for the new baby. They have made a careful study of this need, kept abreast of the times and you are sure to find all the newest baby garments at Thos. A. Sullivan's in Kenosha.

Be sure to see the complete stock of dry goods and linens that is featured here. Their is no housewife

who doesn't admire and appreciate fine linens to complete her household.

Also they have the finest quality in aluminum ware as well as enamel ware. This is the color age, therefore see this beautiful colored ware. They make the kitchen more cheerful—see them.

Every housewife prides herself with the anticipation and realization of a complete stock of china and glassware for her home. Her home is not complete without it, and let us say that high grade china and glassware upon which a meal is served makes it most appetizing.

At Thos. A. Sullivan's in Kenosha you can secure high grade china, glassware and allied supplies. To buy in this line you should buy with confidence and at this store you can fully depend upon the quality of the goods.

This paper takes great pleasure in directing your attention to the quality goods offered and commends the management for their untiring efforts in serving this community most satisfactorily. Adv.

Firestone Sales & Service Co.

Complete Firestone Equipment

G. GALLO, Proprietor

For road and delivery service, internal friction is eliminated by this process. The rubber coating enjoys more, if you get your supplies and accessories at the Firestone Sales & Service Company at 2122 Sixtieth Street in Kenosha.

You will at once recognize this place as headquarters for dependable tires and service that is right. A visit to this up-to-date tire store will convince you that they form an indispensable factor in the industrial life of the community.

This prominent establishment is equipped scientifically for tire and tube service. It is managed by able and experienced men who are specialists in the auto supply and tire game.

They feature the Firestone tires, famous for their long service and durability. They carry an adequate stock of sizes in this well known make and can quickly supply your needs. For unequaled tire service go to the Firestone Sales & Service Company in Kenosha.

Firestone tires are known to give more miles per dollar than any other tire. The Extra Gum-Dipped Cords is the process by which the Firestone tire is made durable, dependable and assures the customer of extra mileage. By reason of this extra mileage the cost per mile runs very low. The

SCANT PASTURES IN LATE SUMMER

The condition of the pastures during late summer makes necessary certain changes in feeding dairy cows, says the New York State College of Agriculture in a statement issued recently. At this time the pastures are usually rather scant, which makes grazing more difficult.

The different pasture plants are also more mature. This means that they contain more dry matter but less proteins. These conditions are, in turn, accompanied by severe hot weather and by a host of flies which bring much discomfort to the animals. Because of these things the dairyman must use all his knowledge and skill to the best possible advantage in order to maintain the milk flow.

First of all, heavier feeding is needed. The deficient pastures must be helped out with more feed, either through silage crops, or grain, or both. More protein must be provided in the grain mixture not only because of lack of it in the pasturage, but also because grain will make up a larger proportion of the daily ration.

A simple yet suitable combination of feeds is as follows: 300 pounds wheat bran, 300 pounds hominy or corn meal, 300 pounds gluten feed, 100 pounds linseed oil meal.

This mixture contains 40 per cent of high protein feeds. This is just about the right proportion to make a balanced ration with late summer pasture grass.

For the man who wants greater variety the following mixture is suggested: 200 pounds wheat bran, 100 pounds standard wheat middlings or ground oats, 300 pounds hominy or corn meal, 200 pounds gluten feed,

100 pounds linseed oil meal, 100 pounds cottonseed meal; 43 per cent.

This combination is similar in composition to the first, but is somewhat more expensive under present market conditions.

CATTLE BUSINESS PICKS UP

A substantial advance in both fat and stock cattle values from January to May has improved the position of Western commercial breeders, stimulated investment in grazing lands and even enhanced values of pure-bred breeding stock. After several years of inactivity the bull man is again taking orders, consignments of registered bulls to range points have been promptly absorbed and the whole industry has taken on new life. Ranches offered without getting bids for several years are finding purchasers, whose policy is to restock.

A notable instance of this is the recent sale of the John M. Holt ranch comprising 80,000 acres on the Tongue River in Eastern Montana which had been untenanted for several years. Several extensive ranches in the Northwest will be restocked with cows with all possible celerity, as there is an admitted scarcity of desirable breeding stock. All over the Great Plains region a gigantic restocking task is confronted. Restocking this grass with young South-east cattle is impossible as values are even higher in Texas than in the Northwest.

The Jersey Black Giants are considered very excellent for general farm flocks as they have the size which makes them excellent for the purpose of roasters and capons.

Roy's Jewelry—Pianos

When it's jewelry you are looking for, be sure to stop at 32 North Genesee Street in Waukegan, they always have just what you wish, and at prices that will surprise you. They also feature a fine selection of pianos—see them before you buy.

At this modern jewelry store you will find the choicest of gems and jewels as well as the more popular pieces of the day.

The store itself is beautifully appointed and the jewels, silverware, watches, bands and novelties are artistically arranged for your selection. It is a joy just to visit this lovely store.

At Roy's in Waukegan are specialists of the highest order of excellence. Their profession is the expert selection and artistic setting of rarely fine gems. They have a reputation for master gem mountings. They believe that all gem pieces are sold only when the patron is happy with its possession. Their success perhaps comes from the sum total of satisfaction on the part of their customers through the years of business.

A visit to this artistic establishment will convince you that these gems are a condensed version of the excellence of his merchandise, beauty, are in truth epigrams of beauty. When you purchase your gems here you are assured of purity, honest value and lovely mountings. Even the finest specimens of jewel-

craft are modestly priced.

When it is your pleasure to make an occasion memorable with a distinctive gift in jewelry, or fine silver, you'll find it satisfactorily to the joy and approval of the recipient in purchasing your gift at Roy's in Waukegan.

The repair department is in the hands of specialists in this line. Each article is given the best of care and attention.

The owner of this valued institution is a man of excellent business judgment, who is always scouring the markets for rare and lovely jewels for their patrons. He is a man of dependability and integrity who at all times have the interests of the community at heart.

Here you may choose a grand piano, player, or upright from a very large and complete stock. These may be purchased upon deferred payments if you like. All instruments are fully guaranteed, not only by the manufacturer but also by Roy's in Waukegan.

In making this Farmers' and Business Men's Review we desire to commend his most worthy efficiency, the excellence of his merchandise, and his capable business methods. This community is indeed fortunate to have such a valuable institution.

Adv.

FERTILIZERS FOR SPECIAL CROPS

[By C. J. Chapman and A. R. Whitson, University of Wisconsin]

The soil must be adapted to the crops, and good drainage must be supplied.

Manure and clover are the cheapest sources of nitrogen.

Commercial fertilizers should be used to meet both soil and crop requirements.

The method of application varies depending on the nature of crop grown.

Lime is necessary for most truck crops and must be supplied for maximum yields on acid peats and upland soils.

High grade fertilizer mixtures are most economical when figured on the basis of unit cost.

The home mixing of fertilizers containing nitrogen involves certain difficulties and should not be attempted unless the farmer is in possession of full knowledge of problems involved.

Potatoes respond to the use of commercial fertilizers and large increases have been secured where soil and climatic conditions are favorable.

Tobacco is a heavy feeder and must be supplied with large amounts of plant food.

Canning peas make their growth in a short period, have a limited root system, and for maximum yields must be supplied with plenty of available plant food.

Cabbage and other leafy vegetables such as spinach, lettuce, Swiss chard, cauliflower, etc., are all heavy feeders of nitrogen, but this element must be supplied in the most economical way.

Onions do best on the loose friable sandy loams, silt loams, and muck soils. The wide range in yields per acre make possible the use of heavy applications of high grade fertilizer mixtures under many conditions.

Sugar beets are grown chiefly on the more fertile loams, clay loams, and muck soils.

Lawns should be top dressed at intervals of every four or six weeks with fertilizers high in nitrogen.

The proper use of suitable fertilizers is one of the surest ways, under present conditions to increase the farm income. Labor is high and in general, it does not pay to increase the acreage being cropped. The cost of interest, taxes, tillage, and seed must be met before profit can be counted. An average yield may be absorbed to meet these items, so that a higher yield must be secured to get any profit. It is better to produce a high yield on two-thirds of the acreage than an average yield on the full acreage.

Soil Adaptation to Crop.

In growing special crops, several factors must be considered. In the first place, the crop should be grown in soil adapted to it, and proper drainage must be supplied. It does not pay to grow potatoes or expensive crops on too light sand which will not hold enough moisture to support a large yield, even if fertilizers are used. Nor does it pay to use fertilizers or labor on poorly drained soil.

Manure and Clover Cheapest Sources of Nitrogen.

Secondly, high fertility should be maintained in the most economical way possible. In general nitrogen should be secured by the growth of legumes and the use of manure, though, in certain special cases, it is necessary to buy nitrogen to get the best results. This is especially true on very high priced land. But even there, rotation with legumes, grown for hay or green manure, is often important to reduce the trouble with plant diseases, such as the blight and scab in potatoes. Lime and often phosphate is frequently needed to secure the best growth of the legume; but those elements become available to the special crop through the decomposition of the stable or green manure and, then, serve a double purpose. This general fertility of the farm should, then, be supplemented by the use of such special fertilizers as are needed in each case to get the best results; and each farmer must study his conditions of soil and crop to determine just what that fertilizer should contain.

Adapt Fertilizers to Soil Conditions.

Both soil and crop should be studied, but the soil needs should be studied first.

Certain kinds of soil have marked fertilizer requirements. Soils of a peaty or muck character are high in nitrogen, so that it is seldom necessary to use on them a fertilizer containing that element. They are very low in potash, however, and this element must be supplied either by the use of stable manure or commercial fertilizers. Murate of potash, alone, is often all these soils need to grow good crops, although sometimes soils of this kind are in need of phosphates as well as potash. This is especially true of the acid peat soils of the central and northern part of the state.

WAUKEGAN CUT RATE ARMY AND NAVY STORE

They Sell for Less—Why Pay More?

For your heavy footwear, you will find at 110-112 South Genesee Street in Waukegan is the place to buy, where prices and quality counts.

Not everyone in the community realizes the assortment of goods that can be bought at the Waukegan Cut Rate Army and Navy Store. They carry a most complete line of practical goods. They buy in large quantities and are naturally able to sell at reasonable prices.

It is a convenient store, the goods are so displayed that the shopper can select their own purchases with ease. This store gives the public an opportunity to buy real goods at most reasonable prices. There is a variety that can be had at only an

Army and Navy Goods Store.

They carry everything for the working man in clothing and accessories. They have practical, durable materials that give good honest wear. For the man who enjoys outdoor sports, they have a complete line of clothing and equipment.

They are always striving to secure the best garments that can be had for the working man at the lowest prices. Apparel that will withstand the wear and tear that only hard work can give and yet prove economical and serviceable. In other words their aim is to give you more for your money than you can get elsewhere. If you would save, shop at this Army and Navy Goods Store.

The Waukegan Cut Rate Army and Navy Store is a modern, up-to-date and progressive store. When on your next shopping expedition you will find it a pleasure to shop here. Once a customer always a customer is their very well earned slogan.

Here you will find courteous and competent sales people. They take great pride in giving each customer individual attention, they strive to please. You will find quality merchandise here at prices much below the usual cost of such goods.

In this Farmers' and Business Men's Review we feel that there is no institution more worthy of mention than this Army and Navy Goods Store. Adv.

GERMINATION OF EARLY HARVEST- ED SEED CORN

In 1924 seed corn was harvested at five stages as follows: blister stage, early milk stage, full milk stage, early dough stage, and late dough stage. This seed was stored in a warm dry room and germination tests were made during the winter.

Seed harvested in the blister stage yielded few live sprouts and all were very weak. The germination of seed harvested in the early milk stage was 78 per cent, and nearly half of the kernels that germinated produced very weak sprouts. Beginning with the full milk stage, far better results were obtained. This harvest was between three and four weeks after the exposure of the silks just a little before the corn was ready for roasting ears. The percentage of germination was above 95. The sprouts were somewhat slower than those from mature kernels but fairly satisfactory growth was obtained from similar seed planted in 1925.

Except for noticeably more vigorous sprouts, grain harvested in the early dough and late dough stages gave results on the germinator practically identical with that harvested in the full milk stage. The early dough stage corresponds to prime roasting ear stage. In the late dough stage kernels are beginning to dent. Seed harvested in either of these two stages produced wholly satisfactory results both on the ger-

mination and in field plantings.

Selecting seed corn at these early periods is of course not to be recommended as a general practice, but in case of emergency the corn grower need not hesitate to gather corn for seed as early as the roasting ear stage. It must be emphasized, however, that disappointment will very probably follow such a procedure unless favorable storage conditions are provided.

Pastor Says Church Must Sell Wares By Advertising

WEST PLAINS, Mo.—The Rev. E. R. Clarkson, pastor of the Christian church here, is a strong believer in advertising. After citing various ways in which publicity was given to Christianity and to the church in earlier days. Mr. Clarkson declared that the church should take advantage of every opportunity to advertise the things of the religious world.

"If a merchant finds it profitable to tell of his wares in the newspapers," says Mr. Clarkson, "why not the church tell of the good of Christ and the church through the same medium?"

He not only advocated use of newspapers for advertising, but called attention to the advertising being given churches through the radio.

A clean-up day is often advisable on many farms. It gives an opportunity to put things away and makes the farm more attractive.

LEO ERNST

All kinds of repair work in auto trimming, curtains, cushions, tops, covers and body bumping is satisfactorily taken care of by Leo Ernst at 6310 Twentieth Ave. in Kenosha. Phone 9724 for service and information.

Today the top and upholstery are two of the most particular parts of an automobile. Whether it is an open or closed car the top must be rain and storm proof. Even the best of tops on high priced cars need attention occasionally so we suggest that you see Leo Ernst in Kenosha.

He has a splendid reputation for work in trimming, upholstery and general top manufacturing all through this section. You will find that his work is neat and that it will conform to the beauty lines of your car. It is hardly possible to drive five miles in this territory without passing some notable example of his expert work.

In his upholstery department he is ready to rebuild your entire car if necessary. Possibly you have carelessly burned a hole in a part of the upholstery. Better have it repaired while the hole is small. Then again you might have had the misfortune to be in a wreck. Let us quote right here that there is no more worthy workman to repair it for you than Leo Ernst in Kenosha.

In the matter of tops let us suggest that you call around and have him inspect the top of your car, especially if it is a closed car. It is very common among us to let these tops go bad until we see the water coming through in a dashing rain. When the top is left go this far you will find that the interlining and in many cases the top supports are decayed and ready to crumble. Better have a coat of top dressing put on your closed car every 3 to 5 months to insure no leaks. It is much less expensive.

As publishers of this Farmers' and Business Men's Review we are glad to commend Leo Ernst in Kenosha for all grades of top work. He is well known in this section and his work stands as mute testimonials to the excellence of his ability. Stop and see him the next time you are in town. Adv.

KINDNESS

"A man of kindness to his beast is kind.
Brutal actions show a brutal mind,
Remember, He who gave thee speech and reason
Made the brute and formed him mute—
He can't complain, but God's omniscient eye
Beholds thy cruelty, He hears his cry,
He was destined thy servant and thy drudge,
But knows this—His Creator is thy Judge."

Turning Corn Into Dairy Feeds Urged

SURPLUS CROP FED TO COWS
WILL RELIEVE FARMER.

Farmers who are worrying about the surplus of corn and the relatively low price of their product just now can secure as much as \$1.25 a bushel by turning this corn into dairy feeds and market the dairy products.

"By marketing their surplus corn in the form of dairy products," says M. D. Munn, president of the National Dairy Council, who has been conferring with leaders in the dairy industry and bankers on the question, "this corn will return the farmer about \$1.25 a bushel based on the average price of dairy products in 1925. By so doing we will not upset the balance of grain produced by having meal mush, bread or muffins in place of a bushel of wheat. At best we can only eat a given amount of bread and cereals, and an increased consumption of one form of bread necessarily decreases the consumption of another."

While corn meal mush and milk is palatable and healthful and should be freely eaten, it does not constitute an effective way of consuming the surplus corn. Milk and its products are the most healthful foods we have, and by consuming more of these people will have better health, be more efficient and at the same time directly assist in relieving the farmer of his burden of surplus corn providing they will feed it to the dairy cows in a properly balanced ration.

"If the public is really willing and

anxious to help in relieving the farmer of this corn surplus burden," says Mr. Munn, "he can best assist by increasing the consumption of milk, butter, ice cream and cheese and at the same time be more healthful and efficient. The properly balanced ration for the dairy cow, includes corn meal, corn gluten, feed, together with ground oats, barley, bran, cottonseed meal, beet pulp, etc. This corn gluten feed is a by-product from the manufacture of starch and sugar from corn. Therefore the consuming public can further assist by using more corn sugar and less imported cane sugar."

Many New Hog House and Equipment Plans

Ten different plans for individual hog houses that the farmer can build at low cost without hiring skilled labor have been prepared this past year in the investigation by W. A. Foster, chief of farm mechanics on hog houses and equipment, at the Illinois Agricultural Experiment Station.

A number of plans on miscellaneous equipment are being prepared for blue-print service and manuscript publication. These include feeding, housing, watering, breeding and farrowing, and miscellaneous equipment. These plans should be completed early next year.

One plan has been added to the community hog house list. It is a 20-pen, 2-row house with roof windows for gambrel-shaped construction.

Many chinch bugs may be harbored in those old fence rows and roadsides.

Larsen & Wyman

Electrical Contractors
Complete Line of Fixtures

You change your furniture—why not your fixtures? Larsen & Wyman carry a complete line. For better wiring see these electrical contractors at 1924 Fifty-sixth Street in Kenosha. Dial 2-1785 or 2-1948.

In a review of the present day business activity of the county there is no one concern more worthy of mention than Larsen & Wyman in Kenosha.

Here the public has at its disposal the services of men who possess the knowledge and who obtained their electrical contracting education in the school of actual experience. From the inception of the enterprise, quality has been the aim and the standard of excellence has been maintained from the beginning.

The force of this business is very extensive and they are equipped with the latest equipment for production of the highest class of electrical contract work. Their services include expert electrical contract work on every kind of building. Specializing in schools, churches, factories, theatres and office buildings.

Larsen & Wyman have had charge of some of the largest contracts in this section and always use the best of materials regardless of the contract. This firm is equipped to

handle the largest contract or even a small job.

Larsen & Wyman are not merely electrical contractors, but are known far and wide as electrical engineers. They are well informed on all classes of electrical contract work and throughout the wide territory in which they operate they are considered authorities.

It is a pleasure for us to point to this concern as one of the leading enterprises of this section of the state and that they have won a warm place in the heart of the public through the excellent work they have executed in every branch of the electrical contracting business. The public has come to understand that when a contract for this class of work goes to this firm it is executed according to specifications and a satisfactory job is certain.

In this Farmers' and Business Men's Review we wish to compliment Larsen & Wyman upon the leadership position they have attained in the business life of this section of the state and assure our readers that when a contract is let to this firm they will receive expert workmanship as well as quality materials. Merchant's Market

Quality—Fair Prices—Service

While in Waukegan, be sure to stop at 224 South Genesee Street and have your market basket, filled with real food values. Phones 72 and 6885.

At this well known meat market you are assured of receiving only the freshest and choicest of meats obtainable. They have long been known for their high standard of quality meats.

This market is kept scrupulously clean and sanitary throughout. All pure food laws are met in a most satisfactory manner, the meats held at just the right temperature in their refrigerating plant.

Here you may secure your favorite cut of beef, veal, pork, or lamb with the added assurance that it is of the highest quality procurable. If you are not familiar with the various cuts and their relative value, they will gladly explain these to you.

The service is prompt and efficient at all times. They are pleasant and courteous always greeting you with a smile and glad to make suggestions.

if you are in doubt as to what you desire to purchase.

Butter and eggs may also be had at this popular market, also fancy poultry and fish in season. You always find good meats at reasonable prices at Merchant's Market in Waukegan.

Even a single order will suggest to you the definite superiority of their meats and service. They furnish meats of unquestioned excellence to the people who expect the best—and get it.

One trial will convince you not only of the superior quality of their meats but their unexcelled service as well. In fact, there are four good reasons why you should buy your meats here; namely, fresh meats, variety of cuts, quick service and low prices.

We desire in making this Farmers' and Business Men's Review to commend this firm upon the high position they occupy in the community. Adv.

ROOSEVELT—VOGUE—BUTTERFLY THEATRES

Distinctive Photoplays

If you wish to enjoy the evening, be sure to visit one of these Theatres in Kenosha, you will be pleased with the high class entertainment that they feature.

These moving picture theatres are some of the greatest sources of entertainment today. They entertain young and old alike. They may be educational, and in most cases are, but they may be merely amusing, a pleasant recreation after a full day, a means of entertainment for yourself and guests.

The Roosevelt, Vogue and Butterfly Theatres furnish the people of this community with good, clean pictures that meet with approval of the most strict censors. Here you will find every kind of play to meet the discernment of everybody and the comedies we are portrayed upon the screen; romance, fiction, drama, travel and feature special programs for the chil-

dren alone. These are educational plays and in many cases aid in the school work of the children. At no time need you hesitate to take the children with you for they never put questionable programs on the screen, only good, clean entertainment.

The interior appointments are indeed lovely. It is a pleasure just to visit these theatres, even if you do not especially care for movies. They have a metropolitan air and you will always find the atmosphere quiet and restful. A large patronage may always be seen at these theatres. It is only natural that people of this community and surrounding territory should take advantage of these up-to-date theatres and their lovely programs.

All phases of our every day life are portrayed upon the screen; romance, fiction, drama, travel and comics. It means entertainment for

the entire public. See these wonderful pictures at the Roosevelt, Vogue and Butterfly Theatres in Kenosha.

Here vaudeville attractions are staged frequently, the kind with a laugh and that you always enjoy seeing. This community may well point with pride to these popular and up-to-date theatres.

Mr. L. A. Turner, the manager, has had a wide experience in the theatre business, knows what the people like and secures it for them. Productions from all of the best studios are his specialty, he personally censures the pictures before contracting for them.

In this Farmers' and Business Men's Review we desire to call to the attention of the people the prominent place occupied by these modern theatres and to compliment the management upon the attractiveness of their programs. Adv.

THIEL'S STORE FOR WOMEN

Distinctive Wearing Apparel

Dress well—therefore, get your wearing apparel at 5826 Sixth Ave. in Kenosha, and you will be successful. In this day and age we must look our best—if we do not make a good appearance—all is lost. Phone 2-1137 for information.

Conspicuous among the establishments that have materially aided in the growth and progress of the community is this prominent ready-to-wear store.

They carry a most comprehensive line of popular as well as the more conservative garments. You will find their garments have a quality and style that is at once distinctive.

The same high class merchandise is to be found in every department. No matter what may be your needs you will find them most ably met at Thiel's Store for Women in Kenosha.

Here you will find the most ad-

vanced styles in lovely seasonable garments which have been procured from the style centers. They are garments of inimitable style that only master designers can create.

The woman of genteel taste will find these impeccably correct fashions in which she sees reflected something akin to herself. A simplicity that is wonderfully chic, intensely gratifying, chaste lines, perfect materials, obvious superiority of execution.

People from every walk in life will find at this popular store an old star line. Buyers for this store know styles and spare no effort or expense in securing the unusually seasonable attire for the people of this community.

The misses' department features the latest and most up-to-date modern attire procurable in the metropolitan style centers. You will ex-

claim in wonder at the beautiful things displayed at Thiel's Store for Women in Kenosha.

Their salespeople are always so-licitous and courteous. They know their stock and will assist you to make shopping a profitable pleasure.

Mr. Thiel, the proprietor of this progressive and up-to-date ready-to-wear clothing store has had a wide and extensive experience in this business. He has kept abreast of the times and established an ever-increasing business where quality, style and workmanship rule at most reasonable prices.

In this Farmers' and Business Men's Review we wish to commend this progressive establishment upon their high standing in the commercial world. It is a pleasure to bring them to the attention of our readers. Adv.

FATTENING OF FARM POULTRY

Most farm poultry is marketed from the farm alive. Much of this farm poultry reaches the market in an unfinished condition, and should be fattened before it is dressed.

Many farmers take especial care to get the maximum gain from poultry. There are three objects in fattening poultry: (1) to increase economically the total weight of the bird; (2) to distribute the fat evenly throughout the carcass and between muscle fibers so that the quality of meat is greatly improved; (3) to give the flesh the characteristic bleached peculiar to poultry fattened on a ration lacking pigment. Some form of milk should be used in the process, preferable buttermilk or sour skim-milk since it stimulates the appetites of the birds, in digestion, and is beneficial to their health.

Poultry, especially chickens, can be conveniently fattened on the farm before marketing and the maximum profit obtained. The feeding period is short and gains are easily obtained in a ten to fourteen-day period varying from 10 to 30 per cent of the live weight of the bird. According to the U. S. Department of Agriculture an average of 3.26 pounds of feed is required to produce 1 pound of gain.

To obtain the maximum gains it is necessary to restrict the exercise of the birds. This may be done conveniently by putting them in coops of a type similar to the ordinary shipping crate, but with a fine-mesh wire bottom that permits the droppings to fall through to a solid-bottomed tray below which can easily be removed and cleaned. These coops may be arranged in tiers 6 to 7 feet with troughs across the front of the coops so that the birds can feed between the slats.

Fattening Crates and Stand

The crate may be made from the same kind of material and in the same manner as the broody coop. Pans $\frac{1}{4}$ -inch deep and of the same size as each compartment, are placed on slides underneath the bottom of the crate to catch the droppings that pass through. The pans can be made of galvanized iron by any local tinner.

The number of birds which can be confined in 12 square feet of coop space varies from twelve in the case of broilers to eight in the case of hens, large cockerels, springs, or capons. The number of birds which can be confined in a given area depends also upon the amount of trough space along the front of the coop. It is necessary to provide enough trough space so that all birds can feed at one time.

The various classes of poultry require slightly different feeding methods. Confinement is essential in all cases and starving for 24 hours prior to the intensive feeding period is generally practiced.

Fattening Broilers

Young chickens weighing 1½ pounds frequently make unusual gains in the fattening crates at low feed cost. This is partly due to growth. Broilers to be fattened are usually selected when they weigh 1½ to 1½ pounds. They are placed in the crate 24 hours prior to the first feed.

A good mixture for feeding is 7 parts of cornmeal, 3 parts of mid-dlings mixed with sufficient buttermilk or skim-milk to make the whole batter so that it will pour readily out of a can. Ordinarily 2 pounds of milk to 1 pound of the dry feed is used. The birds require neither water nor grit while on this ration. Their sole ration should consist of the above mixture. The method of feeding is to feed lightly for the first day or so, at least three times a day—five times is better. Care should be taken not to over-feed. The birds should be kept slightly hungry and should clean up each portion between succeeding feeds. Usually at each feed the birds are given no more than they can clean up in 15 minutes. It requires no little skill and attention to obtain maximum results. Some feeders darken the coops between feeding periods, but this is not necessary. If milk is not available 1 part of tankage or meat-scrap may be added to the dry mixture and water used in place of milk. Buttermilk or skim-milk should be used if possible since it makes the mixture more palatable, and improves the appearance of the birds. Broilers will make economical gains up to 14 days. It is not considered profitable to feed for a greater length of time. A short feeding period does not permit maximum gains.

Soy beans are a good hay pasture, feed crop and soil improvement crop for most sections. The crop may be grown successfully on acid soil, but if the field has not grown this crop previously, it is necessary to inoculate for best results.

U-Drive Co.

Rent-A-Car for Business or Pleasure

Stop at 624 Fifty-seventh Street in Kenosha, or phone 6092, and take advantage of the opportunity that the U-Drive Company is offering you.

If you are desirous of making a trip, no matter of what length, and do not have a car of your own, you'll find that to rent a car from this modern concern is most satisfactory. Perhaps your own car is temporarily disabled and you must have a car at once, you'll find it most convenient to rent a car here and drive it yourself. This modern service is becoming more popular every day. People who have always owned their own cars now find it much more satisfactory to rent a car from the U-Drive Company in Kenosha.

This is a new, easy way to rent a car. It is business-like, a model of fairness, and simplicity itself. If you are a reliable person, qualified and competent to drive, they rent you a car without further identification—a car fully equipped and mechanically perfect. These cars are gone over by expert mechanics after each trip. They are absolutely dependable.

For a week-end trip or holiday, you can rent a car here that will enable you to start early and return late and thus enjoy your vacation to the utmost. They will furnish you this service for a very nominal sum. In fact the rates are so reasonable, you'll at once commence figuring out when you can rent one at such a small cost from the U-Drive Company in Kenosha.

Men and women in most moderate circumstances can well afford generous use of these cars. You are free to go where you like, driving the car you rent exactly as you would a car of your own. People of this community are fast learning to take advantage of this wonderful car renting service. They have a wide reputation for courteous and efficient dealings with all their patrons.

In this Farmers' and Business Men's Review we wish to refer to this firm to all our readers. They are absolutely trustworthy, familiar with business details, and have had a wide experience in this special service. Adv.

KENOSHA BOILER & STRUCTURAL CO.

Consult this reliable company, concerning structural steel and ornamental iron work, boiler repairs and heavy plate work. This company is located at 1302 Forty-second Street in Kenosha. Phone 2-1523.

Few lines of work need more expert workmen than does that of boiler making. This well known firm has acquired a high standard through its efficient and expert work. None are employed here who are not master boiler makers and repairmen.

These men are also able to judge the amount of work required, the time and material needed for the job at a minimum cost. The work is fully guaranteed and always satisfactory or made so.

Reliability is an asset always. You can depend upon the judgment of these experts. When in need of dependable boiler makers see the Kenosha Boiler & Structural Company in Kenosha.

This well known firm is equipped for installation of all kinds of boilers and their installation is second to none. They have made a study of all boilers manufactured and install only the best. Whatever your needs, a new boiler or a repair job in home, factory or public building, this firm will expertly meet your wants.

If it were not for the excellent repair work done by this firm, many hours would be lost in factories. They save the necessity of sending to the manufacturers for new parts. It is indeed a pleasure to know that all promises are made good.

They are experts in structural steel construction and ornamental iron work. Consult them for anything in this line and they will serve you very satisfactorily.

In this Farmers' and Business Men's Review we wish to congratulate the people of this community in having among them such a dependable firm of expert boiler makers and wish to recommend them to you when in need of services of this kind. Adv.

MOTHER'S EXERCISE

I wondered how my Mother got her proper exercise.

She doesn't golf or go to gym Or play a game with any vim.

And so I asked her why, one day, She looked at me so wise.

And showed me from the kitchen door,

Where, flapping in the air,

The baby's clothes hung on the line.

I soon had counted 'way past nine, She laughed like everything and said,

"My Daily Dozen's there!"

—Margaret L. Holmes.

Spraying and Dusting Potatoes

Since the appearance on the market of copper-line dusts for dusting potatoes, there has been much controversy regarding the relative benefits of dusting and spraying. Spraying potatoes with bordeaux mixture is a sound and profitable practice; dusting seems to be the practice in question.

In the plots at Wooster in 1925 no late blight developed. Some early blight appeared but not to the extent that appreciable injury was done. Hopper burn was evident, hence, the benefits of a treatment was due largely to its control and to plant stimulation.

The potatoes were planted May 13. The first treatment was put on 6 weeks later, and the successive treatments followed approximately every 2 weeks. A hand dust gun was used to apply the dusts and a power sprayer for the application of the bordeaux. Arsenate of lead was used to guard against injury from chewing insects.

All the treatments produced a considerable increase over the checks. A 4-6-50 and a 5-7-50 bordeaux proved equally effective. The copper-line dusts produced a greater increase than either of the sprays. In 1924 the increase due to dust was only 14.6 per cent, as great as the increase due to liquid bordeaux. The inconsistency of different tests at this and other stations, coupled with the fact that we have not yet had an opportunity to observe the efficiency of dust in controlling late blight, leaves potato dusting in the experimental stage. Further tests must be carried out before safe and final conclusions can be drawn. It is a procedure, however, that shows promise.

Business Is Safe

When you shake hands with your competitor and mean it—when you can work hard in your business and love it—then business is safe.

When you advertise service and give it—when you can build a reputation and keep it—then business is safe.

When you can sense competition and not knock it—when you can fight competition and still boost it—then business is safe.

When you can meet opportunity and know it—and aim for what is right and then pray for it—then business is safe.—Wisconsin Press

"Howler."

PETERSON & KINGSLEY

Think of the happiness of your family, if you buy a radio, and your home isn't modern unless you own one of these 8-Tube All-Electric Radios! They are now on display at the Green Mill Cleaners at 122 Clayton Street in the Genesee Theater Building. They are made in Waukegan, and sold direct to you. Call for a free demonstration. (Phones 100-2122-406). They feature convenient terms—small down payment.

This progressive and up-to-date radio firm can furnish you with complete radio cabinets of genuine walnut and with Peerless Magnetic Speaker. They thoroughly understand the radio business and are indeed experts in this line.

Radio is probably the greatest discovery since Gutenberg devised his crude wooden type and made printing possible. In almost five centuries there has been no single invention so closely touching human interest and welfare as this miracle.

It has brought the farmer in close touch with the market quotations. It gives market information accurately and timely, through the free co-operation of the United States Department of Agriculture and similar bureaus in the States. No farmer should be without a radio in his home. The next time you are in the city ask for a demonstration at Peterson & Kingsley in Waukegan.

They handle one of the best which means absolute satisfaction, fine reception, dependable performance, day in and day out. You may reach stations of any distance you desire, just a flick of the fingers and the power is there giving you unending entertainment. Here you buy nothing but value in radio performance, tone, selectivity, range, volume and appearance.

Radios have been the means of keeping more people in their homes contented and happy. Where they used to go out seeking entertainment they now tune in on their favorite station and sit listening and reading. It is quite popular to entertain friends in the home with a radio program.

In this Farmers' and Business Men's Review we wish to commend this firm upon their business activities in the radio field and assure our readers of their utter dependability in this business. Adv.

A very good ration for pigs just learning to eat is the following: 65 pounds corn chops, 25 pounds shorts and 10 pounds tankage.

Characteristics of Good Bread

In order that bread may assume its proper place in the well-balanced diet it is desirable that the characteristics of good bread be appreciated and that high standards should prevail. There is a wide variation in the quality of the commercial and home-made loaf of bread, and there is also a wide variation in the standard of quality which the individual requires in bread. Flavor and nutritive value, as well as good appearance, should be the goal of the bread maker whether in the bakery or in the home. A fairly small medium-sized loaf of bread is more desirable than a large loaf because a more thorough baking is assured and there is a greater proportion of crust to crumb. Bread pans ranging from 4 to 4½ inches by 9 to 10 inches are satisfactory. The baking of each loaf of bread in an individual pan adds to the appearance and quality of the loaf.

The following score card, which is a slight modification of the one devised by the American Institute of Baking, is useful in judging the various characteristics of bread.

Bread Score Card.	
External Characteristics	
Volume	10
Color of crust	8
Symmetry of form	4
Character of crust	5
Break and shred	3 30
Internal Characteristics	
Color of crumb	10
Grain	10
Texture	15
Flavor	25
Aroma	15
Taste	20 70
Total Score	100
Volume. Weight of loaf in relation to size is expressed as volume. This ratio is approximately one to four (1 gram to 4 cubic centimeters).	
Color of Crust. The crust should be a uniform golden brown on top and a lighter brown on sides and bottom.	
Symmetry of Form. A loaf of bread is well-formed when the sides	

are straight and the top is evenly rounded.

Character of Crust. The crust should be tender and have a uniform depth of about $\frac{1}{4}$ of an inch.

Break and Shred. This occurs at the line where the sides meet the top of the loaf. There should not be a sharp break in this area, but a strip $\frac{1}{2}$ to 1 inch in width showing a finely shredded surface.

Color of Crumb. The crumb should be creamy rather than chalky white. A freshly cut surface should be uniform in color.

Grain. Grain refers to the size and distribution of the cells. These should be small, thin-walled, uniform in size, and elongated vertically rather than horizontally.

Texture. The crumb should be soft and velvety, not soggy, dry, or crumbly. Bread of good texture tends to rebound, or spring back, when pressed between the fingers, rather than to remain compressed.

Flavor. Flavor is determined by order and taste and it is the most important characteristic of bread. The best bread has a nutty or grain-like flavor and is entirely free from any suggestion of sourness.

WHERE FIELD BEANS ARE PRODUCED IN QUANTITY

Michigan, California, New York, and Idaho lead in field bean production. Although Minnesota has considerable areas of land well suited to field bean production, the acreage has increased very slowly. In 1923 and 1924 it averaged 10,000 acres with an average yield of 10.5 bushels per acre. An increase in acreage to 25,000 will provide only what is needed for consumption within the state. Conditions for growing this crop are not so favorable in some of the nearby states as in Minnesota. A good market can probably be found in these states for any surplus produced here.

No farmer is genuine enough to grow quality production on scrub land.

Manure that is thrown out in the weather in a barn yard pile will lose half its plant food in six months.

Cunningham's Clothing

Clothing for the Entire Family

Starting December 27th at 5611 Sixth Ave. in Kenosha, Cunningham's removal sale will take place carrying on during the entire month of January, unprecedented values will be found here.

This modern merchandising firm is the artistocrat of popular prices. Their complete and varied stock of merchandise is sufficient proof of the coming trend of business.

They offer you timely furnishings that are noteworthy. Styles from the great fashion centers may be had in every department. From end to end it is composed of merchandise of uncommon selection and value. Every department is arranged so as to facilitate shopping for its patrons. The salespeople are familiar with their stock and will courteously serve you at all times. You need not hesitate to drop in and inspect any line in which you may be interested. At this popular store will be found ready-to-wear garments, and millinery. In fact, it is a family store where every member of the family may be clothed. For high grade merchandise at low prices go to Cunningham's in Kenosha.

This establishment is an important factor in the commercial life of the community. They offer you value, courtesy, and efficiency. They are interested in the growth and development of the community and take an active part in local activities. In making this Farmers' and Business Men's Review we desire to felicitate them upon the well merited position they occupy in the business world of this section. We unhesitatingly recommend them to the people for quality merchandise at reasonable prices. Adv.

PABST BROS. GARAGE

Kissel Sales and Service

See these new Kissel models at 5622 Nineteenth Ave. in Kenosha. They are also auto equipment dealers, and they feature repairing, storage, washing and towing. Phone 2-3613.

For particular people who desire only custom built cars, the New Kissel cars meet every desire. The New Small Kissel is a car of advanced style, refinement and mechanical excellence. It is a car built for those who appreciate individuality, with a very pronounced foreign style design, a decided quality car. It has low sweeping lines with artistic color combinations and many exclusive features. About it is a spirit of youth, vividness and fleetness.

The New Smaller Kissel Eight is a car of superior quality clear through, artistic of body, powered with a motor marvelous in power, performance and endurance. A speed of 75 miles an hour or more if you care to drive

that fast. You will find its interior one of perfect appointments giving an air of luxury and refinements. It is a new triumph in small car distinctiveness, comfort and performance. A most worthy companion to the Popular and De Luxe Straight Eight model Kissels.

Pabst Bros. Garage in Kenosha will be glad to show you this distinctive line of cars. They are justly proud of being representatives for this high grade and exclusive line. Stop in and let them prove their superiority to you.

The Popular Straight Eight model gives you a smoothness beyond comprehension and power to meet every need.

The De Luxe model is built for those who wish exceptional power and speed with advanced body design and refinements. Lower, longer and roomier, fashioned with that

European touch so admired. The latest custom built Kissels represent their tradition in creating distinctive motor car styles.

All models of the custom built Kissel are completely cushioned in rubber. This minimizes the vibration and gives a buoyant smoothness. Whether or not you feel you are in the market for a car, don't fail to see this beautiful line of cars at Pabst Bros. Garage in Kenosha.

This company is in the hands of capable management and those connected with it are men of high standing in the community. Your dealings with them will be handled in a strictly business like and courteous manner.

It gives us pleasure in this Farmers' and Business Men's Review in stating their reliability in this business. Adv.

R. J. Austin

Perfect Foot Fitters X-ray Shoe Fitting

When one is selecting a pair of shoes, there is just a few points that are considered, and too often our feet are improperly fitted. Don't be bothered with foot discomfort, but stop at 624 Fifty-sixth Street in Kenosha, and consult these perfect foot fitters, featuring X-ray shoe fitting.

Don't be bothered with foot discomfort—have your feet fitted correctly by X-ray shoe fitting, featured by R. J. Austin in Kenosha.

These are form fitting shoes so necessary to growing feet so that in later years the feet will not cause untold agony and suffering. If you would have the children's feet fitted correctly take them to R. J. Austin's in Kenosha.

Their service is pleasing and accommodating at all times. The sales people are experienced in shoe fitting and will painstakingly fit your feet for style, comfort, and durability. Their shoes will give you maximum wear at minimum prices. A trial will convince you.

In making this Farmers' and Business Men's Review we take great pleasure in pointing to R. J. Austin's in Kenosha as one of the progressive establishments of the community which may be depended upon to give the people what they want when they want it. We desire to compliment the management upon their efficient business methods.

Farming With- out Horses

(Roy E. Murphy)

Yes, it is practical to operate a corn belt farm without horses. That valley is followed by another. It is also more profitable.

And as you would be reluctant about returning to the oil lamp for light, or to traveling the highways with horse and buggy in place of your motor car, we would as reluctantly return to the use of horses instead of tractors at Forestdale Farm.

The first question that comes to your mind probably is, "How and why the idea of a horseless farm?"

In answer to this I will say that using tractors exclusively for power was simply a means to an end, and organizing the entire program of farming operations for economical production was really the parent thought, and it is this system of organization that will be dealt with principally in this article.

Before I became an agricultural student at Iowa State College, I had had practically no farming experience. I had not been there long until I realized what an interesting field agriculture could be, and my thought was that with the facilities available for keeping cost records, for getting facts and eliminating guesswork, farming operations could be organized and carried on a business basis the same as a factory.

The thought came to me that the farmer must organize his own business before he can hope to have a truly effective state or national farm

organization, and I have never forgotten for a moment that up to this time the only way the farmer can in any measure control his margin of profit is by reducing his cost of production, and with the thought of economical production uppermost in my mind, I proceeded to motorize Forestdale Farm, of which I have been in charge for the past four years.

The change from horses to tractors for power necessitated a thorough reorganization. Having disposed of ten head of horses and the labor incident to the care of them, I created a surplus of labor and, too, there was more feed for other live stock. The fertilization of the soil had to be considered, as the supply would have been greatly decreased if I had not added enough meat animals to consume the same quantity of feed.

New Plans for Poultry House Equipment

Preparation of plans for several new pieces of poultry house equipment marks the progress during the year in one phase of the investigation by W. A. Foster, chief of farm mechanics on poultry houses and equipment at the Illinois Agricultural Experiment Station. In addition to the development of new types of poultry houses and equipment suitable to Illinois conditions, the investigation includes a study of the merits and faults of poultry houses under varying conditions and a study of light and ventilation in poultry production.

The pocket gopher pays no attention to property lines. Get your neighbors to eradicate them, too.

CARE OF THE DAIRY CALF

(By J. B. Shepherd, Associate Dairy Husbandman, Bureau of Dairy Industry)

The dairy calf must have good feed and care in order to grow and to develop properly. A calf that gets a good start during the first six months has a better chance of developing into a large-size animal capable of giving a good account of itself when mature than one getting a poor start during this time.

Care of the Newborn Calf.

The calf should be born in a clean, disinfected, well-bedded box stall. Immediately after arrival it must be given attention. Sometimes a slimy membrane covers its nose. Remove this so that it can breathe more easily. Usually the cow will start to dry the calf at once by licking it vigorously. If she does not do this, dry it with burlap, straw, or some other suitable material. Shortly after birth the calf is able to stand and within a half hour it will be nursing. Sometimes the calf is so weak that it is necessary to hold it to the cow's udder in order that it may nurse. Give the calf the first milk, known as colostrum, which is very beneficial in cleaning out its system and in aiding the organs to start functioning properly. To guard against infection apply tincture of iodine to the calf's navel soon after birth.

Leave the calf with its mother 24 to 48 hours if she is progressing normally. This will enable it to get small quantities of its mother's milk at the proper temperature as often as it is needed. When this period has elapsed remove the calf, because a calf which has been left with its mother too long is harder to teach to drink than one removed soon after birth.

Teaching the Calf to Drink.

A calf that has been kept without feed at least 12 hours can usually be taught to drink quite readily. Give it fresh, warm milk from its mother and feed this from a clean pail. Back the calf into a corner, straddle it, and place the pail of milk in front of it. Dip two fingers into the milk and place them in the calf's mouth. When it starts to suck the fingers, draw its nose down into the bucket of milk. Spread the two fingers apart a little way so that the milk will be drawn up into its mouth between the fingers as the calf sucks. After it gets several swallows of milk remove the fingers slowly. Repeat this operation as often as necessary. Many calves taught by this method will drink at the first feeding.

Cleanliness the First Essential.

Cleanliness is absolutely essential in the successful raising of calves. This is equally true of the feed, pen, bedding, and pails or utensils. All milk and other feeds should be fresh and clean. Keep the calf pens clean and well bedded with dry material. Thoroughly wash and scald or sterilize milk pails after each feeding. Remove discarded feed from the feed boxes each day. Attention to these details is the best preventive of disease. Many small disturbances of the calf's stomach and digestive system which hinder growth and development are caused by bacteria due to unclean conditions.

When separated milk from a creamery is fed it should always be pasteurized, because it is practically impossible to know that such milk is free from organisms that cause disease.

Changing and Increasing the Feed.

A few calves are raised on whole milk, but it is usually too valuable to feed. Calves do nearly as well on skim milk, and most calves are raised on this feed. If fresh skim milk is not available, dried or powdered skim milk may be fed instead, or the calf may be raised on calf-meal gruels. Feed hay and grain at an early age to supplement these feeds.

Feeding Hay, Grain and Silage.

At the beginning of the third week the calf should be provided with small amounts of both hay and grain. Feed the most palatable hay on hand. Clean, bright, clover, alfalfa, or mixed hay is best. Do not feed a very young calf alfalfa hay that is too leafy as this is apt to cause scour. Feed hay sparingly at first and increase the amount gradually as the calf gets accustomed to it. Place a rack where the calf can reach the hay but can not soil it. Put only as much hay in this rack as the calf will clean up in one day.

Raising the Calf on Calf-Meal Gruels.

If skim milk is scarce, whole milk may be gradually replaced by calf-meal gruels. Although this method of feeding is not quite so satisfactory as the feeding of skim milk, fairly good results will be obtained if a good calf meal is selected and properly fed.

There are several ready-mixed calf meals on the market. Satisfactory calf meals may also be mixed at home, provided the necessary ingredients can be obtained.

WM. F. BRITTLE

Well Driller

When you are in need of the services of a well driller, be sure to consult Wm. F. Brittle on South Sheridan Road, out of Kenosha. Phone Rural 23-F-5.

Every farmer and stock raiser knows what it means to him and his farm to have a constant flow of pure water on it. Sometimes such a running well comes without assistance, but in most cases it is necessary to drill considerably for them. In this respect, let us introduce Wm. F. Brittle in Kenosha.

It makes no matter what problems you may have along these lines, you can depend upon the advice and information of this expert. In the early days we formed pools or basins in which to collect water screened

through the sand and gravel. Then with the aid of bucket and rope we would bring it to the surface for drinking and cooking. In time we discovered that such wells also drained matter from the top soil and germs soon filled our well, so instead of drinking health we were soon drinking disease.

Today I am sure no one would think of drinking out of an open well or basin unless it was fresh spring water with a constant flow. With a modern well drilled to distant depths we get below the water line and in time the water strains through several layers of sand and gravel, giving us at the top of the well a healthy almost scientifically pure water.

Possibly you can have a running

well on your property. At least you can employ Wm. F. Brittle in Kenosha to start drilling for same. Sometimes it is obtained at a reasonable depth, but in most cases it takes a deep well to produce a good flow of water.

In many well drained sections people are fortunate to be able to pump with power pumps at great depths any water at all. So we should be grateful to find water so near the surface.

As a nation we must depend upon adequate water supply, so must we depend upon master well drillers to supply the convenience. We consider their profession most worthy in this Farmers' and Business Men's Review.

Changes in Seed Potatoes During the Planting Period

One important factor in the time of planting potatoes is the condition of the seed tubers. The potato undergoes gradual internal changes during the storage period which are reflected in the type of sprouting when planted. A whole tuber in March will gradually produce but one sprout, but if held dormant until July and then planted will send out a dozen or more sprouts. With their increase in number the sprouts become weaker. Storage conditions have very little influence on this change in sprouting habit. Potatoes spread out in the light to green, those held in cold storage, and those from which the sprouts have been removed, all undergo the same change.

Cut pieces sprout in much the same manner as whole tubers. In March each piece produces but one sprout, irrespective of the number of eyes or the size of the seed piece. In May most pieces send up more than one sprout, but at this time the size of the piece is a factor, for the larger the piece the larger the number of sprouts. By July there is an excessive sprouting of weak sprouts.

A seed piece with just one eye may produce a dozen sprouts from that one eye, for an eye is really a cluster of buds.

It's obvious that methods of cutting seed and distances of spacing hills should be modified to fit these facts. Each sprout produces an independent plant, so it follows that late plantings have more plants per hill than early plantings from the same seed. Closer spacing of early plantings is therefore to be recommended.

These changes in sprouting habit account for the frequent disappointments when northern grown certified Early Ohio are planted in late July or August for a fall crop. The storage period has been too long and the sprouts are weak.

DID YOU EVER THINK IT OVER?

When someone stops advertising. Someone stops buying. When someone stops buying. Someone stops selling. When someone stops selling. Someone stops making. When someone stops making. Someone stops earning. When everybody stops earning. Everybody stops buying. Then the bread line.

Kohlman-Chandler Co.

Chandler Sales and Service

Be sure to stop at 5708-5710 Fifth Ave. in Kenosha and see these new Chandler models the next time you are in the city. Phone 2-2313.

This automobile establishment is one of the foremost in this section and represents the Chandler automobiles, the first car to adopt the "one shot" oiling system and now American's first car to offer Westinghouse Vacuum Brakes.

These brakes have been used on speeding trains, subways and busses for years and now these real brakes are standard equipment on Chandler cars. Westinghouse Vacuum Brakes are easier, surer, smoother and operate with less foot pressure than other brakes. Heretofore they were only used on expensive European cars.

If you want to know effortless driving, absolute control, ability to stop quickly and smoothly, with a feeling of protection, drive a New Six or New Royal Eight by Chandler. These cars are now on display at the Kohlman-Chandler Company in Kenosha.

In this new Chandler you have a new degree of highest powered magnificence, the unmistakable creation

of master body designing, master engineering, master craftsmanship. New smartness is exhibited all through this new line of Chandlers, both in the series of charming Sixes and resplendent Royal Eights. All are abounding in luxury and invested with unmistakable look, air, poise, the manner of bred-in-the-bone thoroughbreds. Before you purchase a new automobile, see these magnificent new examples at the Kohlman-Chandler Company in Kenosha.

Not only will you find new style appeal, but new power appeal, as well as the appeal of alluring new prices. For your own benefit be sure you drive a new Chandler before deciding upon any car.

Chandler owners have always been most enthusiastic over the "one shot" centralized lubrication system. Now added to that the Westinghouse Vacuum Brakes, a new smartness of body design demonstrating new power and you have a car with which to do some real comparing.

The management of this establishment is thoroughly conversant with auto values as well as sales and service. Pay them a visit.

LEE SHOP

Don't forget the Lee Shop, 2nd Floor, No 5 Genesee Street—Next Door to Rubio's in Waukegan. See them for frocks, hats, coats and hosiery.

Foremost among the valued institutions of this community is this fashionable clothing and millinery shop. They carry a most comprehensive line of fashions' latest note in quality clothing.

In soliciting the patronage of the smart women of Waukegan and surrounding territory, the Lee Shop respectfully suggests comparison after a shopping tour of more exclusive shops. By this you will find that nowhere do you find such lovely styles, qualities, or tailors as those of this establishment.

You will find here gowns, wraps, coats and hats for every occasion. Their collection excels in variety and distinctiveness and they are always moderately priced.

Their style experts are always alert to every new fashion trend and in constant touch with the mode of the moment. For your inspection you will find replicas of the authentic Paris fashions, a magnificent display of authoritative fashions from the foremost designers.

These are to be had in all the lovely new colors and materials. Perhaps it is just a new cut of sleeve that transforms the garment into the most distinctive gown, perhaps just a new note upon the neck line. They are all uncommon and individualized at the Lee Shop in Waukegan.

Here each season brings its novelties as well as conservative garments. There are always garments for every occasion whether it be for sport, afternoon or an evening affair.

They feature a most selective line of hats in their millinery department. They will gladly assist you in a becoming selection but never obtrude upon you. Correct hats are the specialty of the Lee Shop in Waukegan.

Here the service is individual. Their salespeople are familiar with the correct styles and their suitability to the customer. They know the value of a satisfied patron and would much prefer not to make a sale than not have their customer satisfied with their purchase.

We take great pleasure in this Farmers' and Business Men's Review in commending this up-to-date and modern store upon their distinctive styles and the service they render. People of this community may well be proud to have such a fashionable establishment among them.

It will pay to milk heavy producers three times daily. This gives from 15 to 20 per cent. more milk and it is far more humane.

Kenosha Concrete Block Company

6620 Thirty-sixth Ave.—Kenosha—Phone 8046

When you are contemplating building, be sure to consult the Kenosha Concrete Block Company first. You will like their products, they are durable, as well as attractive.

Since the first production of Portland cement by Joseph Aspiden of Leeds in 1824, cement has become one of the chief building materials. Concrete blocks are now a favorite product for building basement walls as well as entire buildings.

At this modern and up-to-date factory you will find the best to be had in cement products. Their blocks are made of the properly proportioned ingredients that make them of uniform quality and foremost among products in this line.

Their factory is equipped with the latest and best machinery for the production of cement products of surpassing quality. If you want the best in this line go to the Kenosha Concrete Block Company in Kenosha. They fully understand the manufacture of cement blocks and produce a quality second to none. In fact, their products are recognized standards of quality and because of this are used extensively all over this section of the state. These products are to be depended upon and resist both frost and water.

For buildings there is no more durable material than cement blocks. This Farmers' and Business Men's Review not only give you a beautiful and imposing structure but one that requires practically no up-keep. They give you a fireproof building which requires no painting. If you yourself with their products.

would build substantially, a building that will stand for years to come build with cement blocks.

They are especially adaptable to the farmer, ease of construction, requiring less time to erect buildings than any other one material and no time is required on annoying details of fixing up this or that. If you think of erecting a building of any kind get in touch with the Kenosha Concrete Block Company in Kenosha. Let them show the many advantages of this superior building material. There is no question but what you can build better and more economically with these products than with any other material. They are absolutely satisfactory and backed by this progressive concern.

The management has always had at heart the best interest of the community and has exerted every effort to advantageously serve the people. This concern has been of immeasurable value in the progress and development of the country.

They render prompt and efficient service at all times. The purchase of a small order will be accorded the same courteous and pleasant service as the large contractor purchasing supplies for a large construction.

We are pleased to compliment the Kenosha Concrete Block Company in this Farmers' and Business Men's Review upon the quality of their products and their superior service. We wish to direct your attention to them and suggest that you familiarize yourself with their products.

LAKE COUNTY STATE BANK

North Chicago, Illinois

Systematic saving is what counts—get the habit today—then you will not be inconvenienced or embarrassed at any time. The Lake County State Bank are ever ready to serve you. Phone North Chicago 243.

This is more than a bank of dollars and cents it is a financial pillar of this entire section. It has aided many agricultural and industrial developments through financial difficulties and enabled them to grow into the modern and progressive factors of the day.

The Lake County State Bank is a forward looking bank, conservative in policy but always progressive in the unfolding of their service and in its attention to the needs of their customers.

You will find it a complete banking service planned for the future of North Chicago and for your own benefit.

They know, through long contact,

problems of those engaged in mining and benefit industries and it has been their privilege to help many over tight places in their careers. In and its reputation of long and continued successful service to the people have helped them grow and prosper and become the safe financial institution that they are.

The atmosphere of this bank is attractive and refined. You will quickly recognize its attentive attitude. It is chartered by the state and acts under the state's supervision and gives you all advantages of state laws.

They feature a savings department together with their regular banking business. They advise a systematic savings whereby you deposit a certain amount regularly. However a savings account may be opened by the deposit of one dollar in that department. They pay liberal interest on all savings and you are assured that your money works with safety when

you deposit it with the Lake County Bank in North Chicago.

They are a strong, reliable bank and its reputation of long and continued successful service to the people of this section makes it a most desirable institution.

Their service is pleasant courteous and accommodating. If you have a problem which seems too much for you, visit this progressive institution and talk things over with them. They are in touch with all phases of industrial and commercial life and will be able to give you sound advice.

The officers of this institution are men of affairs who have made a study of the banking history and seeing the present day needs sustain a modern day institution. In making this Farmers' and Business Men's Review we wish to commend them upon their successful efforts.

FUHRMAN'S DEPT. STORE

A Department Store That is Complete

Shop and shop at 6100 Twenty-second Ave. while in Kenosha, and you save money. Fuhrman's Dept. Store is sure to have just what you want, and at prices you can afford to pay.

This popular and dependable store has attained its prominence among the leading business houses through serving the people with the best possible qualities of goods obtainable at the most reasonable prices. You will find in this leading department store most complete stocks, consisting of quality goods of standard reputation, which affords this and the adjoining counties a real shopping center. Here is a modern establishment which keeps fully abreast of the times and its various departments will be found

complete with the popular models of which this store was built, always the latest edicts of fashion priced moderately.

Nowhere will your dollar have more units of buying power than at Fuhrman's Dept. Store in Kenosha. Should an error occur it is cheerfully and courteously corrected. In each and every department of this store you are accorded the same accommodating service, the same modern and up-to-date styles, and the same moderate prices.

In this Farmers' and Business Men's Review it is a pleasure to compliment the management upon the high quality products they so ably represent. Adv.

Service, quality and reasonable prices were the foundation upon

Good Suggestions for Winter Layers

The successful poultryman knows that the winter eggs are the profitable eggs. He knows, too, that to secure a constant supply of eggs during winter the laying hens must be kept comfortable. The condition of the poultry house at this season is therefore of great importance.

"A hen that uses up the food given her to keep her body warm cannot be expected to lay many high-priced eggs," says Prof. D. S. Weaver, of the department of agricultural engineering at the North Carolina State college. "We should look at the condition of the poultry house and see that there is plenty of litter on the floor; that the walls are tight to prevent drafts and that we have windows to admit light and air. These are requisite for heavy production of winter eggs."

Professor Weaver states that the windows should open on the south side of the house and should be equipped with curtains so that they might be raised during the day to admit sunlight and air and closed at night to keep out the cold.

Longer working days for the hens may be secured by installing electric lights, states Professor Weaver. An automatic switch may be used to turn on the lights before daylight and a switch will

turn them off at dusk and add to the egg production when the proper amount of good feed is supplied.

"Nor should we forget that hens like plenty of water in winter," says Professor Weaver. "This water should be cold but fresh and pure each day."

FARM-CROP YIELDS PER ACRE GRADUALLY INCREASING

In the older sections of the United States, the farms are not wearing out but are producing greater yields per acre, according to reports. Since 1885, the average yield of corn has increased eighteen per cent., wheat, seventeen per cent., oats, fourteen per cent., and potatoes, thirty-nine per cent.

Simon Furniture Company

New and Used Furniture

When desiring household furnishings be sure to consult the Simon Furniture Company at 1100 Fifty-fifth Street—corner 11th Ave. in Kenosha. You will have a complete stock of new and used furniture from which you may make your selection.

The establishment of this well-known company is one of the most valued institutions in this community and worthy of more than passing notice in this review.

Their establishment is maintained for the exclusive purpose of furnishing the public with good used and new furniture at moderate prices. They aim to offer only good merchandise that will give the purchaser a lot of good service as long as they want to make use of it.

The Simon Furniture Company has a complete stock of new furniture. Don't forget to consult this company before you buy.

The Simon Furniture Company carries a good stock of furniture. In some instances it is in such excellent condition you would hardly think that it had ever been used, and had been used only a very short time when the owners were called away and had to dispose of their furniture.

If you are needing some furniture and do not care to invest in new,

visit this progressive establishment. You will be amazed at the values offered you here. If you would like some of the popular colored furniture in the bright lacquer shades make a selection of the pieces wanted here. You can then apply the lacquer yourself at very little expense, and the furniture will be much more durable than the unpainted pieces offered in the department stores.

This firm is rendering a most essential service to the community by the efficient methods upon which they operate. If its furniture you're looking for visit the Simon Furniture Company in Kenosha.

They also feature stoves at bargain prices. See them and save.

Perhaps you have something which you would like to dispose of—if so call the Simon Furniture Company and they will come out and see about it. You will find them an excellent market.

In charge, Mr. Simon, a prominent and well known business man of the community, whom we wish to compliment in making this Farmers' and Business Men's Review and assure our readers that they can make no mistake in paying a visit to this up-to-date establishment. Adv.

USED AUTO MART

Why invest your earnings in a new automobile, when you can and are able to get all makes and models in either cash or time payments, at 5813 Fifth Ave. in Kenosha? They have good used cars at prices you can afford to pay. Phone 3047.

This firm is one of the busiest in this part of the country. It handles various standard makes of cars that will give you most dependable and lasting service. All are used cars which simply means that the other fellow has taken the first, that is to say, the large depreciation. If you want a dependable car, one that will give you efficient performance, call on the Used Auto Mart in Kenosha.

Their cars are worthy of anyone's inspection. They are in excellent condition; in many cases in better running order than when purchased new. These cars will give the purchaser superior service at a price within the reach of all.

The management of this concern is in the hands of competent men who know the car business and upon whom you can depend. They are straightforward, upright business men who have the reputation of being experts in this business.

In this day of thrift it seems like a pure waste of money to buy a car new when you are able to purchase cars which have gone but a few thousand miles, at approximately half the original price. Most of these cars have the original paint; all are of excellent appearance. You can do better in used cars at the Used Auto Mart in Kenosha.

This firm has built a large and increasing business by reason of their high quality used cars at reasonable prices. There is probably no other business in which dependability counts as it does in that of used cars.

These cars may be purchased upon the deferred payment plan. Hence, again the use of the budget system by which a certain amount is allotted to the different expenses. In this way one scarcely notices the cost and you can have the use of the car in the meantime.

In this Farmers' and Business Men's Review we are pleased to compliment this firm upon their efficient and progressive business methods and unhesitatingly recommend them to you when in the market for a used car. Adv.

ROOT AND TUBER CROPS

Seed Potatoes.—Evidence obtained by the Utah station in Cache Valley indicated that with Rural potatoes mosaic and other diseases can be avoided by hill selection.

The Nebraska station found that seed potatoes about equal in productivity were produced in all parts of the State. Most "running out" of seed potatoes seemed primarily due to disease, environment being a secondary factor in providing conditions for infection and insect carriers. No lots of seed potatoes obtained were entirely free from all known virus diseases. As was also the case at the Utah station, greenhouse tuber indexing appeared entirely satisfactory for eliminating the various mosaic diseases.

Time of planting on dry land and quality of seed potatoes.—A time of planting study with potatoes on dry land in western Nebraska showed that tubers of lots planted on or before June 15 were practically matured by October 2. Tubers from early plantings were lighter in color, considerably more elongated, and scabier than from lots planted later. More clean "seed size" tubers were produced with each later planting date.

Influence of soil type on seed Potatoes.—Studies at Cornell University showed that potatoes grown on muck and upland soils had whiter flesh, greater meanness, and better flavor than those from heavier soils. The lighter, better aerated soils employed seemed better for seed production than the heavier soils. Prejudice against muck-grown seed potatoes did not seem warranted.

Type of Seed Potatoes.—At the Nebraska station elongation of tubers as indicated by a reduced W-L ratio could be caused under controlled conditions by raising soil temperature, increasing soil moisture, and heavier soils. Place appeared to exert a decided effect and culture to have some influence on type. In type dry-land tubers generally surpass irrigated tubers, and in western Nebraska late plantings average better than early plantings. Such differences in type or shape in normal tubers are held to result from immediate environmental conditions of a temporary nature and not to affect yield.

Maturity of Seed Potatoes.—Observations at the Maryland station on Irish Cobbler tubers dug at six growth stages from full bloom to the time when vines were brown and dry, indicated that the ripening and maturing processes in potatoes may continue during storage, so that by the end of the rest period immature potatoes large enough for seed have practically the same percentage composition and respiratory response as potatoes allowed to mature on the vine and stored similarly.

Dormancy and Tubertization of Potatoes.—Exposure of potato tubers to certain gaseous hydrocarbons and esters at the California station was found very effective in "terminating" the period of dormancy. A study of tuberization in the potato revealed a great accumulation of polysaccharides in the leaves and in the underground stem incidental to tuberization. While no starch was found in the leaves and above ground stems and little in the main underground stem or in the roots, the stolons were liberally supplied. Potato plants brought to tuberization in the warmer part of the summer formed no tubers and accumulated little carbohydrates.

Fertilizers for Potatoes.—Potatoes receiving ammonium sulphate at the New Jersey station yielded considerably less than those getting sodium nitrate, fish scrap, or tankage. However, tubers from sodium nitrate plants were severely injured by scab, while the reverse was true on ammonium sulphate plants.

Sweet Potato Fertilizers.—Ferti-

The First National Bank, at South Genesee in Waukegan, encourage you to save for the rainy day. Phone 3800.

This is one of the oldest and most widely known institutions of its kind in this section of the country. It has and does serve the public in all capacities. It has the reputation of being a conservative, reliable institution of a democratic viewpoint.

This bank was established at the beginning of the community's growth and has developed and prospered as the community itself has prospered. Its adequate banking facilities it has played a most important part in the growth and development throughout the territory.

It executes all the functions of the usual bank. Here you may deposit

FIRST NATIONAL BANK

your money on a checking account, time or demand certificates. They deal in foreign and domestic exchange, make loans or act in a fiduciary way. Their savings department is one of the most patronized of any one division. In this department they have encouraged the opening of savings accounts of dollar, knowing that once the account is opened, saving is not only easy, but the mounting dollars are such an incentive to further saving that the patrons soon join the ranks of the thrifty. You may also rent safety deposit boxes at the First National Bank in Waukegan.

The officers of this institution are men of faultless character and are a good judgment. Every precaution is taken to assure the safety of funds entrusted to their care. They are but the mounting dollars are such an incentive to further saving that the patrons soon join the ranks of the thrifty. You may also rent safety deposit boxes at the First National Bank in Waukegan.

This reliable institution has been the mainstay for industries of the community. It has helped them over many a tight place. It has assisted

the farmers in the development of their lands. There is no other one institution that has accomplished more toward the onward progress of this section than the First National Bank in Waukegan.

The officers of this institution are men of faultless character and are a good judgment. Every precaution is taken to assure the safety of funds entrusted to their care. They are but the mounting dollars are such an incentive to further saving that the patrons soon join the ranks of the thrifty. You may also rent safety deposit boxes at the First National Bank in Waukegan.

In this Farmers' and Business Men's Review we wish to congratulate the people of this community upon having such an institution among them. Adv.

Raising Orphan Lamb

If the orphan lamb cannot be given to another ewe, it can generally be raised satisfactorily on a bottle. Of course it is better to get another ewe to adopt the lamb if possible.

When necessary to raise a lamb on a bottle, it will need to be fed several times a day at first. The number of feedings can be reduced until, by the time the lamb is six weeks old, three or four times a day will be sufficient.

A lamb creep should be provided where some ground grain can be kept for the lambs. They will soon learn to eat grain and this will help a great deal in getting faster growth.

Many a good dairy herd has been set back materially in only one generation by a poor bull.

Crop rotation systems, manuring, fertilizing, are some of the ways that the natural fertility of the soil may be restored.

Fall Fertilization of Fruit Trees

The question has been raised recently as to the value or desirability of applying fertilizer to fruit trees in the autumn after growth has ceased, as compared with the usual spring applications. The station has had some work in progress along this line for the last four years on the apple and for two years on the peach. This is entirely inadequate for conclusions yet a preliminary statement of the results may answer the question of its advisability in Ohio, at least for the immediate future.

From earlier teachings regarding the readily available nitrogenous fertilizers like nitrate of soda and sulphate of ammonia one would expect such a complete leaching that fall applications would be lost. However, the appearance of the fall treated trees was practically indistinguishable to the eye from that of trees receiving the same amount of nitrogen in the spring. The yield of apples on fall-treated trees was about equal to that of spring treated trees, and much in excess of that of untreated ones. The peach trees treated in autumn looked nearly as good as those treated in spring; but this year, when an extreme drought existed through much of the summer, the spring applications gave markedly better results in size of fruit and total yield.

As yet no points of merit for the practice of fall fertilization, but some practical objections to it, have appeared. However, the work will be continued for a few years to determine with more definiteness its value.

Substitutes for Milk

Keeping cows has never been considered a recreation. They have been kept because the experience of mankind showed his dependence upon them and their product. A person can get along with substitutes for milk and butter for some time but after a while a craving for the real product of the cow develops. People who at first note no difference between butter and butter substitutes, after a number of months often come almost to loathe the sight of a substitute.

Nobody has more poor relations than a scrub bull.

A. M. Rudberg

Fine Photographs!

Treat yourself to the best, and ways appreciated, more especially when it has the truthfulness of personality about it, that is caught at this studio.

Do you realize how we have ascended from the old fashioned photograph gallery of stiff unnatural poses to the modern up-to-date photograph studios of the present day? Today the very atmosphere of the studio makes you feel at home. You may merely stroll in as if you were making a call on a friend; sit down, forgetting that you are in front of a camera and are photographed gracefully and flatteringly. You will find a very delightful experience to be pleasure, for it is a pleasure when you visit A. M. Rudberg's in Kenosha.

Many people who have thought they did not photograph well have had successful photographs made in this studio. They seem to be able, here, to catch the gleam of light and life that is the "you" your friends see and love. In this homelike studio, with the artist's hand on the camera, charmingly natural photographs are produced always.

A photograph of yourself, of the baby, mother or any member of the family makes a lovely gift and is al-

ways appreciated, more especially when it has the truthfulness of personality about it, that is caught at this studio.

There are so many reasons why one should be photographed once a year. We all forget just how we are changing and we never know when someone we love may be taken away from us or we may have to leave our good friends and relatives. A photograph is sometimes the only contact we may have with a person who has been very dear to us and how badly we should feel if that person had not left us a picture. Don't be careless and lazy about this important thing, for it is a pleasure when you visit A. M. Rudberg's in Kenosha.

Then too, you must have the children photographed, it is the one way to hold the memories of the baby days and those of early childhood. Let A. M. Rudberg photograph them regularly. There is no time like the present to begin this important habit. Make an appointment today.

We take pleasure in complimenting this studio in this Farmers' and Business Men's Review upon their very flattering success. Adv.

NORTH SHORE BURIAL VAULT CO.

McQUESTION BROS., Proprietors

Your Every Wish Considered in the Completion of a Burial Vault

The North Shore Burial Vault Company is located at 58th Street at 40th Ave. in Kenosha. Phone 3561-2-1860.

Concrete products are among the most important in the substantial up-building of any community. This up-to-date factory manufactures various concrete units so essential to the present day building methods.

They produce quality concrete products which stand the test of time. In this day and age no business building is built without its concrete supports and reinforcements in fact, it is perhaps the most generally used material in heavy construction. You may depend upon the concrete building units furnished by the North Shore Burial Vault Company in Kenosha.

Their factory is thoroughly equipped with modern machinery necessary for the proper mixing and shaping of these products. They keep in touch with the developments and research work along these lines and you

may always be assured of securing not only the best, but the most artistic and efficient styles. They will be glad to have you consult with them at any time regarding these products.

They are not only headquarters for concrete building units but also manufacture one of the best concrete Burial Vaults on the market today. These vaults give absolute protection for all time. In the first place, they prevent the fall of the grave. They are water-proof, rust-proof, time-proof and become harder with time. They provide perfect protection for the remains of loved ones against water and the ravages of the earth.

This vault is the latest, most scientific and efficient concrete burial vault that can be secured. Made as it is, of a heavily reinforced special concrete mixture, designed to prevent cracking by shrinkage strains. They are attractive in appearance, made so by painting both inside and out and are both a protection and a

token of respect for our departed loved ones. If you would give absolute protection for loved ones in their last resting place, place the remains in a burial vault manufactured by the North Shore Burial Vault Company in Kenosha.

Here also you may secure concrete flower vases for use around the yard or urns for the cemetery.

They are a straight-forward business concern with a most enviable reputation for fair dealing. Their products are products of merit which fairly speak for themselves.

Feel free to consult with this establishment at any time. They can give you very valuable information regarding these products. They are experts in concrete work.

We take pleasure in giving extended mention in this Farmers' and Business Men's Review to this very worthy establishment. They well merit their large and increasing patronage. Adv.

Gordons

Everything for the Auto

At Gordons, located at 2801 Roosevelt Road in Kenosha, you will find they feature new and used parts, tires and batteries, in fact, everything for the motoring public. Phone 4014 for service and information.

A few years ago one wishing replacement parts or repairs for his machine was forced to send to the factory or if it were an obsolete model or car he might have to have patterns made or parts forged and machined in some machine shop. This involved much loss of time and could not help but be very expensive. At the same time the finished piece could not possibly equal the factory made part because the modern factory has special material specifications for practically every part that enters an automobile.

Today you have simply to visit the establishment of Gordons in Kenosha and select the parts you need. This is but another indication of progressiveness.

This modern parts house may be said to act as a clearing house between the parts manufacturers and the garage men or owners.

The manufacturer may specialize in nothing but axle shafts and gears, another in nothing but bearings, still another in pistons and so on, but in

each case they can duplicate exactly the specifications as to material, heat, treatment, etc., thereby furnishing the user with an article equal to that of the car manufacturer.

This progressive auto parts company has studied the needs of the automobile owner, and invested the money necessary to carry this enormous stock. They are thereby able to save days and possibly weeks of time and expense and deliver to you the highest grade material. No matter what part you may need for your car you will find it at Gordons in Kenosha.

They carry a most complete line and you will find their service courteous and accommodating at all times. The managers of this progressive establishment take an active interest in the growth and development of the community.

This well-known establishment is conveniently located and if you are in need of anything in this line you will find it to your interest to visit them.

In making this Farmers' and Business Men's Review we wish to commend them for the magnificent work they are doing and the efficiency of their methods. Adv.

LANTOW
FURNITURE REPAIR

Furniture repairing and refinishing and re-upholstering of old furniture is very satisfactorily taken care of at 2013 Sixty-third Place in Kenosha. They are also makers of new parlor furniture. Phone 2-1922.

Here is one of our modern-day firms that specializes in the production of new upholstered furniture and the re-upholstering of old. Their work is the finest of its kind to be had in this section.

They are experts in this line of work and tailor upholstered furniture to meet the individual taste of their customers. Their furniture is much in demand because of its individuality and artistic designing. At all times they carry a large assortment of lovely fabrics from which you may choose the coverings you desire.

You will find living room suites and odd pieces made up which they will be glad to copy for you, either in the same materials or in those which you may select. If you have ideas of your own they will be only too glad to incorporate them for you. Any suggestions you may have will receive prompt and courteous consideration.

The superiority of their upholstery is made manifest by every comparison. It is quality work and if you are in the market for upholstered furniture you cannot do better than see the Lantow Furniture Repair in Kenosha.

They do all kinds of repair work on old furniture, whether it be one piece or a suite. Perhaps you have an old piece of furniture which has been handed down in the family and while you wish to keep it, yet you would like the worn parts renewed. This competent firm will absolutely restore it for you. They will also re-

upholster your present living room suite with the latest fabrics so as to make it an absolutely new suite. For estimates call on the Lantow Furniture Repair in Kenosha.

You will be very pleasantly surprised at their moderate prices both in the new furniture and the re-upholstering of the old. Estimates are cheerfully given, without obligation.

In making this Farmers' and Business Men's Review we desire to commend this valued establishment upon the quality of their work and unhesitatingly recommend them to the people for all kinds of upholstery. Adv.

Bovine Tuberculosis Is Fast Being Eradicated

Bovine tuberculosis is now being eradicated from the herds in the United States. In some states the infection of bovine tuberculosis is found in 16 per cent. of all the cattle. This is the case in the state of New York. Most of the Southern states have less than 1 per cent. and some have less than one-half of 1 per cent. It will require many millions of dollars, however, to eradicate the disease. Some four million dollars are being spent annually and the work has just started. In New York state trainloads of infected cattle are shipped and slaughtered where many of them are condemned and tanked. The South is exceedingly fortunate, because this disease has been kept out of the various Southern states by live stock sanitary laws. Also many states have been testing most of the milk cows and pure-bred cattle and destroying all of the reactors.

A well-kept lawn is worth the time it takes

How To Fatten
Lambs On Forage

Fattening lambs on forage that often would be wasted unless so utilized, is a practice which has proved exceptionally profitable to many North and Central Missouri farmers. This practice has one big advantage over other systems of feeding in that the cost of production is extremely low because so much cheap forage is used. The advantage of turning weeds, grasses, and surplus forage into money and manure is evident. The Missouri Experiment Station has not been able to test this method of fattening lambs. However, in order to furnish information concerning the method, the knowledge gained from the experiences of a number of Missouri farmers who have been successful lamb feeders has been summarized.

Improving The Quality of Forage

The forage most commonly used is the undergrowth in corn fields. In many cases special forage such as soybeans, cowpeas, or rape are sown with corn to provide a better class of forage than that afforded by the weeds and grasses that naturally spring up in the corn fields. In planting these special crops, the main point involved is whether the forage crops will reduce the yield of corn and if so to what extent. Since so many factors are involved, and available data relating to this question are so limited, few definite statements can be made. General experience supports the following facts:

Soybeans planted at the same time as corn—in the hill or in the row—will doubtless reduce the yield of corn both in grain and fodder. The degree of reduction will depend on the relative capacity of the land to support the additional crop. On ever fertile land containing plenty of moisture, there would probably be little reduction in yield of either crop—corn or soybeans. It is obvious, however, that yields of both crops would be reduced on land where the fertility and available moisture were capable of supporting only the corn crop. The season also would have a relation to the reduction in yield, probably even more direct than that of the soil; for moisture is likely to be the chief limiting factor in the success of the double crop.

Soybeans planted in corn at the last cultivation, under conditions of soil and season ranging from very favorable to average, would probably reduce the yield but little, if any. Under conditions below the average there would be comparatively light saving to shading by the corn, reduction of moisture by the corn, and the short period for growth.

As compensating factors for a reduction in yield of corn, there are:

- a. The added bulk and richness of the soybeans,
- b. The double use of the land,
- c. The double use of cultural methods—preparation, cultivation, etc.,
- d. The manure from the grazing animals.

The relation of cowpeas to the yield of corn would doubtless be the same as that borne by soybeans.

Selecting The Forage Crop

The second question concerns the forage crop to be used. Cowpeas and soybeans will thrive on less fertile soil than rape. Rape has the advantage of withstanding frost, but it requires a moist and extremely fertile soil to grow the crop successfully in a corn field. Hard frost will kill the leaves on the soybeans and cowpeas; the dead leaves drop, leaving only the seed pods and the stems. Lambs will not fatten on the stems and, unless there is an exceptionally good seed crop, will not get a great deal out of a corn field after the first few hard frosts. A combination of the two classes of feed has proved advisable in many cases. On soil not sufficiently rich to grow successful the rape in the corn, it be sown as a special crop to be used in finishing the lambs. Most lamb feeders prefer the soybeans to cowpeas. Soybeans stand more erect, thus giving less trouble during cultivation if planted with the corn, and being subject to less waste by lambs tramping them to the ground.

Variety To Plant

For early planting with corn, a good variety of peas is the Whippoorwill; of soybeans, the Medium Yellow, Mikado, Morse, Wilson, or Virginia varieties are recommended. For late planting, the New Era cowpea (Blue pea) and Ito San soybean are satisfactory. When planted at the time of planting corn, the beans or peas can be dropped from the same hopper as the corn, or from a hopper on a special attachment. By the first method, beans and corn are planted in the same hills or are drilled together in the row; by the second, in alternate hills. The rate of planting the beans is ten to fifteen pounds per acre. When plant-

THE FIRST NATIONAL BANK

ESTABLISHED 1852

"Kenosha's Oldest and Largest"

The first step to a successful career is a bank account—open an account today with The First National Bank in Kenosha—a dollar will do. Phone 6141 for service and information.

There are certain definite advantages in associating with a National Bank. Here you can enjoy every modern banking facility plus the additional features of strength and security.

The First National Bank is a National Bank chartered by the Federal government under whose close supervision it operates. They have as members of the Federal Reserve System enormous resources behind them and are thus able to protect their depositors to the fullest extent, regardless of the business or financial conditions of the country.

The history of this bank has been bound up closely with the prosperity and progress of this and surrounding

territory. Their years of service to the people have been marked by efficiency in routine transactions and sound judgment in emergencies and opportunities all of which gives maximum value to a banking relationship.

You will find the personality of this financial establishment reflected in the same cordial and sincere manner in which your business is handled. The friendliest of relations is desired with every customer by The First National Bank in Kenosha.

The Board of Directors is composed of successful local business men of recognized ability and integrity. They have elected, as active officers, bankers with years of experience.

The First National Bank is going forward with Kenosha. They represent the vision of an organization with a high purpose—the harmony of service and safety. It is a bank where safety and service

meet.

Here your savings are safeguarded. You have a National Bank Safety for your savings. A friendly welcome awaits you.

The people of this community are fortunate in having this prominent financial institution among them. They are an evidence of financial stability. Your money works with safety when deposited in this strong reliable bank where safety rules.

This bank is conveniently located at 5522 Sixth Ave. in Kenosha. For years they have provided strong, conservative investments for local people.

We take great pleasure in congratulating The First National Bank in this Farmers' and Business Men's Review upon the high position their noteworthy business methods have merited. Adv.

FREDERICK'S ART
AND GIFT SHOP

While on your shopping tour in Kenosha, be sure to visit Frederick's Art and Gift Shop, located at 611 Fifty-eighth Street. Phone 2-1941.

No review would be complete without comprehensive mention of this lovely and practical gift shop. It provides the many necessary and attractive articles needed for remembrance of anniversaries, birthdays and many other occasions.

The merchandise found here is distinctive. Each article is a piece of art; the hand embroidered linens, are all creations of the craftsman's art, the children's dresses, bonnets, wraps and accessories are the most select to be found anywhere. You have a large selection from their complete stocks.

Frederick's Art and Gift Shop located at 611 Fifty-eighth Street in Kenosha with untiring efforts secures the markets to secure the newest and most attractive stocks for their store. That they are successful you will see at a glance upon entering their store. Nowhere outside of the metropolis do you see such a wonderful display.

The inherent ability of Frederick's Art and Gift Shop in Kenosha for selecting the beautiful gives them assured success in this business. If they do not happen to have exactly what you wish in color or size, they will gladly order it for you or have it made up in any combination of colors or size you may wish. If you love beautiful things, and who of us does not, you will find it a pleasure just to visit this store and look around.

Pictures, frames and framing is an attractive feature that is well worthy of special mention. Be sure to see the frames that are available here, and they will be glad to take care of the framing for you, to your entire satisfaction.

A large assortment of lamp shades and lamp bases are always in stock, giving the discriminating customer the opportunity to choose from these pretty articles, to fit her individual taste.

Here the service is very pleasant and they will be glad to look around with you and offer suggestions if you wish. You may feel free at all times just to come in and look at the beautiful things. When it comes to gift

buying there is no one store where you have the beautiful selection for so many occasions that you have at this lovely store.

In conclusion we wish to compliment the management upon their most flattering success and through the Farmers' and Business Men's Review recommend them to the people. Adv.

Wide Variations
In the Cost of
Producing Pork

Wide variations in the cost of producing pork are shown in a survey made by the Department of Agriculture of farms in Henry county, Iowa, and Warren county, Illinois, said to be typical of corn-hog farms throughout the corn belt.

The gross cost of producing 100 pounds of marketable pork on 44 farms in one year ranged from \$3.07 to \$13.55, with an average of \$5.49. Production costs on 39 farms in another year ranged from \$4.86 to \$10.02, with an average of \$6.32. The figures are for the years 1921 and 1922 and are presented merely as showing the variation in costs.

The variation, the department says, indicates the influences of care and management in the hog lot. The farms were within a short distance of each other; it was possible to follow very similar methods within the region, and yet some farms shipped hogs to market costing more than twice what they cost other farms.

Detailed results of the survey have been published in Department Bulletin No. 1381, "Cost of Producing Hogs in Iowa and Illinois," copies of which may be had free, as long as the supply lasts, upon request to the Department of Agriculture, Washington, D. C.

GOOD BUILDING TODAY
NOT ONLY FOR WEALTHY

Good building was once thought of as something difficult to produce and too costly for any but the envied rich to have. Yet today notice the little cottages and bungalows that are being erected everywhere, constructed of nationally approved building materials and possessing a charm that makes the "castle" of a decade or two ago look like last year's Christmas trees.

HUDSON-ESSEX MOTOR SALES

AND

DIESTLER TIRE COMPANY

Distributors of Hudson-Essex Automobiles

Watch for the new Hudson-Essex cars, be sure to see this revelation in automobile history at 728 Fifty-sixth Street in Kenosha. The Diestler Tire Company at 5722 Seventh Ave. are the distributors of Miller Geared-to-the-Road and De Luxe tires. Equip your auto with these tires and you will enjoy motoring more. See them for vulcanizing, auto accessories, batteries, repairing, gas and oil.

The present day demands for automobile tires and tubes have made every manufacturer and dealer awake to the fact that a tire is "best by test." In other words a tire must make good to sell. Such has been the aim and the hundreds of tire users here will testify to the excellent results obtained from Miller Geared-to-the-Road and De Luxe tires and tubes sold in Kenosha by the Diestler Tire Company.

They not only can furnish you with

a tire and tube for any car, but go further by giving you real magnanimous service. A service that this section can be proud to have in our midst. Today when buying a tire we think not so much of the name as we do the firm that is selling and servicing same.

At this establishment you will always find a large stock from which to choose. Possibly you are driving a car with the old high pressure tires and wish to change to balloons or you would like to have an oversize for your present balloons. In any case you will be assured of a complete tire service at the Diestler Tire Company in Kenosha.

We find that very seldom an adjustment necessary with their tires, but as no workman is perfect, every tire is given many inspections, still a bad one will occur now and then, but adjustment

is made in short order. This sort of service has built up their business until today they are known all over this section.

See their large and complete stock of truck tires. They are able to meet your needs satisfactory when you desire truck tires.

The Hudson-Essex Motor Sales in Kenosha is the home of the Hudson and Essex cars in which refinement of appearance is the outstanding feature. They are strikingly improved in style and beauty at no sacrifice on fundamentals.

There is no other firm in this Farmers' and Business Men's Review more worthy of extended mention than the Hudson-Essex Motor Sales and Diestler Tire Company whose "service with a smile" is known by most motorists in this and adjoining counties. Adv.

Isermann Bros.

Men's and Young Men's Clothing and
Furnishings

The men and young men that desire to be well dressed will get their furnishings at Isermann Bros. at 614 Fifty-sixth Street in Kenosha. Phone 5931.

To conduct a successful clothing store one must have a knowledge of materials and the suitability of styles. At this conspicuous clothing establishment you will find quality materials and the latest in most correctly styled suits and overcoats.

Here you will find values that are nothing short of sensational, clothing made of pure wool fabrics and carefully tailored to give you long and satisfactory service. They buy from reliable manufacturers, whose designers are professional men of high repute and whose tailors work with painstaking care to turn-out only high quality merchandise. Regardless of price or label, you will find no better styled clothes than those at Isermann Bros. in Kenosha.

Their reputation of handling only high class goods at reasonable prices has reached far and wide and they well merit the large patronage they are receiving. By the rapid turn-over of their merchandise they are able to operate their business upon a small margin of profit thus selling at moderate prices.

In their stock you will find clothing for men of every walk in life.

No matter what your business may be you will find suits, overcoats, and various other clothing to meet your requirements. You'll see many of the well-known, best dressed business men wearing their suits and overcoats. They are buying them because they like the style, the fit, the material, the tailoring and the modest prices.

Here also you will find fashionable hosiery to please your tastes, whether you are inclined toward the conservative or collegiate. Neckties that go hand in hand, hats that are becoming and gleam with a rich lustre that can only be produced by skilled workmen. Caps, if you prefer them, in all colors to meet your individual taste, underwear, pajamas and other articles of men's clothing. You will always find a most tasteful display for your selection.

At no time could you ask for better service, it is all that can be desired. They will gladly aid you in your selections, but at no time obtrude purchases on you.

In this Farmers' and Business Men's Review it is a pleasure to compliment Isermann Bros. in Kenosha upon their distinguished standing in the business world. Their success in furnishing the people with quality goods has met with universal approval. Adv.

GRANT FURNITURE CO.

Manufacturers—Retailers

BUY DIRECT FROM FACTORY TO YOU

SUITS AND OVERCOATS

Tailored by

Joe Goldstein

stein in Kenosha.

Get your furnishings at 5711 Sixth Ave. in Kenosha, and they will bear the UNION LABEL, and cost less.

We'll all admit that "clothes do not make the man" but we must also admit that the clothes a man wears go a long way towards giving us a correct impression of the man. If his clothes are correctly tailored, if he is particular about his personal appearance, we immediately class him as successful, whatever his vocation may be.

We need not say more about the value of good clothes. We all know that they are of inestimable value. For the man who is fastidious about his clothes or for the man who puts business first, no matter what the needs may be, consult Mr. Joe Gold-

This popular tailor has established for himself a most enviable reputation in this community. He will not only tell you what style of clothing is best suited to your individuality but will help you in the selection of color as well. He knows the difference in types and their needs. Nowhere will you find one more capable of judging what you can wear.

He is absolutely reliable. Men in this community know that he can be trusted to tell them what they can wear best and that by following his advice they will not leave his place of business with an unbecoming suit. Service, quality and workmanship are the policy of this tailor. Perfect tailoring can not be had without qual-

ity of materials used. Good materials mean nothing if not accurately tailored. For the combination of these three, see Mr. Joe Goldstein in Kenosha.

To him his work is an art. He is justly proud of the clothes he turns out. His prices are within the reach of all. You will be amazed at the reasonable prices, quality and workmanship considered.

In this Farmers' and Business Men's Review we take great pleasure in commending this shop to the men of this community. They are indeed fortunate to have a shop of this class at their service. It is little wonder that men in the surrounding territory are taking advantage of this individual service.

FERTILIZERS FOR POTATOES

There are few crops grown in Wisconsin which are so dependent on the use of fertilizers as the potato. One reason for this is that the potato is grown on the lightest types of soil which are naturally rather low in fertility. There are many factors which influence the growth and quality of the crop, and the fertility of the soil. If, however, good soil is used, the crop is well cared for, and favorable weather prevails, increased yields can be expected from the use of commercial fertilizers under most conditions.

The best results with fertilizers have been secured in the northern part of the state where the soil and conditions are more favorable. The use of fertilizers is most profitable on the heavy soils of the south where the possible increase in yield is from 200 to 300 per cent. The light soils of the north, however, are more dependent on the use of fertilizers.

The fertilizer used for the crop will determine, to some extent, the amount of fertilizer which can be used. If the crop is grown for seed, larger applications can be made than where the crop is grown for the market. Since the potato is a crop which is very dependent on the use of fertilizers, it is important that the fertilizer be of the best quality and that it be applied in the correct manner. The effect of the fertilizer in giving the crop a vigorous start, and in establishing a strong, healthy vine growth, has been demonstrated by the quality and fineness of the tubers. Where the crop is grown for early market, larger applications of fertilizers are frequently made and the use of the fertilizer is made the grower to harvest the crop earlier.

Kind and Rate of Application
There is no one best kind of fertilizer to use. The conditions peculiar to each individual case, soil, locality, and kind and amount of fertilizer which can be used economically. There are a few fundamentals, however, in connection with the use

Beautiful floor coverings and curtains, make the home-making cheerful and comfortable. What is more beautiful than a lovely pattern of carpet to complete the household furnishings? Before you buy, be sure to see the selection at this up-to-date carpet and curtain shop.

This Kenosha firm handles exclusively rugs, draperies, shades and linoleum and because they specialize solely in these lines they have attained a reputation all through this territory as being most reliable dealers and people who know these special lines throughout. They give expert service and represent only worthy manufacturers.

In the linoleum department the leading and best brands of linoleum are featured and they have men in this department who have studied the best methods to lay and care for linoleum. If linoleum is laid correctly and given proper care it will wear as long as when the work is done in the wrong manner. The Barden and Frisby, Inc., in Kenosha, and buys a very large amount of the linoleum purchased in this locality for home, office and other uses. They are ready and willing to advise anyone who wants to know about linoleum and its proper laying.

Their rug, drapery and linoleum departments are known all over the county. Their stock is varied and complies with the demands of customers whose needs and likes naturally are vastly different. In the drapery section they carry the very popular curtain sets, shadow nets, sunfast dummies, cretonnes and all the other fabrics so much in use now where correctly curtained windows add to

the beauty of the home inside and out. Curtains need not be expensive to be correct—they can be very simple and low in price and still mirror the home atmosphere.

There are hundreds of households in Kenosha and throughout the county who go to this store when they need rugs. There is everything in the rug department that one might wish in quality, size and price. Rugs from the leading rug manufacturers of the entire country are brought together in this department for your choice.

Be sure to see the beautiful patterns in carpets which they feature. Many people desire having the floor covered completely, thus they have just the quality patterns in carpets that you desire to make your home cheerful and cozy.

"Bargains are proven only by comparison" is a well known saying.

At this store customers know the truth will be told them about the cheapest as well as the most expensive article in the store. If an article is cotton and will fade you will be told that without having to cross-examine the salesman. They lose a sale occasionally because of this policy, but it pays in the long run—and they intend to be in the city, doing more business than ever, for a long, long time.

The Barden and Frisby, Inc., specializes in real service. They make the word service actually mean what it says. You are invited to visit this store and inspect their large stock of rugs, linoleum, curtains, draperies and shades and we are certain you will be pleased and besides you can gain a great many valuable ideas.

of commercial fertilizer for potatoes that should be taken into consideration at the outset. The root system of potatoes is not very extensive and in order to make a vigorous growth there must be an abundance of plant food within the root feeding radius. The soil, of course, must be kept loose and friable, which necessitates thorough cultivation. Potatoes are heavy

feeders on potash. A poor vine growth is frequently due to a lack of nitrogen, other conditions being favorable, although the lack of potash manifests itself in a dark and rather crinkled condition of the foliage, and in later stages of growth, a bronzing of the leaves. Plenty of available potash results in a light-colored, thrifty, luxuriant growth.

GREINER NASH CO.

Nash Sales and Service

See these models at 5825 Eighth Ave. while in Kenosha, or phone 6174 for information and a demonstration. Weitzel & Turner at Waukegan, Illinois, have the Nash Agency, and here you will receive the same courteous and efficient dealing. The Greiner Nash Company is in the field for an agent in Antioch, Illinois.

At this popular and up-to-the-minute establishment you find the striking new Nash Cars. Nash has always been a favorite among the public, but the new "400" Series high compression motors is a revolution in the automobile world.

The Greiner Nash Company in Kenosha have on display all these latest models, beautiful in appearance and in a performance of striking character.

The Advance Six and Special Six are powered with the New "400" Series motor. This features of the entire line, Advanced Six, Special Six and the Standard Six, are in pairs.

They have two spark plugs in each cylinder, one in the cylinder Advanced Series reflects the most

block and another in the opposite side in the cylinder head. Two high tension coils, two condensers and two sets of breaker-points unite in delivering 360 flashes per second at top speed through the twelve aero-type metric spark plugs. Thus, since no unburned fuel escapes through the exhaust ports more thorough and efficient combustion with a consequent increase in economy must result.

This advanced engineering design combined with high compression and aluminum alloy pistons literally places the New Nash "400" Series engine in a class by itself, among the world's fine automobile power plants. See these wonderful cars at the Greiner Nash Company in Kenosha.

They are proud to locally represent this advanced and modern car. They will gladly show you the new features of the entire line, Advanced Six, Special Six and the Standard Six.

The Salon design of the "400" Series is a masterpiece of modern

modern note in automobile body artistry.

The new headlamps, parking lights, door handles, and all other exterior metal work are heavily chrome plated over nickel, maintaining a high lustre impervious to tarnish or corrosion.

Incorporated in these new models are such features as individual front seats, adjustable to both the correct height and tilt. All are luxuriously upholstered in superb quality grey mohair. You can neither appreciate the beauty, nor the striking performance of these wonderful new cars until you have seen them and driven them for yourself. Visit the Greiner Nash Company in Kenosha today.

We take great pleasure in this Farmers' and Business Men's Review in complimenting this wide-awake concern upon their most successful career in the handling of Nash Cars.

Copyright 1928, D. H. Matson

Forage and Pastures

Angleton Grass.—The Texas station found Angleton grass (*Andropogon annulatus*), introduced from India, to be valuable for pasture and hay and well adapted to the humid parts of the Gulf Coastal Plains of Texas and to parts of the state having 80 inches or more of rainfall. It has succeeded on soils ranging from sandy loam to heavy clay.

Planting Orchard Grass.—Mixing clover with orchard grass seemed entirely practical for hay crops at the Arkansas station, but was not desirable for orchard grass seed crops. While no method of sowing orchard grass resulted in failure, spring seeding was much more reliable than fall seeding because of moisture conditions.

Planting Sudan Grass.—Experiments at the Iowa station suggested seeding Sudan grass between May 15 and June 1. Seeding by broadcasting and harrowing or narrow rows with a grain drill for hay or pasture was found most practical, with 15 to 20 pounds per acre for hay or pasture broadcasted or in narrow drills and for seed 10 pounds broadcasted or drilled in 8-inch rows as the most profitable seeding rates.

Cutting Sudan Grass.—While more and better hay was obtained by cutting Sudan grass twice, curing difficulties and extra labor required with two cuttings led the Iowa station to recommend cutting only once and pasturing the aftermath. When two hay crops are desired, the first should probably be cut when the grass is heading and the second just before frost. The single crop may be cut when the seed is in the milk to soft dough stage, although Sudan grass may be cut from beginning of heading until in the hard dough stage. The optimum time of cutting for seed appeared to be when three-fourths of the seed are ripe and hard.

Reaction of Grasses to Chinch Bug Attack.—Native perennial species of grasses with harsh tissues, which comprise about 80 per cent. of the native prairie grasses of Kansas, were found by the Kansas station to survive chinch bug injury and to show the most marked ability to recover, whereas most tender grasses were either severely injured or completely killed.

Bluegrass Pastures.—Woodland pasture at the Ohio station had more weeds, yielded less dry matter, and pound for pound of actual bluegrass contained less total nutrients than the open pasture. The total carbohydrates found in the green material of the native woodland grass was 38 per cent. less than in the native grass adjoining but grown in the open. The differences found in grass quality appeared to be due chiefly to variations in the light.

Burning off the old grass on established bluegrass pastures was found to be decidedly injurious at the Wisconsin station so far as the amount of growth was concerned.

FARMERS READ HOME PAPER

The county weekly reaches and is read by more farm homes than any other newspaper. A survey of conditions in the farm homes just concluded shows that 67 per cent. of the farmers in the eastern, southern and middle western states take their local weekly paper; 64 per cent. take the daily city paper, 68 per cent. subscribe to a farm paper and 55 per cent. have a woman's magazine coming regularly each month.—Fort Plain (N. Y.) Standard.

Spring-time is nursery-time on the farm. Chickens, pigs and lambs all pay big returns for time spent on them while they are getting their start.

A. F. QUICK

"The Latest First," is featured by A. F. Quick, this most reliable jeweler, located in the Orpheum Building in Kenosha. Phone 3551.

This is one of the most complete and modern jewelry stores to be found anywhere. They are thoroughly reliable and dependable. Goods bought here are always what they are represented to be.

Here you will find an up-to-date jewelry stock, artistically displayed for the convenience of the patrons. Rings with most unique mountings, the latest in cameo brooches, beads and necklaces of all kinds, bags, watches, bracelets, silverware and clocks are to be had here. A most unusual line of artistic jewelry is found at A. F. Quick's in Kenosha.

This popular retail jewelry concern not only carries a most complete line of finished jewelry but also mountings of unusual beauty and are prepared to remount your old stones. For a very small amount you may have your old rings made into the very newest and up-to-date fashion. They specialize in covering old wedding rings with white gold or platinum in any desired design.

For gifts or bridge prizes you will find it a pleasure to make your selections from their stock. The attendants are courteous, well trained salespeople who will gladly assist you in your selections. Whether you are interested in purchasing or just wish to see the newest designs on display you are equally welcomed at A. F. Quick's in Kenosha.

In this Farmers' and Business Men's Review we take great pleasure in directing our many readers to this popular and progressive establishment. They are indeed to be complimented upon their very efficient business methods.

CONSTANCY

A constant drop of water
Wears away the hardest stone;
The constant gnawing Fido
Masticates the toughest bone.
The constant wooing lover
Carries off the blushing maid;
And the constant advertiser
Is the one that gets the trade.

Haubrich's Shoe Shop

Shoes Made Like New

Don't throw away your worn shoes, but have them repaired at 515 Fifty-seventh Street in Kenosha, and they will look like new instead of repaired shoes, and you will get even more wear than before. Phone 2-2224.

When the heel of your shoe becomes worn on one side, rough or stony walks give your feet pain, or there is a broken part in the upper it is time to see this reliable shoe repair shop.

Everyone strives to be above the average, but let us quote here that the average person waits till their feet are on the ground before they think of having them repaired. A good shoe is built of good leather, both in uppers and soles and has a heavy inner sole. But with all these good qualities they will not stand for excessive abuse. By this we mean wearing the shoe until there is not sufficient uppers left to securely fasten the new soles.

At this popular and progressive repair shop you will find them courteous and accommodating. They will tell you the best way in which your shoe should be repaired to give you the longest number of walking miles. If you have foot troubles tell them about it and they will rebuild your shoes to overcome the trouble.

When your shoes are run over on

one side they should be built high on that side to correct the trouble. If you have weak arches the shoes should be built up on the inside to keep the weight off the arches. Makes no difference what your foot troubles are—let this modern shoe repairing shop rebuild your shoes to overcome the trouble.

Mr. Haubrich, the proprietor, sees to it that only the highest grade of leather goes into your shoes. He is a veteran in the shoe repair business and you can depend upon his talented services. When your shoes are repaired at his establishment they will give you as much wear as when first bought and worn.

At this store you will find laces for all kinds of shoes. A polish for every shoe, be it black, tan, white or what not. They feature everything for the repair and care of shoes.

"Once a customer—always a customer" is not only featured at Haubrich's Shoe Shop in Kenosha but can be proven true. Just ask your neighbor—he or she no doubt has at some time had shoes repaired here and will tell you to go there also. This Farmers' and Business Men's Review recommends them to our hundreds of readers as being thoroughly reliable.
